# Megafiller Smooth Comp B

| Section 1. Identification     |  |
|-------------------------------|--|
| Product name                  | : Megafiller Smooth Comp B   |
| Product code                  | : 2907   |
| Product description           | : Hardener. Putty.   |
| Product type                  | : Solid.   |
| Other means of identification | : Not available.   |
| Supplier's details            | : Jotun Paints Qatar W.L.L<br>P.O.Box : 24373<br>1st Floor, Tanween Building<br>C-ring road<br>Doha<br>Qatar |
|                               | Telephone : (+974) 44412728<br>Fax : (+974) 44415608   |
|                               | SDSJotun@jotun.com   |
| Emergency telephone<br>number | : +47 33 45 70 00 Jotun Norway (head office)   |

# Section 2. Hazards identification

| Classification of the substance or mixture | : SKIN CORROSION/IRRITATION - Category 2<br>SERIOUS EYE DAMAGE/EYE IRRITATION - Category 1<br>SKIN SENSITISATION - Category 1<br>LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 3  |
|--|---|
| GHS label elements                         |   |
| Hazard pictograms                          |   |
| Signal word                                | : Danger.   |
| Hazard statements                          | <ul> <li>H315 - Causes skin irritation.</li> <li>H317 - May cause an allergic skin reaction.</li> <li>H318 - Causes serious eye damage.</li> <li>H412 - Harmful to aquatic life with long lasting effects.</li> </ul>   |
| Precautionary stateme                      | nts   |
| Prevention                                 | <ul> <li>P280 - Wear protective gloves. Wear eye or face protection.</li> <li>P273 - Avoid release to the environment.</li> <li>P261 - Avoid breathing dust.</li> </ul>   |
| Response                                   | <ul> <li>P362 + P364 - Take off contaminated clothing and wash it before reuse.</li> <li>P302 + P352 - IF ON SKIN: Wash with plenty of water.</li> <li>P333 + P313 - If skin irritation or rash occurs: Get medical advice or attention.</li> <li>P305 + P351 + P338, P310 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>Immediately call a POISON CENTER or doctor.</li> </ul> |

## Section 2. Hazards identification

| Storage  | : Not applicable.  |
|----------|--|
| Disposal | : P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations. |

Other hazards which do not : None known. result in classification

## Section 3. Composition/information on ingredients

| Substance/mixture | : Mixture        |
|-------------------|------------------|
| Other means of    | : Not available. |
| identification    |                  |

| CAS number/other identifiers |   |                 |
|------------------------------|---|-----------------|
| CAS number                   | : | Not applicable. |
| EC number                    | : | Mixture.        |
| Product code                 | : | 2907            |

## 

| Ingredient name   | %    | CAS number  |
|---|------|-------------|
| benzyl alcohol  | ≤14  | 100-51-6    |
| fatty acids, c18-unsatd., dimers, polymers with tall-oil fatty acids and triethylenetetramine                         | ≤10  | 68082-29-1  |
| fatty acids, C18-unsatd., dimers, polymers with tall-oil fatty acids, tetraethylenepentamine and triethylenetetramine | ≤10  | 68071-65-8  |
| amides, from tall-oil fatty acids and tetraethylenepentamine  | ≤3   | 68155-17-9  |
| formaldehyde, polymer with benzenamine, hydrogenated  | ≤1.9 | 135108-88-2 |
| 2,4,6-tris(dimethylaminomethyl)phenol   | ≤1.6 | 90-72-2     |
| amines, polyethylenepoly-, triethylenetetramine fraction  | ≤1.4 | 90640-67-8  |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

### **Description of necessary first aid measures**

| Eye contact  | : Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.  |
|--------------|---|
| Inhalation   | : Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Skin contact | : Get medical attention immediately. Call a poison center or physician. Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.  |

## Section 4. First aid measures

| Ingestion                   | : Get medical attention immediately. Call a poison center or physician. Wash out<br>mouth with water. Remove dentures if any. If material has been swallowed and the<br>exposed person is conscious, give small quantities of water to drink. Stop if the<br>exposed person feels sick as vomiting may be dangerous. Do not induce vomiting<br>unless directed to do so by medical personnel. If vomiting occurs, the head should<br>be kept low so that vomit does not enter the lungs. Chemical burns must be treated<br>promptly by a physician. Never give anything by mouth to an unconscious person.<br>If unconscious, place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband. |
|-----------------------------|--|
| Most important symptoms/e   |  |
| Potential acute health effe | <u>cts</u>   |
| Eye contact                 | : Causes serious eye damage.   |
| Inhalation                  | : No known significant effects or critical hazards.  |
| Skin contact                | : Causes skin irritation. May cause an allergic skin reaction.   |
| Ingestion                   | : No known significant effects or critical hazards.  |
| Over-exposure signs/symp    | <u>ptoms</u>   |
| Eye contact                 | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness   |
| Inhalation                  | : No specific data.  |
| Skin contact                | Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur   |
| Ingestion                   | : Adverse symptoms may include the following: stomach pains  |
| Indication of immediate me  | dical attention and special treatment needed, if necessary   |
| Notes to physician          | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.   |
| Specific treatments         | : No specific treatment.   |
| Protection of first-aiders  | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.  |

See toxicological information (Section 11)

## Section 5. Firefighting measures

| Extinguishing media                        |   |
|--|---|
| Suitable extinguishing media               | : Use an extinguishing agent suitable for the surrounding fire.   |
| Unsuitable extinguishing media             | : None known.   |
| Specific hazards arising from the chemical | : This material is harmful to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |

## Section 5. Firefighting measures

| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides<br>metal oxide/oxides   |
|--|---|
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.   |
| Special protective equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul> |

## Section 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Provide adequate ventilation.<br>Wear appropriate respirator when ventilation is inadequate. Put on appropriate<br>personal protective equipment. |
|--------------------------------|-----|---|
| For emergency responders       | :   | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions      | :   | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful<br>to the environment if released in large quantities.   |
| Methods and material for cor   | Ita | inment and cleaning up  |
| Small spill                    | 1   | Move containers from spill area. Avoid dust generation. Using a vacuum with   |

| Small spill | : Move containers from spill area. Avoid dust generation. Using a vacuum with<br>HEPA filter will reduce dust dispersal. Place spilled material in a designated,<br>labeled waste container. Dispose of via a licensed waste disposal contractor.   |
|-------------|---|
| Large spill | : Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a HEPA filter and place in a closed, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

# Section 7. Handling and storage

## Precautions for safe handling

| Protective measures                    | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid release to the environment. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|--|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |

## Section 7. Handling and storage

| Conditions for safe storage, | : Store in accordance with local regulations. Store in original container protected  |
|------------------------------|--|
| including any                | from direct sunlight in a dry, cool and well-ventilated area, away from incompatible |
| incompatibilities            | materials (see Section 10) and food and drink. Store locked up. Keep container       |
|                              | tightly closed and sealed until ready for use. Containers that have been opened      |
|                              | must be carefully resealed and kept upright to prevent leakage. Do not store in      |
|                              | unlabelled containers. Use appropriate containment to avoid environmental            |
|                              | contamination. See Section 10 for incompatible materials before handling or use      |

## Section 8. Exposure controls/personal protection

### **Control parameters**

| Occupational | ovnosuro | limite |
|--------------|----------|--------|
| Occupational | exposure | 111115 |

None.

| Appropriate engineering controls | : If user operations generate dust, fumes, gas, vapour or mist, use process<br>enclosures, local exhaust ventilation or other engineering controls to keep worker<br>exposure to airborne contaminants below any recommended or statutory limits.   |
|----------------------------------|---|
| Environmental exposure controls  | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels. |

#### **Individual protection measures**

| individual protection mea |  |
|---------------------------|--|
| Hygiene measures          | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.  |
| Eye/face protection       | : Safety eyewear complying to EN 166 should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/ or face shield. If inhalation hazards exist, a full-face respirator may be required instead.  |
| Skin protection           |  |
| Hand protection           | <ul> <li>There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals.<br/>The breakthrough time must be greater than the end use time of the product.<br/>The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed.<br/>Gloves should be replaced regularly and if there is any sign of damage to the glove material.<br/>Always ensure that gloves are free from defects and that they are stored and used correctly.<br/>The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance.<br/>Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.<br/>Wear suitable gloves tested to EN374.<br/>May be used, gloves(breakthrough time) 4 - 8 hours: polyvinyl alcohol (PVA), PVC, nitrile rubber<br/>Recommended, gloves(breakthrough time) &gt; 8 hours: Viton®, 4H, neoprene, butyl rubber</li> </ul> |
| Body protection           | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |

## Section 8. Exposure controls/personal protection

| Other skin protection  | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
|------------------------|---|
| Respiratory protection | : If workers are exposed to concentrations above the exposure limit, they must use a respirator according to EN 140. Use respiratory mask with charcoal and dust filter when spraying this product, according to EN 14387(as filter combination A2-P2). In confined spaces, use compressed-air or fresh-air respiratory equipment. When use of roller or brush, consider use of charcoalfilter. |

## Section 9. Physical and chemical properties

| Appearance                                   |   |
|--|---|
| Physical state                               | : Solid. [Paste.]   |
| Colour                                       | : Orange [Light]  |
| Odour  | : Characteristic.   |
| Odour threshold                              | : Not applicable.   |
| рН   | : Not applicable.   |
| Melting point                                | : Not applicable.   |
| Boiling point                                | : Not available.  |
| Flash point                                  | : Closed cup: 105°C (221°F) [Setaflash]                           |
| Evaporation rate                             | : Not available.  |
| Flammability (solid, gas)                    | : Not applicable.   |
| Lower and upper explosive (flammable) limits | : 1.3 - 13%   |
| Vapour pressure                              | : Not available.  |
| Vapour density                               | : Not available.  |
| Density                                      | : 1.688 g/cm <sup>3</sup>   |
| Solubility                                   | : Insoluble in the following materials: cold water and hot water. |
| Partition coefficient: n-<br>octanol/water   | : Not available.  |
| Auto-ignition temperature                    | : Not available.  |
| Decomposition temperature                    | : Not available.  |
| Viscosity                                    | : Kinematic (40°C): >20.5 mm²/s (>20.5 cSt)                       |
|  |   |

# Section 10. Stability and reactivity

| : | No specific test data related to reactivity available for this product or its ingredients.           |
|---|--|
| : | The product is stable.   |
| ; | Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| : | No specific data.  |
| : | No specific data.  |
| : | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |
|   |  |

## Section 11. Toxicological information

### **Developmental effects**

- : No known significant effects or critical hazards.
- Fertility effects
- : No known significant effects or critical hazards.

### Numerical measures of toxicity

### Acute toxicity estimates

| Route  | ATE value                                      |
|--------|--|
| Dermal | 5971.96 mg/kg<br>121629.57 mg/kg<br>93.68 mg/l |

## Section 12. Ecological information

### **Toxicity**

| Product/ingredient name                                     | Result               | Species | Exposure |
|---|----------------------|---------|----------|
| amines, polyethylenepoly-,<br>triethylenetetramine fraction | Acute EC50 20 mg/l   | Algae   | 72 hours |
|   | Acute EC50 31.1 mg/l | Daphnia | 48 hours |
|   | Acute LC50 330 mg/l  | Fish    | 96 hours |

### Persistence and degradability

| Product/ingredient name   | Aquatic half-life | Photolysis | Biodegradability       |
|---|-------------------|------------|------------------------|
| benzyl alcohol<br>amines, polyethylenepoly-,<br>triethylenetetramine fraction | -                 |            | Readily<br>Not readily |

### **Bioaccumulative potential**

| Product/ingredient name                                     | LogPow | BCF        | Potential |
|---|--------|------------|-----------|
| benzyl alcohol  | 0.87   | <100       | low       |
| formaldehyde, polymer with benzenamine, hydrogenated        | -      | 209 to 219 | low       |
| 2,4,6-tris<br>(dimethylaminomethyl)phenol                   | 0.219  | -          | low       |
| amines, polyethylenepoly-,<br>triethylenetetramine fraction | -2.65  | -          | low       |

### **Mobility in soil**

Soil/water partition : Not available. coefficient (Koc)

#### Other adverse effects

: No known significant effects or critical hazards.

## Section 13. Disposal considerations

| Disposal methods | : The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation<br>and any regional local authority requirements. Dispose of surplus and non-<br>recyclable products via a licensed waste disposal contractor. Waste should not be<br>disposed of untreated to the sewer unless fully compliant with the requirements of<br>all authorities with jurisdiction. Waste packaging should be recycled. Incineration or<br>landfill should only be considered when recycling is not feasible. This material and<br>its container must be disposed of in a safe way. Care should be taken when<br>handling emptied containers that have not been cleaned or rinsed out. Empty |
|------------------|---|
|------------------|---|

## Section 13. Disposal considerations

containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

# Section 14. Transport information

|                               | ADR/RID        | IMDG           | ΙΑΤΑ           |
|-------------------------------|----------------|----------------|----------------|

| UN proper<br>shipping name    | -              | -              | -              |
| Transport hazard<br>class(es) | -              | -              | -              |
| Packing group                 | -              | -              | -              |
| Environmental<br>hazards      | No.            | No.            | No.            |
| Additional information        | -              | -              | -              |

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not available. to IMO instruments

# Section 15. Regulatory information

Safety, health and : No known specific national and/or regional regulations applicable to this product (including its ingredients).

## International regulations

Chemical Weapon Convention List Schedules I, II & III Chemicals Not listed.

### **Montreal Protocol**

Not listed.

### Stockholm Convention on Persistent Organic Pollutants Not listed.

### **UNECE Aarhus Protocol on POPs and Heavy Metals**

Not listed.
