Ranges if listed above for hazardous ingredient(s) are prescribed ranges. The actual concentration(s) or actual concentration range(s) are being withheld as a trade secret.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First-aid measures

| <b>Description of necessary firs</b> | t aid measures   |
|--------------------------------------|--|
| Eye contact                          | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.  |
| Inhalation                           | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If not breathing, if breathing is irregular or if respiratory arrest occurs, provide<br>artificial respiration or oxygen by trained personnel. It may be dangerous to the<br>person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If<br>unconscious, place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband.   |
| Skin contact                         | : Wash with plenty of soap and water. Remove contaminated clothing and shoes.<br>Wash contaminated clothing thoroughly with water before removing it, or wear<br>gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the<br>event of any complaints or symptoms, avoid further exposure. Wash clothing before<br>reuse. Clean shoes thoroughly before reuse.  |
| Ingestion                            | : Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

## Section 4. First-aid measures

| Most important symptoms/e    | ffects, acute and delayed   |
|------------------------------|---|
| Potential acute health effec | <u>ts</u>   |
| Eye contact                  | : Causes serious eye irritation.  |
| Inhalation                   | : No known significant effects or critical hazards.   |
| Skin contact                 | : Causes skin irritation. May cause an allergic skin reaction.  |
| Ingestion                    | : No known significant effects or critical hazards.   |
| Over-exposure signs/symp     | <u>toms</u>   |
| Eye contact                  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| Inhalation                   | : No specific data.   |
| Skin contact                 | : Adverse symptoms may include the following:<br>irritation<br>redness  |
| Ingestion                    | : No specific data.   |
| Indication of immediate med  | ical attention and special treatment needed, if necessary   |
| Notes to physician           | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>   |
| Specific treatments          | : No specific treatment.  |
| Protection of first-aiders   | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

| See toxicological | information (Section 11) |
|-------------------|--------------------------|
|-------------------|--------------------------|

# Section 5. Fire-fighting measures

| Extinguishing media                               |   |
|---|---|
| Suitable extinguishing media                      | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                    | : Do not use water jet.   |
| Specific hazards arising from the chemical        | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is harmful to aquatic life with long<br>lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products          | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>metal oxide/oxides  |
| Special protective actions for fire-fighters      | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |
|   |   |

## Section 6. Accidental release measures

| Personal precautions, protect  | tive equipment and emergency procedures  |
|--------------------------------|--|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.  |
| For emergency responders       | : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.   |
| Methods and materials for co   | ntainment and cleaning up  |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

## Section 7. Handling and storage

| Precautions for safe handling               |  |
|---|--|
| Protective measures :                       | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
| Advice on general :<br>occupational hygiene | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |

## Section 7. Handling and storage

| Conditions for safe storage,<br>including any<br>incompatibilities | : Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent |
|--|--|
|  |  |

## Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name     | Exposure limits  |
|---------------------|--|
| 2-methylpropan-1-ol | CA Alberta Provincial (Canada, 3/2023).<br>Skin sensitizer.<br>OEL: 152 mg/m <sup>3</sup> 8 hours.<br>OEL: 50 ppm 8 hours.<br>CA British Columbia Provincial (Canada,<br>8/2023).<br>TWA: 50 ppm 8 hours.<br>CA Ontario Provincial (Canada, 6/2019).<br>TWA: 50 ppm 8 hours.<br>CA Quebec Provincial (Canada, 7/2023).<br>TWAEV: 152 mg/m <sup>3</sup> 8 hours.<br>TWAEV: 152 mg/m <sup>3</sup> 8 hours.<br>TWAEV: 50 ppm 8 hours.<br>CA Saskatchewan Provincial (Canada,<br>7/2013).<br>STEL: 60 ppm 15 minutes.<br>TWA: 50 ppm 8 hours.  |
| ethylbenzene        | <ul> <li>CA Alberta Provincial (Canada, 3/2023).</li> <li>OEL: 100 ppm 8 hours.</li> <li>OEL: 434 mg/m<sup>3</sup> 8 hours.</li> <li>OEL: 543 mg/m<sup>3</sup> 15 minutes.</li> <li>OEL: 125 ppm 15 minutes.</li> <li>CA British Columbia Provincial (Canada, 8/2023).</li> <li>TWA: 20 ppm 8 hours.</li> <li>CA Ontario Provincial (Canada, 6/2019).</li> <li>TWA: 20 ppm 8 hours.</li> <li>CA Quebec Provincial (Canada, 7/2023).</li> <li>TWAEV: 20 ppm 8 hours.</li> <li>CA Saskatchewan Provincial (Canada, 7/2013).</li> <li>STEL: 125 ppm 15 minutes.</li> <li>TWA: 100 ppm 8 hours.</li> </ul> |

| Appropriate engineering controls | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment. |
|----------------------------------|---|
| Environmental exposure controls  | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |

#### Individual protection measures

| Date of issue         : 28.05.2024         6 | /13 |
|--|-----|
|--|-----|

# Section 8. Exposure controls/personal protection

| Hygiene measures       | ea<br>Aj<br>Co<br>co             | Vash hands, forearms and face thoroughly after handling chemical products, before<br>ating, smoking and using the lavatory and at the end of the working period.<br>ppropriate techniques should be used to remove potentially contaminated clothing.<br>contaminated work clothing should not be allowed out of the workplace. Wash<br>ontaminated clothing before reusing. Ensure that eyewash stations and safety<br>howers are close to the workstation location.  |
|------------------------|----------------------------------|--|
| Eye/face protection    | as<br>ga<br>ur                   | afety eyewear complying with an approved standard should be used when a risk<br>ssessment indicates this is necessary to avoid exposure to liquid splashes, mists,<br>ases or dusts. If contact is possible, the following protection should be worn,<br>nless the assessment indicates a higher degree of protection: chemical splash<br>oggles.  |
| Skin protection        |                                  |  |
| Hand protection        | be<br>th<br>ch<br>sh<br>di<br>se | chemical-resistant, impervious gloves complying with an approved standard should<br>e worn at all times when handling chemical products if a risk assessment indicates<br>his is necessary. Considering the parameters specified by the glove manufacturer,<br>heck during use that the gloves are still retaining their protective properties. It<br>hould be noted that the time to breakthrough for any glove material may be<br>ifferent for different glove manufacturers. In the case of mixtures, consisting of<br>everal substances, the protection time of the gloves cannot be accurately<br>stimated. |
|                        | re<br>TI<br>St<br>G<br>Al        | here is no one glove material or combination of materials that will give unlimited<br>esistance to any individual or combination of chemicals.<br>he breakthrough time must be greater than the end use time of the product.<br>he instructions and information provided by the glove manufacturer on use,<br>torage, maintenance and replacement must be followed.<br>sloves should be replaced regularly and if there is any sign of damage to the glove<br>material.<br>Iways ensure that gloves are free from defects and that they are stored and used<br>orrectly.   |
|                        | TI<br>da<br>Ba                   | he performance or effectiveness of the glove may be reduced by physical/chemical amage and poor maintenance.<br>arrier creams may help to protect the exposed areas of the skin but should not be pplied once exposure has occurred.   |
|                        | R<br>ru<br>N<br>M                | Vear suitable gloves tested to ISO 374-1:2016.<br>Lecommended, gloves(breakthrough time) > 8 hours: Viton® (> 0.7 mm), nitrile<br>Lubber (> 0.75 mm), 4H/Silver Shield® (> 0.07 mm), Teflon (> 0.35 mm)<br>lot recommended, gloves(breakthrough time) < 1 hour: PVC (> 0.5 mm)<br>lay be used, gloves(breakthrough time) 4 - 8 hours: neoprene (> 0.35 mm), butyl<br>Lubber (> 0.4 mm), polyvinyl alcohol (PVA) (> 0.3 mm)   |
| Body protection        | : U                              | se chemical-resistant protective suit / disposable overall.  |
|                        | Pe<br>be<br>be<br>we             | ersonal protective equipment for the body should be selected based on the task<br>eing performed and the risks involved and should be approved by a specialist<br>efore handling this product. When there is a risk of ignition from static electricity,<br>rear anti-static protective clothing. For the greatest protection from static<br>ischarges, clothing should include anti-static overalls, boots and gloves.  |
| Other skin protection  | se                               | ppropriate footwear and any additional skin protection measures should be<br>elected based on the task being performed and the risks involved and should be<br>pproved by a specialist before handling this product.   |
| Respiratory protection | ap<br>re                         | ased on the hazard and potential for exposure, select a respirator that meets the<br>ppropriate standard or certification. Respirators must be used according to a<br>espiratory protection program to ensure proper fitting, training, and other important<br>spects of use.  |

| Product/ingredient name  | LogPow       | BCF | Potential |
|--------------------------|--------------|-----|-----------|
| epoxy resin (MW ≤ 700)   | 2.64 to 3.78 | 31  | low       |
| Phenol, methylstyrenated | 3.627        | -   | low       |
| 2-methylpropan-1-ol      | 1            | -   | low       |
| ethylbenzene             | 3.6          | -   | low       |

#### Mobility in soil

Soil/water partition coefficient (Koc) : Not available.

#### Other adverse effects

: No known significant effects or critical hazards.

### Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a

### Section 13. Disposal considerations

highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Do not allow to enter drains or watercourses. Material and/or container must be disposed of as hazardous waste.
