

# SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product identifier           |                     |
|----------------------------------|---------------------|
| Product name                     | : Pilot WF Primer   |
| Product code                     | : 28780             |
| Product description              | : Waterborne paint. |
| Product type                     | : Liquid.           |
| Other means of<br>identification | : Not available.    |

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Use in coatings - Industrial use Use in coatings - Professional use

#### 1.3 Details of the supplier of the safety data sheet

Jotun A/S P.O.Box 2021 3202 Sandefjord Norway

Tel: + 47 33 45 70 00 Fax: +47 33 45 72 42 E-mail: SDSJotun@jotun.no

#### National contact

Jotun Ibérica S.A. **Poligon Industrial** Santa Rita Calle Estàtica, no 3 08755 - Castellbisbal Barcelona

Tel: +34 93 771 18 00 Fax: +34 93 771 18 01 SDSJotun@jotun.com

#### 1.4 Emergency telephone number

Jotun Ibérica S.A. Tel. +34 93 77 11 800 (8.00-17.00)

# **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

**Product definition** 

#### : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Aquatic Chronic 2, H411

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

# **SECTION 2: Hazards identification**

| Hazard pictograms   | :   | ¥2  |
|---|-----|---|
| Signal word   |     | No signal word.   |
| Hazard statements   |     | H411 - Toxic to aquatic life with long lasting effects.   |
| Precautionary statements  | 1   | THE T - TOXIC to aquatic me with ong lasting enects.  |
| General   | ۰.  | Not applicable.   |
| Prevention  |     | P273 - Avoid release to the environment.  |
| Response  |     | P391 - Collect spillage.  |
| Storage   |     | Not applicable.   |
| Disposal  |     | P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Supplemental label elements   | :   | EUH208 - Contains C(M)IT/MIT (3:1). May produce an allergic reaction.<br>EUH211 - Warning! Hazardous respirable droplets may be formed when sprayed.<br>Do not breathe spray or mist. |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | :   | Not applicable.   |
| Special packaging requirem  | ner | ts  |
| Containers to be fitted<br>with child-resistant<br>fastenings   |     | Not applicable.   |
| Tactile warning of danger   | :   | Not applicable.   |
| 2.3 Other hazards   |     |   |
| Product meets the criteria<br>for PBT or vPvB according<br>to Regulation (EC) No.<br>1907/2006, Annex XIII  | :   | This mixture does not contain any substances that are assessed to be a PBT or a vPvB.   |
| Other hazards which do not result in classification   | :   | None known.   |

# **SECTION 3: Composition/information on ingredients**

| Product/ingredient name            | Identifiers  | %  | Classification                                      | Specific Conc.<br>Limits, M-factors<br>and ATEs | Туре |

|   |  |        | See Section 16 for<br>the full text of the H<br>statements declared<br>above.   |   |     |  |  |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

This mixture contains  $\ge 1\%$  of titanium dioxide. The Annex VI classification of titanium dioxide does not apply to this mixture according to Note 10.

Occupational exposure limits, if available, are listed in Section 8.

# **SECTION 4: First aid measures**

| 4.1 Description of first aid m | easures  |
|--------------------------------|--|
| General                        | : In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and seek medical advice.  |
| Eye contact                    | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the<br/>eyelids apart for at least 10 minutes and seek immediate medical advice.</li> </ul>                        |
| Inhalation                     | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by<br>trained personnel. |
| Skin contact                   | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and<br/>water or use recognised skin cleanser. Do NOT use solvents or thinners.</li> </ul>                             |
| Ingestion                      | <ul> <li>If swallowed, seek medical advice immediately and show the container or label.</li> <li>Keep person warm and at rest. Do NOT induce vomiting.</li> </ul>                                      |
| Protection of first-aiders     | : No action shall be taken involving any personal risk or without suitable training.   |

#### **SECTION 4: First aid measures**

4.2 Most important symptoms and effects, both acute and delayed

There are no data available on the mixture itself. The product is not classified as hazardous according to Regulation (EC) 1272/2008 as amended.

If splashed in the eyes, the liquid may cause irritation and reversible damage. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Contains C(M)IT/MIT (3:1). May produce an allergic reaction.

**Over-exposure signs/symptoms** 

| Eye contact  | : No specific data. |
|--------------|---------------------|
| Inhalation   | : No specific data. |
| Skin contact | : No specific data. |
| Ingestion    | : No specific data. |

#### 4.3 Indication of any immediate medical attention and special treatment needed

| Notes to physician  | : Treat symptomatically. Contact poison treatment specialist immediately if large |
|---------------------|---|
|                     | quantities have been ingested or inhaled.   |
| Specific treatments | : No specific treatment.  |

See toxicological information (Section 11)

#### **SECTION 5: Firefighting measures**

| 5.1 Extinguishing media                        |     |   |
|--|-----|---|
| Suitable extinguishing media                   | :   | Recommended: alcohol-resistant foam, CO <sub>2</sub> , powders, water spray.  |
| Unsuitable extinguishing media                 | :   | Do not use water jet.   |
| 5.2 Special hazards arising f                  | rom | the substance or mixture  |
| Hazards from the substance or mixture          | :   | Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard.                      |
| Hazardous combustion<br>products               | :   | Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen. |
| 5.3 Advice for firefighters                    |     |   |
| Special protective actions for fire-fighters   | :   | Cool closed containers exposed to fire with water. Do not release runoff from fire to drains or watercourses.           |
| Special protective equipment for fire-fighters | :   | Appropriate breathing apparatus may be required.  |

# **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro  | ote | ctive equipment and emergenc  | y procedures             |                    |           |      |
|--------------------------------|-----|---|--------------------------|--------------------|-----------|------|
| For non-emergency<br>personnel | :   | Avoid breathing vapour or mist. and 8.  | Refer to protective meas | sures listed in se | ections 7 | 7    |
| For emergency responders       | :   | If specialised clothing is required<br>information in Section 8 on suita<br>information in "For non-emerger | ble and unsuitable mater |                    |           |      |
| 6.2 Environmental precautions  | :   | Do not allow to enter drains or w<br>rivers, or sewers, inform the app<br>regulations.                      |                          |                    |           |      |
| Date of issue/Date of revision |     | : 29.03.2023 Date of previous issue   | e : 28.03.2023           | Version            | : 1.02    | 4/16 |

# **SECTION 6: Accidental release measures**

| 6.3 Methods and material<br>for containment and<br>cleaning up | : Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Preferably clean with a detergent. Avoid using solvents. |
|--|---|
| 6.4 Reference to other sections                                | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.   |
|  |   |

# **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

Avoid contact with skin and eyes. Avoid inhalation of vapour, spray or mist. Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Put on appropriate personal protective equipment (see Section 8). Never use pressure to empty. Container is not a pressure vessel. Always keep in containers made from the same material as the original one. Comply with the health and safety at work laws. Do not allow to enter drains or watercourses.

When operators, whether spraying or not, have to work inside the spray booth, ventilation is unlikely to be sufficient to control particulates and solvent vapour in all cases. In such circumstances they should wear a compressed air-fed respirator during the spraying process and until such time as the particulates and solvent vapour concentration has fallen below the exposure limits.

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations.

Notes on joint storage

Keep away from: oxidising agents, strong alkalis, strong acids.

#### Additional information on storage conditions

Store in a dry, cool and well-ventilated area. Keep container tightly closed.

No smoking. Prevent unauthorised access. Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

#### Seveso Directive - Reporting thresholds

#### Danger criteria

| ( |    | Notification and MAPP threshold | Safety report threshold |
|---|----|---------------------------------|-------------------------|
|   | E2 | 200 tonne                       | 500 tonne               |

See Technical Data Sheet / packaging for further information.

#### 7.3 Specific end use(s)

| Recommendations            | : Not available. |
|----------------------------|------------------|
| Industrial sector specific | : Not available. |
| solutions                  |                  |

# **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

#### 8.1 Control parameters

#### **Occupational exposure limits**

| Product/ingredient name   | Exposure limit values  |  |  |
|---|--|--|--|
| dipropylene glycol methyl ether   | National institute of occupational safety and health (Spain,<br>4/2021). Absorbed through skin.<br>TWA: 308 mg/m <sup>3</sup> 8 hours.<br>TWA: 50 ppm 8 hours.   |  |  |

#### 8.2 Exposure controls

Appropriate engineering controls : Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction.

Individual protection measures

| Hygiene measures    | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location. |
|---------------------|---|
| Eye/face protection | : Safety eyewear complying to ISO 16321-1:2022 should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.   |

#### **Skin protection**

#### Hand protection

There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals.

The breakthrough time must be greater than the end use time of the product.

The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed.

Gloves should be replaced regularly and if there is any sign of damage to the glove material.

Always ensure that gloves are free from defects and that they are stored and used correctly.

The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance.

Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.

#### <u>Gloves</u>

Wear suitable gloves tested to ISO 374-1:2016.

Recommended, gloves(breakthrough time) > 8 hours: neoprene (> 0.35 mm), butyl rubber (> 0.4 mm), PVC (> 0.5 mm), fluor rubber (> 0.35 mm), polyvinyl alcohol (PVA) (> 0.3 mm), nitrile rubber (> 0.4 mm)

For right choice of glove materials, with focus on chemical resistance and time of penetration, seek advice by the supplier of chemical resistant gloves.

The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment.

| Body protection       | : Not applicable.   |
|-----------------------|---|
| Other skin protection | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |

# **SECTION 8: Exposure controls/personal protection**

| Respiratory protection          | : If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits. By spraying : particulate filter (FFP2 / N95). In confined spaces, use compressed-air or fresh-air respiratory equipment. |
|---------------------------------|---|
| Environmental exposure controls | : Do not allow to enter drains or watercourses.   |

# **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

# 9.1 Information on basic physical and chemical properties <u>Appearance</u> Physical state

#### 9.2 Other information

No additional information.

## **SECTION 10: Stability and reactivity**

| 10.1 Reactivity                            | : No specific test data related to reactivity available for this product or its ingredients. |
|--|--|
| 10.2 Chemical stability                    | : Stable under recommended storage and handling conditions (see Section 7).                  |
| 10.3 Possibility of<br>hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.            |
| 10.4 Conditions to avoid                   | : When exposed to high temperatures may produce hazardous decomposition products.            |

Date of issue/Date of revision

# **SECTION 10: Stability and reactivity**

| 10.5 Incompatible materials              | 1 | Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids. |
|--|---|--|
| 10.6 Hazardous<br>decomposition products | 1 | Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.        |

# **SECTION 11: Toxicological information**

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

There are no data available on the mixture itself. The product is not classified as hazardous according to Regulation (EC) 1272/2008 as amended.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Contains C(M)IT/MIT (3:1). May produce an allergic reaction.

#### Acute toxicity

| Product/ingredient name | Result    | Species | Dose     | Exposure |
|-------------------------|-----------|---------|----------|----------|
| C(M)IT/MIT (3:1)        | LD50 Oral | Rat     | 53 mg/kg | -        |

#### **Sensitisation**

| Product/ingredient name | Route of exposure | Species                         | Result      |
|-------------------------|-------------------|---------------------------------|-------------|
| C(M)IT/MIT (3:1)        | skin              | Mammal - species<br>unspecified | Sensitising |

#### **Mutagenicity**

No known significant effects or critical hazards.

#### **Carcinogenicity**

No known significant effects or critical hazards.

#### Reproductive toxicity

**Developmental effects** : No known significant effects or critical hazards.

Date of issue/Date of revision

## **SECTION 11: Toxicological information**

#### Fertility effects

: No known significant effects or critical hazards.

#### **Teratogenicity**

No known significant effects or critical hazards.

Specific target organ toxicity (single exposure)

Based on available data, the classification criteria are not met.

#### Specific target organ toxicity (repeated exposure)

Based on available data, the classification criteria are not met.

#### Aspiration hazard

Based on available data, the classification criteria are not met.

#### 11.2 Information on other hazards

**11.2.1 Endocrine disrupting properties** 

Not available.

#### 11.2.2 Other information

Not available.

# **SECTION 12: Ecological information**

#### 12.1 Toxicity

There are no data available on the mixture itself. Do not allow to enter drains or watercourses.

The mixture has been assessed following the summation method of the CLP Regulation (EC) No 1272/2008 and is classified for eco-toxicological properties accordingly. See Sections 2 and 3 for details.

| Product/ingredient name     | Result                             | Species                      | Exposure |
|-----------------------------|------------------------------------|------------------------------|----------|
| trizinc bis(orthophosphate) | Acute LC50 0.14 mg/l               | Fish - Oncorhynchus mykiss   | 96 hours |
|                             | Chronic NOEC 0.1 mg/l              | Micro-organism               | 4 hours  |
| zinc oxide                  | Acute LC50 1.1 ppm Fresh water     | Fish - Oncorhynchus mykiss   | 96 hours |
|                             | Chronic NOEC 0.02 mg/l Fresh water | Algae - Pseudokirchneriella  | 72 hours |
|                             |                                    | subcapitata - Exponential    |          |
|                             |                                    | growth phase                 |          |
| sodium nitrite              | Acute LC50 0.54 mg/l               | Fish                         | 96 hours |
| C(M)IT/MIT (3:1)            | Acute EC50 0.048 mg/l              | Algae - Pseudokirchneriella  | 72 hours |

# **SECTION 12: Ecological information**

#### **12.3 Bioaccumulative potential**

| Product/ingredient name     | LogPow | BCF   | Potential |
|-----------------------------|--------|-------|-----------|
| trizinc bis(orthophosphate) | -      | 60960 | high      |
| dipropylene glycol methyl   | 0.004  | -     |           |
| ether<br>zinc oxide         | -      | 28960 | high      |
| sodium nitrite              | -3.7   | -     | low       |
| C(M)IT/MIT (3:1)            | -      | 3.16  | low       |

| 12.4 Mobility in soil                               |                  |
|---|------------------|
| Soil/water partition coefficient (K <sub>oc</sub> ) | : Not available. |
| Mobility  | : Not available. |

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

#### 12.6 Endocrine disrupting properties

Not available.

#### 12.7 Other adverse effects

No known significant effects or critical hazards.

## **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

| Product                 |   |
|-------------------------|---|
| Methods of disposal     | : The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation and<br>any regional local authority requirements. Dispose of surplus and non-recyclable<br>products via a licensed waste disposal contractor. Waste should not be disposed of<br>untreated to the sewer unless fully compliant with the requirements of all authorities<br>with jurisdiction. |
| Hazardous waste         | : Yes.  |
| Disposal considerations | <ul> <li>Do not allow to enter drains or watercourses.</li> <li>Dispose of according to all federal, state and local applicable regulations.</li> <li>If this product is mixed with other wastes, the original waste product code may no longer apply and the appropriate code should be assigned.</li> <li>For further information, contact your local waste authority.</li> </ul>   |

#### European waste catalogue (EWC)

The European Waste Catalogue classification of this product, when disposed of as waste, is:

| Waste code          | Waste designation  |
|---------------------|--|
| 08 01 11*           | Waste paint and varnish containing organic solvents or other dangerous substances  |
| Packaging           |  |
| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. |

# SECTION 13: Disposal considerations Disposal considerations : Using information provided in this safety data sheet, advice should be obtained from the relevant waste authority on the classification of empty containers. Empty containers must be scrapped or reconditioned. Dispose of containers contaminated by the product in accordance with local or national legal provisions. Type of packaging European waste catalogue (EWC) CEPE Guidelines 15 01 10\* packaging containing residues of or contaminated by hazardous substances Special precautions : This material and its container must be disposed of in a safe way. Care should be

: This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

# **SECTION 14: Transport information**

|                                    | ADR/RID   | ADN   | IMDG   | ΙΑΤΑ  |  |
