

# Tankguard Holding Primer Comp A

| Section 1. Identification     |   |  |
|-------------------------------|---|--|
| Product name                  | : Tankguard Holding Primer Comp A   |  |
| Product code                  | : 20200   |  |
| Product description           | : Paint.  |  |
| Product type                  | : Liquid.   |  |
| Other means of identification | : Not available.  |  |
| Supplier's details            | : Jotun South Africa (PTY) Ltd<br>P.O.Box 187, Blackheath 7581,<br>Cape Town 8000 |  |
|                               | Tel: +27 21 941 8800<br>Fax: +27 21 941 8700                                      |  |
|                               | SDSJotun@jotun.com  |  |
| Emergency telephone<br>number | : 24 hour toll free number Environserve Hazmat: 0800 147 112                      |  |

## Section 2. Hazards identification

| Classification of the<br>substance or mixture | : FLAMMABLE LIQUIDS - Category 3<br>ACUTE TOXICITY (oral) - Category 5<br>SKIN CORROSION/IRRITATION - Category 2<br>SERIOUS EYE DAMAGE/EYE IRRITATION - Category 1<br>SKIN SENSITISATION - Category 1<br>SPECIFIC TARGET ORGAN TOXICITY - SINGLE EXPOSURE (Respiratory tract<br>irritation) - Category 3<br>LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 3       |
|---|---|
| GHS label elements                            |   |
| Hazard pictograms                             |   |
| Signal word                                   | : Danger.   |
| Hazard statements                             | <ul> <li>H226 - Flammable liquid and vapour.</li> <li>H303 - May be harmful if swallowed.</li> <li>H315 - Causes skin irritation.</li> <li>H317 - May cause an allergic skin reaction.</li> <li>H318 - Causes serious eye damage.</li> <li>H335 - May cause respiratory irritation.</li> <li>H412 - Harmful to aquatic life with long lasting effects.</li> </ul> |
| Precautionary statements                      |   |
| Prevention                                    | <ul> <li>P280 - Wear protective gloves. Wear eye or face protection.</li> <li>P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.</li> <li>P273 - Avoid release to the environment.</li> <li>P261 - Avoid breathing vapour.</li> </ul>  |

| Date of issue/Date of revision | : 14.10.2021 | Date of previous issue | : No previous validation | Version | :1 | 1/12 |
|--------------------------------|--------------|------------------------|--------------------------|---------|----|------|
|--------------------------------|--------------|------------------------|--------------------------|---------|----|------|

## Section 2. Hazards identification

| Response | <ul> <li>P304 + P312 - IF INHALED: Call a POISON CENTER or doctor if you feel unwell.</li> <li>P362 + P364 - Take off contaminated clothing and wash it before reuse.</li> <li>P302 + P352 - IF ON SKIN: Wash with plenty of water.</li> <li>P333 + P313 - If skin irritation or rash occurs: Get medical advice or attention.</li> <li>P305 + P351 + P338, P310 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.</li> </ul> |
|----------|--|
|          | Immediately call a POISON CENTER or doctor.  |
| Storage  | : P403 + P233 - Store in a well-ventilated place. Keep container tightly closed.   |
| Disposal | <ul> <li>P501 - Dispose of contents and container in accordance with all local, regional,<br/>national and international regulations.</li> </ul>   |

# Other hazards which do not : None known. result in classification

## Section 3. Composition/information on ingredients

| Substance/mixture | : Mixture        |
|-------------------|------------------|
| Other means of    | : Not available. |
| identification    |                  |

| CAS number/other identifiers |   |                 |
|------------------------------|---|-----------------|
| CAS number                   | : | Not applicable. |
| EC number                    | : | Mixture.        |
| Product code                 | ÷ | 20200           |

.....

| Ingredient name                                   | %         | CAS number |
|---|-----------|------------|
| xylene  | ≥10 - <22 | 1330-20-7  |
| butan-1-ol  | ≥10 - <20 | 71-36-3    |
| epoxy resin (MW ≤ 700)                            | ≥10 - ≤17 | 1675-54-3  |
| ethylbenzene                                      | <10       | 100-41-4   |
| phenol, polymer with formaldehyde, glycidyl ether | ≤5        | 28064-14-4 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

#### Description of necessary first aid measures

| Eye contact  | : Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.  |
|--------------|---|
| Inhalation   | : Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Skin contact | : Get medical attention immediately. Call a poison center or physician. Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.  |

## Section 4. First aid measures

| Ingestion | : Get medical attention immediately. Call a poison center or physician. Wash out<br>mouth with water. Remove dentures if any. Remove victim to fresh air and keep at<br>rest in a position comfortable for breathing. If material has been swallowed and the<br>exposed person is conscious, give small quantities of water to drink. Stop if the<br>exposed person feels sick as vomiting may be dangerous. Do not induce vomiting<br>unless directed to do so by medical personnel. If vomiting occurs, the head should<br>be kept low so that vomit does not enter the lungs. Chemical burns must be treated<br>promptly by a physician. Never give anything by mouth to an unconscious person.<br>If unconscious, place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband. |
|-----------|--|
|           |  |

#### Most important symptoms/effects, acute and delayed

| moor important of inpromov  |   |
|-----------------------------|---|
| Potential acute health effe | <u>cts</u>  |
| Eye contact                 | : Causes serious eye damage.  |
| Inhalation                  | : May cause respiratory irritation.   |
| Skin contact                | : Causes skin irritation. May cause an allergic skin reaction.  |
| Ingestion                   | : May be harmful if swallowed.  |
| Over-exposure signs/sym     | <u>otoms</u>  |
| Eye contact                 | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness  |
| Inhalation                  | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing   |
| Skin contact                | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur  |
| Ingestion                   | : Adverse symptoms may include the following: stomach pains   |
| Indication of immediate me  | lical attention and special treatment needed, if necessary  |
| Notes to physician          | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>   |
| Specific treatments         | : No specific treatment.  |
| Protection of first-aiders  | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

## Section 5. Firefighting measures

| Extinguishing media            |  |
|--------------------------------|--|
| Suitable extinguishing media   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam. |
| Unsuitable extinguishing media | : Do not use water jet.  |

## Section 5. Firefighting measures

| J   | 5  |
|---|--|
| Specific hazards arising from the chemical        | : Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is harmful to aquatic life with long<br>lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products          | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>sulfur oxides<br>metal oxide/oxides  |
| Special protective actions for fire-fighters      | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

## Section 6. Accidental release measures

| Personal precautions, protect  | tiv  | e equipment and emergency procedures  |
|--------------------------------|------|---|
| For non-emergency<br>personnel | :    | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Do not breathe vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.   |
| For emergency responders       | -    | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions      | :    | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful<br>to the environment if released in large quantities.   |
| Methods and material for con   | Itai | inment and cleaning up  |
| Small spill                    | :    | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
| Large spill                    | :    | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spill product. Note: see Section 1 for |

emergency contact information and Section 13 for waste disposal.

## Section 7. Handling and storage

| Precautions for safe handling                                      |  |   |
|--|--|---|
| Protective measures  | histe<br>whie<br>vap<br>ade<br>Do<br>in th<br>kep<br>flam<br>light | on appropriate personal protective equipment (see Section 8). Persons with a<br>bry of skin sensitization problems should not be employed in any process in<br>ch this product is used. Do not get in eyes or on skin or clothing. Do not breathe<br>our or mist. Do not ingest. Avoid release to the environment. Use only with<br>quate ventilation. Wear appropriate respirator when ventilation is inadequate.<br>not enter storage areas and confined spaces unless adequately ventilated. Keep<br>he original container or an approved alternative made from a compatible material,<br>t tightly closed when not in use. Store and use away from heat, sparks, open<br>he or any other ignition source. Use explosion-proof electrical (ventilating,<br>ting and material handling) equipment. Use only non-sparking tools. Take<br>cautionary measures against electrostatic discharges. Empty containers retain<br>duct residue and can be hazardous. Do not reuse container. |
| Advice on general occupational hygiene                             | han<br>eati<br>equ   | ng, drinking and smoking should be prohibited in areas where this material is<br>dled, stored and processed. Workers should wash hands and face before<br>ng, drinking and smoking. Remove contaminated clothing and protective<br>ipment before entering eating areas. See also Section 8 for additional<br>rmation on hygiene measures.   |
| Conditions for safe storage,<br>including any<br>incompatibilities | area<br>ven<br>drin<br>mat<br>that<br>leak<br>avo                  | re in accordance with local regulations. Store in a segregated and approved<br>a. Store in original container protected from direct sunlight in a dry, cool and well-<br>tilated area, away from incompatible materials (see Section 10) and food and<br>k. Store locked up. Eliminate all ignition sources. Separate from oxidising<br>erials. Keep container tightly closed and sealed until ready for use. Containers<br>have been opened must be carefully resealed and kept upright to prevent<br>tage. Do not store in unlabelled containers. Use appropriate containment to<br>id environmental contamination. See Section 10 for incompatible materials<br>ore handling or use.   |

## Section 8. Exposure controls/personal protection

#### **Control parameters**

**Occupational exposure limits** 

| Ingredient name | Exposure limits                         |  |  |
|-----------------|---|--|--|
| xylene          | ACGIH TLV (United States, 1/2021).      |  |  |
|                 | STEL: 651 mg/m <sup>3</sup> 15 minutes. |  |  |
|                 | STEL: 150 ppm 15 minutes.               |  |  |
|                 | TWA: 434 mg/m <sup>3</sup> 8 hours.     |  |  |
|                 | TWA: 100 ppm 8 hours.                   |  |  |
| butan-1-ol      | ACGIH TLV (United States, 1/2021).      |  |  |
|                 | TWA: 20 ppm 8 hours.                    |  |  |
| ethylbenzene    | ACGIH TLV (United States, 1/2021).      |  |  |
|                 | Notes: K                                |  |  |
|                 | TWA: 20 ppm 8 hours. Form:              |  |  |

| Appropriate engineering controls | : | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment. |
|----------------------------------|---|--|
| Environmental exposure controls  | : | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.  |

#### **Individual protection measures**

## Section 8. Exposure controls/personal protection

| •                      |   |  |  |
|------------------------|---|--|--|
| Hygiene measures       | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.  |  |  |
| Eye/face protection    | : Safety eyewear complying to EN 166 should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/ or face shield. If inhalation hazards exist, a full-face respirator may be required instead.   |  |  |
| Skin protection        |   |  |  |
| Hand protection        | <ul> <li>There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals. The breakthrough time must be greater than the end use time of the product. The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed. Gloves should be replaced regularly and if there is any sign of damage to the glove material. Always ensure that gloves are free from defects and that they are stored and used correctly. The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance. Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.</li> <li>Wear suitable gloves tested to EN374. Not recommended, gloves(breakthrough time) &lt; 1 hour: PE May be used, gloves(breakthrough time) 4 - 8 hours: Viton®, Barricade, CPF 3, Responder, neoprene, butyl rubber, PVC Recommended, gloves(breakthrough time) &gt; 8 hours: nitrile rubber, 4H, Teflon, polyvinyl alcohol (PVA)</li> </ul> |  |  |
| Body protection        | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.   |  |  |
| Other skin protection  | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |  |  |
| Respiratory protection | : If workers are exposed to concentrations above the exposure limit, they must use a respirator according to EN 140. Use respiratory mask with charcoal and dust filter when spraying this product, according to EN 14387(as filter combination A2-P2). In confined spaces, use compressed-air or fresh-air respiratory equipment. When use of roller or brush, consider use of charcoalfilter.   |  |  |

# Section 9. Physical and chemical properties

| Date of issue/Date of revision | : 14.10.2021 Date of previous issue : No previous validation Version : 1 6/12            |  |  |  |  |
|--------------------------------|--|--|--|--|--|
| Flash point                    | : Closed cup: 24°C (75.2°F)  |  |  |  |  |
| Boiling point                  | : Lowest known value: 119°C (246.2°F) (butan-1-ol). Weighted average: 164.89°C (328.8°F) |  |  |  |  |
| Melting point                  | : Not applicable.  |  |  |  |  |
| рН                             | : Not applicable.  |  |  |  |  |
| Odour threshold                | : Not applicable.  |  |  |  |  |
| Odour                          | : Characteristic.  |  |  |  |  |
| Colour                         | : Yellowish-brown.   |  |  |  |  |
| Physical state                 | : Liquid.  |  |  |  |  |
| <u>Appearance</u>              |  |  |  |  |  |

## Section 9. Physical and chemical properties

| Evaporation rate                             | : | Highest known value: 0.84 (ethylbenzene) Weighted average: 0.69compared with butyl acetate                              |
|--|---|---|
| Flammability (solid, gas)                    | : | Not applicable.   |
| Lower and upper explosive (flammable) limits | : | 0.8 - 11.3%   |
| Vapour pressure                              | : | Highest known value: 1.2 kPa (9.3 mm Hg) (at 20°C) (ethylbenzene). Weighted<br>average: 0.75 kPa (5.63 mm Hg) (at 20°C) |
| Vapour density                               | : | Highest known value: 11.7 (Air = 1) (epoxy resin (MW $\leq$ 700)). Weighted average: 5.19 (Air = 1)                     |
| Density                                      | : | 1.361 to 1.39 g/cm <sup>3</sup>   |
| Solubility                                   | : | Insoluble in the following materials: cold water and hot water.   |
| Partition coefficient: n-<br>octanol/water   | : | Not available.  |
| Auto-ignition temperature                    | : | Lowest known value: 355°C (671°F) (butan-1-ol).   |
| Decomposition temperature                    | : | Not available.  |
| Viscosity                                    | : | Kinematic (40°C): >0.205 cm²/s (>20.5 cSt)  |

# Section 10. Stability and reactivity

| Reactivity                            | : No specific test data related to reactivity available for this product or its ingredients.  |
|---------------------------------------|---|
| Chemical stability                    | : The product is stable.  |
| Possibility of hazardous<br>reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                   | : Avoid all possible sources of ignition (spark or flame). Do not pressurise, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. |
| Incompatible materials                | : Reactive or incompatible with the following materials:<br>oxidising materials   |
| Hazardous decomposition<br>products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |

## Section 11. Toxicological information

#### Information on toxicological effects

Acute toxicity

| Result                 | Species  | Dose   | Exposure  |
|------------------------|--|--|---|
| LC50 Inhalation Vapour | Rat  | 20 mg/l  | 4 hours   |
| LD50 Oral              | Rat  | 4300 mg/kg   | -   |
| TDLo Dermal            | Rabbit   | 4300 mg/kg   | -   |
| LD50 Oral              | Rat  | 790 mg/kg  | -   |
| LD50 Dermal            | Rabbit   | 20 g/kg  | -   |
| LD50 Oral              | Mouse  | 15600 mg/kg  | -   |
| LC50 Inhalation Vapour | Rat - Male   | 17.8 mg/l  | 4 hours   |

#### Mobility in soil

Soil/water partition coefficient (Koc)

: Not available.

```
Other adverse effects
```

: No known significant effects or critical hazards.

## Section 13. Disposal considerations

**Disposal methods** 

: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
