# SAFETY DATA SHEET

### SeaQuest Tiecoat Comp A

\_

1.1 Product identifier	
Product name	: SeaQuest Tiecoat Comp A
Code	: 40842
Product description	: Paint.
Product type	: Liquid.
Other means of identification	: Not available.
Relevant identified uses	of the substance or mixture and uses advised against
Identified uses	
Use in coatings - Industria	luse
Use in coatings - Profession	onal use
1.2 Details of the supplier	r of the safety data sheet
Manufacturer	: Jotun Australia 9 Cawley Road Brooklyn 3012 Australia
	Telephone + 61 39314 0722 Fax + 61 39314 0423
	SDSJotun@jotun.com
Supplier	: APCO Coatings (NZ) Ltd 1/20A Arwen Place, East Tamaki, Auckland 2013, New Zealand
	Phone +64 800 289 2726
1.3 Emergency telephone	e number
Emergency telephone	: Medical Emergencies 24 hours:

Emergency telephone	н.	Medical Emergencies 24 hours:	
number		Poisons Information Centre (New Zealand) 0800 764 766	

### Section 2. Hazards identification

2.1 Classification of the s	ubstance or mixture
HSNO Classification	<ul> <li>3.1 - FLAMMABLE LIQUIDS - Category C</li> <li>6.1 - ACUTE TOXICITY (oral) - Category E</li> <li>6.3 - SKIN IRRITATION - Category A</li> <li>6.4 - EYE IRRITATION - Category A (Irritant)</li> <li>6.7 - CARCINOGENICITY - Category B</li> <li>6.8 - REPRODUCTIVE AND DEVELOPMENTAL TOXICITY (Fertility) - Category B</li> <li>6.8 - REPRODUCTIVE AND DEVELOPMENTAL TOXICITY (Unborn child) - Category B</li> <li>6.9 - SPECIFIC TARGET ORGAN TOXICITY (SINGLE OR REPEATED EXPOSURE) - Category B</li> </ul>

#### 2.2 Label elements

### Section 2. Hazards identification

Hazard pictograms	
Signal word	: Warning.
Hazard statements	<ul> <li>Flammable liquid and vapour. May be harmful if swallowed. Causes skin irritation. Causes serious eye irritation. Suspected of causing cancer. Suspected of damaging fertility or the unborn child. May cause damage to organs.</li> </ul>
Precautionary statements	
Prevention	: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Use personal protective equipment as required. Wear protective gloves. Wear eye or face protection. Keep away from ignition sources such as heat/sparks/open flame No smoking. Use explosion-proof electrical, ventilating, lighting and all material-handling equipment. Use only non- sparking tools. Take precautionary measures against static discharge. Keep container tightly closed. Do not breathe vapour or spray. Do not eat, drink or smoke when using this product. Wash thoroughly after handling.
Response Storage	<ul> <li>IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Take off contaminated clothing and wash before reuse. Rinse skin with water [or shower]. Wash with plenty of soap and water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF exposed or concerned: IF exposed or if you feel unwell: Call a POISON CENTER or doctor/physician. Get medical advice/attention.</li> <li>Store locked up. Store in a cool/well-ventilated place.</li> </ul>
-	
Disposal	: Dispose of contents and container in accordance with all local, regional, national and international regulations.

#### Other hazards which do not : None known.

#### result in classification

This material is classified as hazardous according to criteria in the Hazardous Substances (Minimum Degrees of Hazard) Regulations 2001 and has been classified according to the Hazardous Substances (Classifications) Regulations 2001.

This material is classified as DANGEROUS GOODS according to criteria in New Zealand Standard 5433:2012 Transport of Dangerous Goods on Land.

### Section 3. Composition/information on ingredients

Substance/mixture	:	Mixture
Other means of identification	:	Not available.
CAS number/other identifiers		
CAS number	÷	Not applicable.
EC number	:	Mixture.
1 II A		

Ingredient name	% (w/w)	CAS number
,,,	≥10 - <20 ≥10 - <20 <10	1330-20-7 107-98-2 100-41-4

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

Description of necessary first taid measures           Inhalation         : Remove vicin to fresh air and keep at rest in a position comfortable for breathing, if not breathing is irregular or if respiratory arrest occurs, provide strifticial respiration or oxygene by trained personnel. If may be dangerous to the person providing aid to give mouth-hormouth resuscitation. Get medical attention, in- mediately, Maintain an open airway. Loosen tight clothing such as a collar, ite, bett or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 horus.           Ingestion         : Wash out mouth with water. Remove dentures if any. Remove vicin to fresh air and keep at rest in a position or controlable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to dirik. Stop if the exposed person face is sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If contaminated sch with plenty of water. Remove contaminated sch with plenty of water. Consonally it ing the upper and lower the velocity. Developer reuse. Clean shoes throughly before reuse.           Eye contact         : Immediately flush person way need to see see instance. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean sees in constalled.           Mosi Important symptoms/offects. acute and delayed         : Causes series eye instance.           Eye contact         : Remediately flush person weak sch asent mediately.	Section 4. Thist al	u	116030163
If not breathing, if treathing is irregular or if respiratory arrest occurs, provide artificial respiratory or xygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical survellance for 48 hours.         Ingestion       : Wash out mouth with water. Remove dentures if any. Remove vicin to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person los conscious, give small quantities of water to dirik. Stop if the exposed person ledes sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personsel. If vonting occurs, the head should be kept low at on unconscious, person. If unconscious, place in recovery position and git, nedical attention. Wash clothing such as a collar, lie, belt or waisband.         Skin contact       : Flush contaminated skin with plenty of water. Remove contaminated outling and sa collar, lie, belt or waisband.         Skin contact       : Flush contaminated skin with plenty of water. Remove contaminated outling. Wash dotting before reuse. Clean shoes thoroughly before reuse.         Eye contact       : Flush contaminated skin with plenty of water. Contaminated skin.         Ingestion       : No known significant effects or critical hazards.         Ingestion       : No known significant effects or critical hazards.         Ingestion       : Adverse symptoms may include the following: reduced fortal weight inc	Description of necessary fire	st a	id measures
and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantites of water to drink. Stop if the exposed person is conscious, give small quantites of water to drink. Stop if the exposed person if so so by medical personnel. If vomiling occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, bet or waistband.         Skin contact       Flush contaminated skin with plenty of water. Remove contaminated clothing and clothing before reuse. Clean shoes thoroughly before reuse.         Eye contact       Immediately flush eyes with plenty of water, corcasionally lifting the upper and lower eyelds. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Get medical attention. Edit medical attention.         Most important symptoms/offects, acute and delayed       Zoutent health effects         Potential acute health effects       Gauses skin irritation. ### Section 5. Firefighting measures

:	Use dry chemical, $CO_2$ , water spray (fog) or foam. Do not use water jet. Flammable liquid and vapour. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard. Decomposition products may include the following materials:
:	Do not use water jet. Flammable liquid and vapour. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard.
:	Flammable liquid and vapour. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard.
	and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard.
1	Decomposition products may include the following materials:
	carbon dioxide carbon monoxide halogenated compounds carbonyl halides metal oxide/oxides
:	•3Y
:	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
:	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
1	

### Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see Section 8).
Environmental precautions	- 1	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods and material for co	ntai	inment and cleaning up
Small spill	:	Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor.
Large spill	:	Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spill product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

### Section 7. Handling and storage

Precautions for safe handling	: Put on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against

### Section 7. Handling and storage

	electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material. Empty containers retain product residue and can be hazardous. Do not reuse container.
Conditions for safe storage, including any incompatibilities	: Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

See Technical Data Sheet / packaging for further information.

### Section 8. Exposure controls/personal protection

#### Control parameters

<b>Occupa</b>	tiona	exposure	<u>limits</u>

Ingredient name			Exposure limits
₩ylene 1-methoxy-2-propanol			NZ HSWA 2015 (New Zealand, 11/2019). WES-TWA: 217 mg/m <sup>3</sup> 8 hours. WES-TWA: 50 ppm 8 hours. NZ HSWA 2015 (New Zealand, 11/2019). WES-STEL: 553 mg/m <sup>3</sup> 15 minutes. WES-STEL: 150 ppm 15 minutes. WES-TWA: 369 mg/m <sup>3</sup> 8 hours. WES-TWA: 100 ppm 8 hours.
ethylbenzene			NZ HSWA 2015 (New Zealand, 11/2019). WES-TWA: 100 ppm 8 hours. WES-TWA: 434 mg/m <sup>3</sup> 8 hours. WES-STEL: 543 mg/m <sup>3</sup> 15 minutes. WES-STEL: 125 ppm 15 minutes.
Appropriate engineering controls	:	Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.	
Environmental exposure controls	:	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.	
Individual protection measu	<u>ires</u>		
Hygiene measures	:	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.	
Respiratory protection	:	Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.	
Hand protection	:	be worn at all times when handling ch this is necessary. Considering the pa check during use that the gloves are s should be noted that the time to break	s complying with an approved standard should emical products if a risk assessment indicates rameters specified by the glove manufacturer, still retaining their protective properties. It athrough for any glove material may be rers. In the case of mixtures, consisting of the of the gloves cannot be accurately

# Section 8. Exposure controls/personal protection

	<ul> <li>There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals.</li> <li>The breakthrough time must be greater than the end use time of the product.</li> <li>The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed.</li> <li>Gloves should be replaced regularly and if there is any sign of damage to the glove material.</li> <li>Always ensure that gloves are free from defects and that they are stored and used correctly.</li> <li>The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance.</li> <li>Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.</li> <li>Wear suitable gloves tested to EN374.</li> <li>May be used, gloves(breakthrough time) 4 - 8 hours: neoprene, butyl rubber, PVC Recommended, gloves(breakthrough time) &gt; 8 hours: nitrile rubber, 4H, Teflon, polyvinyl alcohol (PVA)</li> </ul>
Eye protection	: Safety eyewear complying to EN 166 should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.
Skin protection	: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.
Respiratory protection	: If workers are exposed to concentrations above the exposure limit, they must use a respirator according to EN 140. Use respiratory mask with charcoal and dust filter when spraying this product, according to EN 14387(as filter combination A2-P2). In confined spaces, use compressed-air or fresh-air respiratory equipment. When use of roller or brush, consider use of charcoalfilter.

### Section 9. Physical and chemical properties

Appearance	
Physical state	: Liquid.
Colour	: Various colours.
Odour	: Characteristic.
Odour threshold	: Not available.
рН	: Not applicable.
Melting point	: Not available.
Boiling point	: Lowest known value: 120.17°C (248.3°F) (1-methoxy-2-propanol). Weighted average: 165.97°C (330.7°F)
Flash point	: Closed cup: 24°C (75.2°F)
Burning rate	: Not applicable.
Burning time	: Not applicable.
Evaporation rate	: Highest known value: 0.84 (ethylbenzene) Weighted average: 0.8compared with butyl acetate
Flammability (solid, gas)	: Not available.
Upper/lower flammability or explosive limits	: 0.8 - 13.74%
Vapour pressure	<ul> <li>Highest known value: 1.2 kPa (9.3 mm Hg) (at 20°C) (ethylbenzene). Weighted average: 1.03 kPa (7.73 mm Hg) (at 20°C)</li> </ul>
Vapour density	: Highest known value: 3.7 (Air = 1) (xylene). Weighted average: 3.46 (Air = 1)
Relative density	: Not available.
Density	: 1.014 g/cm <sup>3</sup>
Solubility	: Insoluble in the following materials: cold water and hot water.
Solubility in water	: Not available.

Date of issue	: 14.01.2021	6/11
---------------	--------------	------

### Section 9. Physical and chemical properties

Partition coefficient: n- octanol/water	: Not available.
Auto-ignition temperature	: Lowest known value: 270°C (518°F) (1-methoxy-2-propanol).
Decomposition temperature	: Not available.
SADT	: Not available.
Viscosity	: Kinematic (40°C): >0.205 cm²/s (>20.5 mm²/s)
Aerosol product	
Type of aerosol	: Not applicable.
Heat of combustion	: Not available.
Ignition distance	: Not applicable.
Enclosed space ignition - Time equivalent	: Not applicable.
Enclosed space ignition - Deflagration density	: Not applicable.
Flame height	: Not applicable.
Flame duration	: Not applicable.

### Section 10. Stability and reactivity

Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: Avoid all possible sources of ignition (spark or flame). Do not pressurise, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition.
Incompatible materials	<ul> <li>Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids.</li> </ul>
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

In contact with water, the product hydrolyses; during curing, releases Methanol. If the product is contaminated with water during production, transportation or storage, this may effect both flashpoint and hazard potential.

### Section 11. Toxicological information

Information on likely routes of	<u>f exposure</u>
Inhalation	: No known significant effects or critical hazards.
Ingestion	: May be harmful if swallowed.
Skin contact	: Causes skin irritation.
Eye contact	: Causes serious eye irritation.
Symptoms related to the physical sectors and the sector sectors and the sector sector sectors and the sector sectors and the sector sectors are sectors and the sectors are se	sical, chemical and toxicological characteristics
Inhalation	: Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations
Ingestion	: Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations
Skin contact	: Adverse symptoms may include the following: irritation redness reduced foetal weight increase in foetal deaths skeletal malformations
Eye contact	: Adverse symptoms may include the following: pain or irritation watering redness

Date of issue	: 14.01.2021

### Section 11. Toxicological information

#### Delayed and immediate effects as well as chronic effects from short and long-term exposure Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
<b>x</b> ylene	LC50 Inhalation Vapour	Rat	20 mg/l	4 hours
-	LD50 Oral	Rat	4300 mg/kg	-
	TDLo Dermal	Rabbit	4300 mg/kg	-
1-methoxy-2-propanol	LD50 Dermal	Rabbit	13 g/kg	-
	LD50 Oral	Rat	6600 mg/kg	-
ethylbenzene	LC50 Inhalation Vapour	Rat - Male	17.8 mg/l	4 hours
5	LD50 Dermal	Rabbit	>5000 mg/kg	-
	LD50 Oral	Rat	3500 mg/kg	-

#### Irritation/Corrosion

Product/ingredient name	Result	Species	Score	Exposure	Observation
<b>x</b> ylene	Eyes - Mild irritant	Rabbit	-	87 milligrams	-
	Skin - Mild irritant	Rat	-	8 hours 60 microliters	-
1-methoxy-2-propanol	Eyes - Mild irritant	Rabbit	-	24 hours 500 mg	-
	Skin - Mild irritant	Rabbit	-	500 mg	-

#### **Sensitisation**

Not available.

#### Potential chronic health effects

i otentiai chi onic nealth e	neets
General	: No known significant effects or critical hazards.
Inhalation	: No known significant effects or critical hazards.
Ingestion	: No known significant effects or critical hazards.
Skin contact	: No known significant effects or critical hazards.
Eye contact	: No known significant effects or critical hazards.
Carcinogenicity	: Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.
Mutagenicity	: No known significant effects or critical hazards.
Teratogenicity	: Suspected of damaging the unborn child.
<b>Developmental effects</b>	: No known significant effects or critical hazards.
Fertility effects	: Suspected of damaging fertility.
Chronic toxicity	
Not available.	
<b>Carcinogenicity</b>

### Section 11. Toxicological information

Acute toxicity estimates

Route	ATE value
Øral	2568.5 mg/kg
Dermal	6927.64 mg/kg
Inhalation (vapours)	336.31 mg/l

### Section 12. Ecological information

: No known significant effects or critical hazards.

#### Aquatic and terrestrial toxicity

**Ecotoxicity** 

Product/ingredient name	Result	Species	Exposure
	Acute EC50 7.2 mg/l Acute EC50 2.93 mg/l Acute LC50 4.2 mg/l	Daphnia	48 hours 48 hours 96 hours

#### Persistence/degradability

Product/ingredient name	Aquatic half-life	Photolysis	Biodegradability
<b>x</b> ylene	-	-	Readily
ethylbenzene	-	-	Readily
octamethylcyclotetrasiloxane	-	-	Not readily

#### **Bioaccumulative potential**

Product/ingredient name	LogPow	BCF	Potential
<b>x</b> ylene	3.12	8.1 to 25.9	low
1-methoxy-2-propanol	<1	-	low
ethylbenzene	3.6	-	low
octamethylcyclotetrasiloxane	6.488	13400	high

#### **Mobility in soil**

Soil/water partition coefficient (Koc)

Other adverse effects

: Not available.

: No known significant effects or critical hazards.

### Section 13. Disposal considerations

Disposal methods	: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non- recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned
	residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Do not allow to enter drains or watercourses. Material and/or container must be disposed of as hazardous waste.
