# Section 2. Hazards identification

| Classification of the substance or mixture | <ul> <li>FLAMMABLE LIQUIDS - Category 3<br/>SKIN CORROSION/IRRITATION - Category 2<br/>SERIOUS EYE DAMAGE/EYE IRRITATION - Category 2A<br/>SKIN SENSITISATION - Category 1<br/>LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 3</li> </ul>  |
|--|--|
| GHS label elements                         |  |
| Hazard pictograms                          |  |
| Signal word                                | : Warning.   |
| Hazard statements                          | <ul> <li>Warning.</li> <li>H226 - Flammable liquid and vapour.<br/>H315 - Causes skin irritation.<br/>H317 - May cause an allergic skin reaction.<br/>H319 - Causes serious eye irritation.<br/>H412 - Harmful to aquatic life with long lasting effects.</li> </ul>                     |
| Precautionary statements                   |  |
| Prevention                                 | <ul> <li>P280 - Wear protective gloves. Wear eye or face protection.</li> <li>P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.</li> <li>P273 - Avoid release to the environment.</li> <li>P261 - Avoid breathing vapour.</li> </ul> |

### Section 2. Hazards identification

| Response                   | : | <ul> <li>P362 + P364 - Take off contaminated clothing and wash it before reuse.</li> <li>P302 + P352 - IF ON SKIN: Wash with plenty of water.</li> <li>P333 + P313 - If skin irritation or rash occurs: Get medical advice or attention.</li> <li>P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes.</li> <li>Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>P337 + P313 - If eye irritation persists: Get medical advice or attention.</li> </ul> |
|----------------------------|---|---|
| Storage                    | 1 | Not applicable.   |
| Disposal                   | - | P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Other hazards which do not | : | None known.   |

result in classification

# Section 3. Composition/information on ingredients

| Substance/mixture                | : Mixture        |
|----------------------------------|------------------|
| Other means of<br>identification | : Not available. |

#### CAS number/other identifiers

| CAS number   | : Not applicable. |
|--------------|-------------------|
| EC number    | : Mixture.        |
| Product code | : 15520           |

| Ingredient name   | %         | CAS number |
|---|-----------|------------|
| 4,4'-Isopropylidenediphenol, oligomeric reaction products with 1-chloro-<br>2,3-epoxypropane, reaction products with fatty acids, C18-unsatd., dimers | ≥10 - <25 | 67989-52-0 |
| xylene  | ≤10       | 1330-20-7  |
| epoxy resin (MW 700-1200)   | ≤10       | 25036-25-3 |
| glycidyl ether of 3-alkyl phenol  | ≤5        | 68413-24-1 |
| butan-1-ol  | <3        | 71-36-3    |
| ethylbenzene  | ≤3        | 100-41-4   |
| benzyl alcohol  | ≤3        | 100-51-6   |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

#### Description of necessary first aid measures

| Eye contact  | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.  |
|--------------|--|
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If not breathing, if breathing is irregular or if respiratory arrest occurs, provide<br>artificial respiration or oxygen by trained personnel. It may be dangerous to the<br>person providing aid to give mouth-to-mouth resuscitation. Get medical attention if<br>adverse health effects persist or are severe. If unconscious, place in recovery<br>position and get medical attention immediately. Maintain an open airway. Loosen<br>tight clothing such as a collar, tie, belt or waistband. |
| Skin contact | : Wash with plenty of soap and water. Remove contaminated clothing and shoes.<br>Wash contaminated clothing thoroughly with water before removing it, or wear<br>gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the<br>event of any complaints or symptoms, avoid further exposure. Wash clothing before<br>reuse. Clean shoes thoroughly before reuse.  |

### Section 4. First aid measures

| Section 4. First al         | u IIIEasules  |
|-----------------------------|---|
| Ingestion                   | : Wash out mouth with water. Remove dentures if any. If material has been<br>swallowed and the exposed person is conscious, give small quantities of water to<br>drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do no<br>induce vomiting unless directed to do so by medical personnel. If vomiting occurs,<br>the head should be kept low so that vomit does not enter the lungs. Get medical<br>attention if adverse health effects persist or are severe. Never give anything by<br>mouth to an unconscious person. If unconscious, place in recovery position and ge<br>medical attention immediately. Maintain an open airway. Loosen tight clothing suc<br>as a collar, tie, belt or waistband. |
| Most important symptoms/e   |   |
| Potential acute health effe | <u>ets</u>  |
| Eye contact                 | : Causes serious eye irritation.  |
| Inhalation                  | : No known significant effects or critical hazards.   |
| Skin contact                | : Causes skin irritation. May cause an allergic skin reaction.  |
| Ingestion                   | : No known significant effects or critical hazards.   |
| Over-exposure signs/sym     | <u>ptoms</u>  |
| Eye contact                 | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| Inhalation                  | : No specific data.   |
| Skin contact                | : Adverse symptoms may include the following:<br>irritation<br>redness  |
| Ingestion                   | : No specific data.   |
| Indication of immediate me  | dical attention and special treatment needed, if necessary  |
| Notes to physician          | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>   |
| Specific treatments         | : No specific treatment.  |
| Protection of first-aiders  | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation Wash contaminated clothing thoroughly with water before removing it, or wear  |

Date of issue/Date of revision

### Section 5. Firefighting measures

gloves.

: 11.05.2023

| Extinguishing media                        |  |
|--|--|
| Suitable extinguishing media               | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing media             | : Do not use water jet.  |
| Specific hazards arising from the chemical | : Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is harmful to aquatic life with long<br>lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products   | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>halogenated compounds<br>metal oxide/oxides  |

Date of previous issue

:11.05.2023

Version :1.03

3/11

# Section 5. Firefighting measures

| Special protective actions<br>for fire-fighters   |   | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
|---|---|--|
| Special protective<br>equipment for fire-fighters | : | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

### Section 6. Accidental release measures

| Personal precautions, protec   | tiv        | e equipment and emergency procedures   |
|--------------------------------|------------|--|
| For non-emergency<br>personnel | :          | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
| For emergency responders       | -          | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | :          | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful<br>to the environment if released in large quantities.  |
| Methods and material for con   | <u>ita</u> | nment and cleaning up  |
| Small spill                    | :          | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                    | -          | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-  |

effluent treatment plant or proceed as follows. Contain and collect spillage with noncombustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

# Section 7. Handling and storage

| Precautions for safe handling |   |
|-------------------------------|---|
| Protective measures           | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |

### Section 7. Handling and storage

| Advice on general occupational hygiene                             | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
|--|---|
| Conditions for safe storage,<br>including any<br>incompatibilities | : Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |

### Section 8. Exposure controls/personal protection

| Control parameters                  |   |
|-------------------------------------|---|
| Occupational exposure lim           | <u>its</u>  |
| None.                               |   |
| Appropriate engineering<br>controls | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.  |
| Environmental exposure controls     | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |
| Individual protection measu         | res   |
| Hygiene measures                    | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location. |
| Eye/face protection                 | : Safety eyewear complying to ISO 16321-1:2022 should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash   |

chemical splash goggles. **Skin protection Hand protection** : There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals. The breakthrough time must be greater than the end use time of the product. The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed. Gloves should be replaced regularly and if there is any sign of damage to the glove material. Always ensure that gloves are free from defects and that they are stored and used correctly. The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance. Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.

# Section 8. Exposure controls/personal protection

|                        | Wear suitable gloves tested to ISO 374-1:2016.<br>Not recommended, gloves(breakthrough time) < 1 hour: butyl rubber (> 0.4 mm)<br>May be used, gloves(breakthrough time) 4 - 8 hours: neoprene (> 0.35 mm), PVC (><br>0.5 mm)<br>Recommended, gloves(breakthrough time) > 8 hours: Viton® (> 0.7 mm), nitrile<br>rubber (> 0.4 mm), 4H/Silver Shield® (> 0.07 mm), Teflon (> 0.35 mm), polyvinyl<br>alcohol (PVA) (> 0.3 mm)  |
|------------------------|---|
| Body protection        | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves. |
| Other skin protection  | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection | : If workers are exposed to concentrations above the exposure limit, they must use a respirator according to EN 140. Use respiratory mask with charcoal and dust filter when spraying this product, according to EN 14387(as filter combination A2-P2). In confined spaces, use compressed-air or fresh-air respiratory equipment. When use of roller or brush, consider use of charcoalfilter.                               |

# Section 9. Physical and chemical properties

| <u>Appearance</u>                            |   |         |
|--|---|---------|
| Physical state                               | Liquid.   |         |
| Colour                                       | Black., Grey, Red   |         |
| Odour  | Characteristic.   |         |
| Odour threshold                              | Not applicable.   |         |
| рН   | Not applicable.   |         |
| Melting point                                | Not applicable.   |         |
| Boiling point                                | Lowest known value: 119°C (246.2°F) (butan-1-ol). Weighted average: 143. (289.6°F)                                | 13°C    |
| Flash point                                  | Closed cup: 30°C (86°F)   |         |
| Evaporation rate                             | Highest known value: 0.84 (ethylbenzene) Weighted average: 0.61compare butyl acetate                              | ∍d with |
| Flammability (solid, gas)                    | Not applicable.   |         |
| Lower and upper explosive (flammable) limits | 0.8 - 13%   |         |
| Vapour pressure                              | Highest known value: 1.2 kPa (9.3 mm Hg) (at 20°C) (ethylbenzene). Weig average: 0.82 kPa (6.15 mm Hg) (at 20°C)  | hted    |
| Vapour density                               | Highest known value: 3.7 (Air = 1) (xylene). Weighted average: 3.51 (Air =  | = 1)    |
| Density                                      | 1.551 to 1.603 g/cm <sup>3</sup>  |         |
| Solubility                                   | Very slightly soluble in the following materials: cold water.<br>Insoluble in the following materials: hot water. |         |
| Partition coefficient: n-<br>octanol/water   | Not available.  |         |
| Auto-ignition temperature                    | Lowest known value: 355°C (671°F) (butan-1-ol).   |         |
| Decomposition temperature                    | Not available.  |         |
| Viscosity                                    | Kinematic (40°C): >20.5 mm²/s (>20.5 cSt)   |         |

# Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : Avoid all possible sources of ignition (spark or flame). Do not pressurise, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. |
| Incompatible materials             | : Reactive or incompatible with the following materials:<br>oxidising materials   |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |

Not available.

#### **Teratogenicity**

Not available.

# Section 11. Toxicological information

#### Specific target organ toxicity (single exposure)

| Name       | Category   | Route of exposure | Target organs                |
|------------|------------|-------------------|------------------------------|
| xylene     | Category 3 | -                 | Respiratory tract irritation |
| butan-1-ol | Category 3 | -                 | Respiratory tract irritation |
|            | Category 3 |                   | Narcotic effects             |

#### Specific target organ toxicity (repeated exposure)

| Name         |            | Route of<br>exposure | Target organs  |
|--------------|------------|----------------------|----------------|
| ethylbenzene | Category 2 | -                    | hearing organs |

#### **Aspiration hazard**

| Name | Result   |
|------|--|
|      | ASPIRATION HAZARD - Category 1<br>ASPIRATION HAZARD - Category 1 |

| Information on likely routes of exposure | 1 | Not available.   |
|--|---|--|
| Potential acute health effects           |   |  |
| Eye contact                              | ÷ | Causes serious eye irritation.                               |
| Inhalation                               | ÷ | No known significant effects or critical hazards.            |
| Skin contact                             | ÷ | Causes skin irritation. May cause an allergic skin reaction. |
| Ingestion                                | ÷ | No known significant effects or critical hazards.            |

#### Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness |
|--------------|--|
| Inhalation   | : No specific data.  |
| Skin contact | : Adverse symptoms may include the following:<br>irritation<br>redness                     |
| Ingestion    | : No specific data.  |

#### Delayed and immediate effects as well as chronic effects from short and long-term exposure

| Short term exposure            |   |
|--------------------------------|---|
| Potential immediate<br>effects | : Not available.  |
| Potential delayed effects      | : Not available.  |
| Long term exposure             |   |
| Potential immediate<br>effects | : Not available.  |
| Potential delayed effects      | : Not available.  |
| Potential chronic health effe  | <u>ects</u>   |
| Not available.                 |   |
| General                        | : Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels. |
| Carcinogenicity                | : No known significant effects or critical hazards.   |
| Date of issue/Date of revision | : 11.05.2023 Date of previous issue : 11.05.2023 Version : 1.03 8/11                                  |

## Section 11. Toxicological information

| Mutagenicity                 | : No known significant effects or critical hazards. |
|------------------------------|---|
| Teratogenicity               | : No known significant effects or critical hazards. |
| <b>Developmental effects</b> | : No known significant effects or critical hazards. |
| Fertility effects            | : No known significant effects or critical hazards. |

#### Numerical measures of toxicity

#### Acute toxicity estimates

| Route                | ATE value      |
|----------------------|----------------|
| Oral                 | 13194.88 mg/kg |
| Dermal               | 12643.68 mg/kg |
| Inhalation (vapours) | 126.22 mg/l    |

# Section 12. Ecological information

#### **Toxicity**

| Product/ingredient name | Result  | Species   | Exposure                                     |
|-------------------------|---|---|--|
| xylene                  | Acute LC50 8500 µg/l Marine water   | Crustaceans - Palaemonetes pugio  | 48 hours                                     |
| ethylbenzene            | Acute LC50 13400 μg/l Fresh water<br>Acute EC50 7700 μg/l Marine water<br>Acute EC50 2.93 mg/l<br>Acute LC50 4.2 mg/l | Fish - Pimephales promelas<br>Algae - Skeletonema costatum<br>Daphnia<br>Fish | 96 hours<br>96 hours<br>48 hours<br>96 hours |

#### Persistence and degradability

|                   | Aquatic half-life |                    |

#### **Bioaccumulative potential**

| Product/ingredient name | LogPow | BCF         | Potential |
|-------------------------|--------|-------------|-----------|
| xylene                  | 3.12   | 8.1 to 25.9 | low       |
| butan-1-ol              | 1      | -           | low       |
| ethylbenzene            | 3.6    | -           | low       |
| benzyl alcohol          | 0.87   | <100        | low       |

#### **Mobility in soil**

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects : No known signifi

: No known significant effects or critical hazards.

### Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its

## Section 13. Disposal considerations

container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

### Section 14. Transport information
