# SAFETY DATA SHEET

# Penguard HSP Comp B

### Section 1. Identification

| GHS product identifier                                     | : Penguard HSP Comp B   |
|--|---|
| Product code   | : 16620   |
| Product description  | : Hardener.   |
| Other means of identification                              | : Not available.  |
| Product type   | : Liquid.   |
| Supplier's details   | : Jotun Paints Inc.<br>842 W. Sam Houston Parkway North<br>City Center Three, Suite 300<br>Houston, TX 77024 USA<br>Phone number: +1 (713) 860-8241<br>SDSJotun@jotun.com |
| Emergency telephone<br>number (with hours of<br>operation) | : 1-800-424-9300<br>(Staffed 24/7)  |

# Section 2. Hazards identification

| OSHA/HCS status                            | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).  |
|--|--|
| Classification of the substance or mixture | <ul> <li>FLAMMABLE LIQUIDS - Category 3         ACUTE TOXICITY (oral) - Category 4         SKIN CORROSION - Category 1C         SERIOUS EYE DAMAGE - Category 1         SKIN SENSITIZATION - Category 1         TOXIC TO REPRODUCTION - Category 2         SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2         AQUATIC HAZARD (LONG-TERM) - Category 3         </li> </ul> |

| <u>GHS label elements</u> |  |
|---------------------------|--|
| Hazard pictograms         |  |
|                           |  |
|                           |  |
|                           |  |

| Signal word       | : |
|-------------------|---|
| Hazard statements | : |

- Danger.
- : H226 Flammable liquid and vapor.
  - H302 Harmful if swallowed.
  - H314 Causes severe skin burns and eye damage.
  - H317 May cause an allergic skin reaction.
  - H361 Suspected of damaging fertility or the unborn child.
  - H373 May cause damage to organs through prolonged or repeated exposure. (hearing organs, kidneys)
  - H412 Harmful to aquatic life with long lasting effects.

#### **Precautionary statements**

### Section 2. Hazards identification

| Prevention                       | : P201 - Obtain special instructions before use.  |
|----------------------------------|---|
|                                  | P280 - Wear protective gloves, protective clothing and eye or face protection.  |
|                                  | P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition  |
|                                  | sources. No smoking.  |
|                                  | P273 - Avoid release to the environment.  |
|                                  | P260 - Do not breathe vapor.  |
| _                                | P270 - Do not eat, drink or smoke when using this product.  |
| Response                         | <ul> <li>P308 + P313 - IF exposed or concerned: Get medical advice or attention.</li> <li>P304 + P310 - IF INHALED: Immediately call a POISON CENTER or doctor.</li> <li>P301 + P310, P330, P331 - IF SWALLOWED: Immediately call a POISON CENTER or</li> </ul> |
|                                  | doctor. Rinse mouth. Do NOT induce vomiting.  |
|                                  | P303 + P361 + P353, P310 - IF ON SKIN (or hair): Take off immediately all   |
|                                  | contaminated clothing. Rinse skin with water. Immediately call a POISON CENTER or<br>doctor.  |
|                                  | P363 - Wash contaminated clothing before reuse.   |
|                                  | P302 + P352 - IF ON SKIN: Wash with plenty of water.  |
|                                  | P333 + P313 - If skin irritation or rash occurs: Get medical advice or attention.   |
|                                  | P305 + P351 + P338, P310 - IF IN EYES: Rinse cautiously with water for several<br>minutes. Remove contact lenses, if present and easy to do. Continue rinsing.<br>Immediately call a POISON CENTER or doctor.   |
| Storage                          | : P403 + P235 - Store in a well-ventilated place. Keep cool.  |
| Disposal                         | : P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Hazards not otherwise classified | : None known.   |

### Section 3. Composition/information on ingredients

| Substance/mixture | : Mixture        |
|-------------------|------------------|
| Other means of    | : Not available. |
| identification    |                  |

#### **CAS number/other identifiers**

| CAS number : Not applie                   | able.            |             |
|---|------------------|-------------|
| Product code : 16620                      |                  |             |
| Ingredient name                           | %                | CAS number  |
| xylene                                    | ≤13              | 1330-20-7   |
| formaldehyde, polymer with benzenamine, h | nydrogenated ≤10 | 135108-88-2 |
| benzyl alcohol                            | ≤10              | 100-51-6    |
| butan-1-ol                                | ≤6.1             | 71-36-3     |
| ethylbenzene                              | ≤5               | 100-41-4    |
| 2,4,6-tris(dimethylaminomethyl)phenol     | ≤3               | 90-72-2     |
| salicylic acid                            | <1               | 69-72-7     |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

# Section 4. First aid measures

| Description of necessary first aid measures |   |  |
|---|---|--|
| Eye contact                                 | : Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.  |  |
| Inhalation                                  | : Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |  |
| Skin contact                                | : Get medical attention immediately. Call a poison center or physician. Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.  |  |
| Ingestion                                   | : Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.   |  |

### Most important symptoms/effects, acute and delayed

| Potential acute health of | effects  |
|---------------------------|--|
| Eye contact               | : Causes serious eye damage.   |
| Inhalation                | : No known significant effects or critical hazards.  |
| Skin contact              | : Causes severe burns. May cause an allergic skin reaction.  |
| Ingestion                 | : Harmful if swallowed.  |
| Over-exposure signs/s     | <u>ymptoms</u>   |
| Eye contact               | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness   |
| Inhalation                | : Adverse symptoms may include the following:<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations  |
| Skin contact              | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations |
| Ingestion                 | : Adverse symptoms may include the following:<br>stomach pains<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations   |
| Date of issue             | : 17.10.2022   |

3/16

# Section 4. First aid measures

| Indication of immediate med | dical attention and special treatment needed, if necessary  |
|-----------------------------|---|
| Notes to physician          | <ul> <li>In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br/>The exposed person may need to be kept under medical surveillance for 48 hours.</li> </ul>   |
| Specific treatments         | : No specific treatment.  |
| Protection of first-aiders  | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| Extinguishing media                               |   |
|---|---|
| Suitable extinguishing media                      | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                    | : Do not use water jet.   |
| Specific hazards arising from the chemical        | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is harmful to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products          | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides   |
| Special protective actions for fire-fighters      | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

## Section 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | : | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Do not breathe vapor or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment. |
|--------------------------------|---|--|
| For emergency responders       | : | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | : | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to<br>the environment if released in large quantities.  |

Methods and materials for containment and cleaning up

| Date of issue | : 17.10.2022 | 4/16 |
|---------------|--------------|------|
|---------------|--------------|------|

## Section 6. Accidental release measures

| Small spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
|-------------|--|
| Large spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

### Section 7. Handling and storage

### Precautions for safe handling

| Protective measures  | Put on appropriate personal protective equipment (see Section 8). Persons with a<br>history of skin sensitization problems should not be employed in any process in whith<br>his product is used. Avoid exposure - obtain special instructions before use. Avoid<br>exposure during pregnancy. Do not handle until all safety precautions have been re-<br>and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or<br>Do not ingest. Avoid release to the environment. Use only with adequate ventilation.<br>Wear appropriate respirator when ventilation is inadequate. Do not enter storage a<br>and confined spaces unless adequately ventilated. Keep in the original container or<br>approved alternative made from a compatible material, kept tightly closed when not<br>use. Store and use away from heat, sparks, open flame or any other ignition source.<br>Jse explosion-proof electrical (ventilating, lighting and material handling) equipment<br>use only non-sparking tools. Take precautionary measures against electrostatic<br>lischarges. Empty containers retain product residue and can be hazardous. Do not<br>euse container. | d<br>ead<br>mist.<br>on.<br>ireas<br>r an<br>t in<br>e.<br>nt. |
|--|--|--|
| Advice on general occupational hygiene                             | Eating, drinking and smoking should be prohibited in areas where this material is<br>nandled, stored and processed. Workers should wash hands and face before eatin<br>Irinking and smoking. Remove contaminated clothing and protective equipment be<br>entering eating areas. See also Section 8 for additional information on hygiene<br>neasures.  |  |
| Conditions for safe storage,<br>including any<br>incompatibilities | Store in accordance with local regulations. Store in a segregated and approved are<br>store in original container protected from direct sunlight in a dry, cool and well-vent<br>area, away from incompatible materials (see Section 10) and food and drink. Store<br>ocked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep<br>container tightly closed and sealed until ready for use. Containers that have been<br>opened must be carefully resealed and kept upright to prevent leakage. Do not sto<br>inlabeled containers. Use appropriate containment to avoid environmental<br>contamination. See Section 10 for incompatible materials before handling or use.   | ilated<br>e  |

### Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name | Exposure limits   |  |  |
|-----------------|---|--|--|
| xylene          | ACGIH TLV (United States, 1/2022).<br>STEL: 651 mg/m <sup>3</sup> 15 minutes.<br>TWA: 434 mg/m <sup>3</sup> 8 hours.<br>TWA: 20 ppm 8 hours.<br>OSHA PEL (United States, 5/2018).<br>TWA: 435 mg/m <sup>3</sup> 8 hours.<br>TWA: 100 ppm 8 hours.<br>OSHA PEL 1989 (United States, 3/1989).<br>STEL: 655 mg/m <sup>3</sup> 15 minutes.<br>STEL: 150 ppm 15 minutes. |  |  |

## Section 8. Exposure controls/personal protection

|                             |                                      | TWA: 435 mg/m <sup>3</sup> 8 hours.<br>TWA: 100 ppm 8 hours. |
|-----------------------------|--------------------------------------|--|
| formaldabyda, polymar with  | honzonamina hydrogonatod             | None   |
|                             | benzenamine, hydrogenated            |  |
| benzyl alcohol              |                                      | OARS WEEL (United States, 1/2021).                           |
|                             |                                      | TWA: 10 ppm 8 hours.   |
| butan-1-ol                  |                                      | ACGIH TLV (United States, 1/2022).                           |
|                             |                                      | TWA: 20 ppm 8 hours.   |
|                             |                                      | NIOSH REL (United States, 10/2020).                          |
|                             |                                      | Absorbed through skin.                                       |
|                             |                                      | CEIL: 150 mg/m <sup>3</sup>                                  |
|                             |                                      | CEIL: 50 ppm   |
|                             |                                      | OSHA PEL (United States, 5/2018).                            |
|                             |                                      | TWA: 300 mg/m <sup>3</sup> 8 hours.                          |
|                             |                                      | TWA: 100 ppm 8 hours.  |
|                             |                                      | OSHA PEL 1989 (United States, 3/1989).                       |
|                             |                                      | Absorbed through skin.                                       |
|                             |                                      | -  |
|                             |                                      | CEIL: 150 mg/m <sup>3</sup>                                  |
|                             |                                      | CEIL: 50 ppm   |
| ethylbenzene                |                                      | OSHA PEL 1989 (United States, 3/1989).                       |
|                             |                                      | TWA: 100 ppm 8 hours.  |
|                             |                                      | TWA: 435 mg/m <sup>3</sup> 8 hours.                          |
|                             |                                      | STEL: 125 ppm 15 minutes.                                    |

|            | <ul> <li>Wash hands, foreamine and face theroaging after handing oremed products, before eating, smoking and using the lavatory and at the end of the working period.</li> <li>Appropriate techniques should be used to remove potentially contaminated clothing.</li> <li>Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.</li> </ul> |
|------------|--|
| orotection | : Safety eyewear complying with an approved standard should be used when a risk<br>assessment indicates this is necessary to avoid exposure to liquid splashes, mists  |

Eye/face protection: Safety eyewear complying with an approved standard should be used when a risk<br/>assessment indicates this is necessary to avoid exposure to liquid splashes, mists,<br/>gases or dusts. If contact is possible, the following protection should be worn, unless<br/>the assessment indicates a higher degree of protection: chemical splash goggles and/<br/>or face shield. If inhalation hazards exist, a full-face respirator may be required instead.

### Skin protection

# Section 8. Exposure controls/personal protection

| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this is<br>necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection time of the gloves cannot be accurately estimated. |
|------------------------|--|
|                        | There is no one glove material or combination of materials that will give unlimited<br>resistance to any individual or combination of chemicals.<br>The breakthrough time must be greater than the end use time of the product.<br>The instructions and information provided by the glove manufacturer on use,<br>storage, maintenance and replacement must be followed.<br>Gloves should be replaced regularly and if there is any sign of damage to the glove<br>material.   |
|                        | Always ensure that gloves are free from defects and that they are stored and used correctly.<br>The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance.   |
|                        | Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.   |
|                        | Wear suitable gloves tested to EN374.<br>Not recommended, gloves(breakthrough time) < 1 hour: PVC, PE<br>Recommended, gloves(breakthrough time) > 8 hours: Viton®, 4H, Teflon, polyvinyl<br>alcohol (PVA)<br>May be used, gloves(breakthrough time) 4 - 8 hours: Barricade, CPF 3, Responder,  |
|                        | nitrile rubber, neoprene, butyl rubber   |
| Body protection        | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.  |
| Other skin protection  | <ul> <li>Appropriate footwear and any additional skin protection measures should be selected<br/>based on the task being performed and the risks involved and should be approved by a<br/>specialist before handling this product.</li> </ul>  |
| Respiratory protection | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.   |

# Section 9. Physical and chemical properties

| Appearance                                   |   |
|--|---|
| Physical state                               | : Liquid.   |
| Color  | : Colorless.  |
| Odor   | : Characteristic.   |
| Odor threshold                               | : Not applicable.   |
| рН   | Not applicable.   |
| Melting point                                | : Not applicable.   |
| Boiling point                                | : Lowest known value: 119°C (246.2°F) (butan-1-ol). Weighted average: 171.23°C (340.2°F)  |
| Flash point                                  | : Closed cup: 33°C (91.4°F)   |
| Evaporation rate                             | : Highest known value: 0.84 (ethylbenzene) Weighted average: 0.52compared with butyl acetate  |
| Flammability (solid, gas)                    | : Not applicable.   |
| Lower and upper explosive (flammable) limits | : 0.8 - 13%   |
| Vapor pressure                               | <ul> <li>Highest known value: 1.2 kPa (9.3 mm Hg) (at 20°C) (ethylbenzene). Weighted<br/>average: 0.52 kPa (3.9 mm Hg) (at 20°C)</li> </ul> |
| Date of issue                                | :17.10.2022 7/16  |

# Section 9. Physical and chemical properties

| Vapor density                              | : Highest known value: 3.7 (Air = 1) (xylene). Weighted average: 3.5 (Air = 1) |
|--|--|
| Relative density                           | : 0.986 g/cm <sup>3</sup> 8.23 pounds/gallon                                   |
| Solubility                                 | : Insoluble in the following materials: cold water and hot water.              |
| Partition coefficient: n-<br>octanol/water | : Not available.   |
| Auto-ignition temperature                  | : Lowest known value: 355°C (671°F) (butan-1-ol).                              |
| Decomposition temperature                  | : Not available.   |
| Viscosity                                  | : Kinematic (40°C (104°F)): >20.5 mm²/s (>20.5 cSt)                            |

# Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. |
| Incompatible materials             | : Reactive or incompatible with the following materials:<br>oxidizing materials   |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |

# Section 11. Toxicological information

### Information on toxicological effects

#### Acute toxicity

| Product/ingredient name                              | Result                | Species    | Dose        | Exposure |

: No known significant effects or critical hazards.

## Section 13. Disposal considerations

| Disposal methods                    | : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. |

### Section 16. Other information

Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.

National Fire Protection Association (U.S.A.)
