# Section 2. Hazard identification

| Precautionary statements   |   |   |
|----------------------------|---|---|
| General                    | : | Not applicable.   |
| Prevention                 | : | <ul> <li>P280 - Wear protective gloves. Wear eye or face protection.</li> <li>P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.</li> <li>P273 - Avoid release to the environment.</li> <li>P261 - Avoid breathing vapour.</li> </ul>  |
| Response                   | : | <ul> <li>P362 + P364 - Take off contaminated clothing and wash it before reuse.</li> <li>P302 + P352 - IF ON SKIN: Wash with plenty of water.</li> <li>P333 + P313 - If skin irritation or rash occurs: Get medical advice or attention.</li> <li>P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes.</li> <li>Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>P337 + P313 - If eye irritation persists: Get medical advice or attention.</li> </ul> |
| Storage                    | : | Not applicable.   |
| Disposal                   | : | P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Other hazarde which do not |   | None known  |

Other hazards which do not : None known. result in classification

# Section 3. Composition/information on ingredients

| Substance/mixture | : Mixture        |
|-------------------|------------------|
| Other means of    | : Not available. |
| identification    |                  |

| Ingredient name           | %         | CAS number |
|---------------------------|-----------|------------|
| epoxy resin (MW ≤ 700)    | ≥10 - <25 | 1675-54-3  |
| xylene                    | ≤10       | 1330-20-7  |
| Phenol, methylstyrenated  | ≤5        | 68512-30-1 |
| epoxy resin (MW 700-1200) | ≤5        | 25036-25-3 |
| ethylbenzene              | ≤3        | 100-41-4   |
| benzyl alcohol            | ≤3        | 100-51-6   |
| 2-methylpropan-1-ol       | <3        | 78-83-1    |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

# Description of necessary first aid measures Eye contact : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention. Inhalation : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

# Section 4. First aid measures

| Skin contact | : Wash with plenty of soap and water. Remove contaminated clothing and shoes.<br>Wash contaminated clothing thoroughly with water before removing it, or wear<br>gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the<br>event of any complaints or symptoms, avoid further exposure. Wash clothing before<br>reuse. Clean shoes thoroughly before reuse.  |
|--------------|--|
| Ingestion    | : Wash out mouth with water. Remove dentures if any. If material has been<br>swallowed and the exposed person is conscious, give small quantities of water to<br>drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless directed to do so by medical personnel. If vomiting occurs,<br>the head should be kept low so that vomit does not enter the lungs. Get medical<br>attention if adverse health effects persist or are severe. Never give anything by<br>mouth to an unconscious person. If unconscious, place in recovery position and get<br>medical attention immediately. Maintain an open airway. Loosen tight clothing such<br>as a collar, tie, belt or waistband. |

| Most important symptoms/e       | ffec        | ts, acute and delayed   |
|---------------------------------|-------------|---|
| Potential acute health effect   | <u>ts</u> : |   |
| Eye contact                     | 1           | Causes serious eye irritation.  |
| Inhalation                      | 1           | No known significant effects or critical hazards.   |
| Skin contact                    | 1           | Causes skin irritation. May cause an allergic skin reaction.  |
| Ingestion                       | :           | No known significant effects or critical hazards.   |
| <u>Over-exposure signs/symp</u> | ton         | <u>15</u>   |
| Eye contact                     | :           | Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| Inhalation                      | :           | No specific data.   |
| Skin contact                    | :           | Adverse symptoms may include the following:<br>irritation<br>redness  |
| Ingestion                       | :           | No specific data.   |
| Indication of immediate med     | lica        | l attention and special treatment needed, if necessary  |
| Notes to physician              | :           | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.   |
| Specific treatments             | 1           | No specific treatment.  |
| Protection of first-aiders      | :           | No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

# Section 5. Firefighting measures

| Extinguishing media<br>Suitable extinguishing<br>media | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
|--|--|
| Unsuitable extinguishing media                         | : Do not use water jet.  |
| Specific hazards arising from the chemical             | : Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is harmful to aquatic life with long<br>lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |
| Date of issue/Date of revision                         | : 29.05.2024 Date of previous issue : 29.05.2024 Version : 1.02 3/12   |

# Section 5. Firefighting measures

| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>metal oxide/oxides   |
|--|--|
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
| Special protective equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul>  |

## Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | •   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
|--------------------------------|-----|--|
| For emergency responders       | :   | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | :   | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful<br>to the environment if released in large quantities.  |
| Methods and material for con   | Ita | inment and cleaning up   |
| Small spill                    | :   | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                    | :   | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth   |

and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

# Section 7. Handling and storage

| Precautions for safe handling |   |
|-------------------------------|---|
| Protective measures           | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain |

# Section 7. Handling and storage

|  |   | product residue and can be hazardous. Do not reuse container.   |
|--|---|---|
| Advice on general occupational hygiene                             | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Store in accordance with local regulations.<br><b>Notes on joint storage</b><br>Keep away from: oxidising agents, strong alkalis, strong acids.<br><b>Additional information on storage conditions</b><br>Observe label precautions. Store in a dry, cool and well-ventilated area. Keep away<br>from heat and direct sunlight. Keep away from sources of ignition. No smoking.<br>Prevent unauthorised access. Containers that have been opened must be carefully<br>resealed and kept upright to prevent leakage. |

See Technical Data Sheet / packaging for further information.

# Section 8. Exposure controls/personal protection

| Control parameters  |  |
|---|--|
| Occupational exposure limits<br>None.                     |  |
| Biological exposure indices<br>No exposure indices known. |  |
| Appropriate engineering<br>controls                       | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.   |
| Environmental exposure controls                           | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.  |
| Individual protection measure                             | <u>S</u>   |
| Hygiene measures  | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.  |
| Eye/face protection                                       | : Safety eyewear complying to ISO 16321-1:2022 should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.   |
| Skin protection   |  |
| Hand protection   | <ul> <li>There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals.<br/>The breakthrough time must be greater than the end use time of the product.<br/>The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed.<br/>Gloves should be replaced regularly and if there is any sign of damage to the glove material.<br/>Always ensure that gloves are free from defects and that they are stored and used correctly.<br/>The performance or effectiveness of the glove may be reduced by physical/chemica</li> </ul> |

| Date of issue/Date of revision : | 29.05.2024 Date of previous | issue : 29.05.2024 | Version | <mark>:</mark> 1.02 | 5/12 |
|----------------------------------|-----------------------------|--------------------|---------|---------------------|------|
|----------------------------------|-----------------------------|--------------------|---------|---------------------|------|

# Section 8. Exposure controls/personal protection

| •                      |   | · ·   |
|------------------------|---|---|
|                        |   | damage and poor maintenance.<br>Barrier creams may help to protect the exposed areas of the skin but should not be<br>applied once exposure has occurred.   |
|                        |   | Wear suitable gloves tested to ISO 374-1:2016.<br>Recommended, gloves(breakthrough time) > 8 hours: Viton® (> 0.7 mm), nitrile<br>rubber (> 0.75 mm), 4H/Silver Shield® (> 0.07 mm), Teflon (> 0.35 mm)<br>May be used, gloves(breakthrough time) 4 - 8 hours: neoprene (> 0.35 mm), butyl<br>rubber (> 0.4 mm), PVC (> 0.5 mm), polyvinyl alcohol (PVA) (> 0.3 mm)   |
|                        |   | For right choice of glove materials, with focus on chemical resistance and time of penetration, seek advice by the supplier of chemical resistant gloves.   |
|                        |   | The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment.   |
| Body protection        | : | Use chemical-resistant protective suit / disposable overall.  |
|                        |   | Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves. |
| Other skin protection  | : | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection | : | If workers are exposed to concentrations above the exposure limit, they must use a respirator according to EN 140. Use respiratory mask with charcoal and dust filter when spraying this product, according to EN 14387(as filter combination A2-P2). In confined spaces, use compressed-air or fresh-air respiratory equipment. When use of roller or brush, consider use of charcoalfilter.                               |

# Section 9. Physical and chemical properties and safety characteristics

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

| Appearance   |   |   |
|--|---|---|
| Physical state                                     | : | Liquid.   |
| Colour   | 1 | Grey, Red   |
| Odour  | : | Characteristic.   |
| Odour threshold                                    | : | Not applicable.   |
| рН   | : | Not applicable.   |
| Melting point/freezing point                       | 1 | Not applicable.   |
| Boiling point                                      | 1 | Lowest known value: 108°C (226.4°F) (2-methylpropan-1-ol). Weighted average: 221.55°C (430.8°F)                                 |

# Section 10. Stability and reactivity

| Reactivity                         | 1 | No specific test data related to reactivity available for this product or its ingredients.                                     |
|------------------------------------|---|--|
| Chemical stability                 | 1 | Stable under recommended storage and handling conditions (see Section 7).  |
| Possibility of hazardous reactions | : | Under normal conditions of storage and use, hazardous reactions will not occur.  |
| Conditions to avoid                | : | When exposed to high temperatures may produce hazardous decomposition products.  |
| Incompatible materials             | : | Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids. |
| Hazardous decomposition products   | : | Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.        |
| <u> </u>                           |   |  |

#### Mobility in soil

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects

: No known significant effects or critical hazards.

# Section 13. Disposal considerations

| with the requirements of environmental protection and waste disposal legislatic<br>any regional local authority requirements. Dispose of surplus and non-recyclak<br>products via a licensed waste disposal contractor. Waste should not be dispose<br>untreated to the sewer unless fully compliant with the requirements of all autho<br>with jurisdiction. Waste packaging should be recycled. Incineration or landfill<br>should only be considered when recycling is not feasible. This material and its<br>container must be disposed of in a safe way. Care should be taken when hand<br>emptied containers that have not been cleaned or rinsed out. Empty container<br>liners may retain some product residues. Vapour from product residues may or<br>a highly flammable or explosive atmosphere inside the container. Do not cut, w<br>or grind used containers unless they have been cleaned thoroughly internally.<br>dispersal of spilt material and runoff and contact with soil, waterways, drains ar<br>sewers. |
