# SAFETY DATA SHEET

## **Yachting Antiskid**

## **Section 1. Identification**

Product name	: Yachting Antiskid
EC number	: 215-691-6
CAS number	: 1344-28-1
Code	: 41662
Chemical identity	: aluminium oxide
Product description	: Inert material.
Product type	: Solid.
Other means of identification	: Not available.

#### Relevant identified uses of the substance or mixture and uses advised against

Not	app	licat	ole.
1101	MPP	nour	

 Identified uses

 Use in coatings - Professional use

 Supplier
 : Jotun Australia Pty. Ltd.<br/>59 Calarco Drive,<br/>Derrimut, VIC 3026,<br/>Australia

 Phone: + 61 39314 0722<br/>E-mail: SDSJotun@jotun.com

 Emergency telephone<br/>number
 : Medical Emergencies 24 hours: Poisons Information Centre (Australia) 131 126

## Section 2. Hazard(s) identification

Classification of the substance or mixture	:	Not classified.
GHS label elements		
Signal word	:	No signal word.
Hazard statements	:	No known significant effects or critical hazards.
Precautionary statements		
Prevention	:	P260 - Do not breathe dust.
Response	:	Not applicable.
Storage	:	Not applicable.
Disposal	:	Not applicable.
Supplemental label elements	1	Not applicable.

**JOTUN** 

Jotun Protects Property

## Section 2. Hazard(s) identification

Other hazards which do not result in classification

: None known.

## Section 3. Composition and ingredient information

Substance/mixture	: Substance
Chemical identity	: aluminium oxide
Other means of	: Not available.
identification	

#### CAS number/other identifiers

CAS number	: 1344-28-1
EC number	: 215-691-6
Product code	: 41662
Ingredient name	

Ingredient name	% (w/w)	CAS number
alumina	100	1344-28-1

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

#### Description of necessary first aid measures

Eye contact	<ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.</li> </ul>
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
Skin contact	<ul> <li>Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.</li> </ul>
Ingestion	: Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

#### Most important symptoms/effects, acute and delayed

#### Potential acute health effects

: No known significant effects or critical hazards.
: No known significant effects or critical hazards.
: No known significant effects or critical hazards.
: No known significant effects or critical hazards.

#### Over-exposure signs/symptoms

Eye contact	: No specific data.
Inhalation	: No specific data.
Skin contact	: No specific data.
Ingestion	: No specific data.

#### Indication of immediate medical attention and special treatment needed, if necessary

## Section 4. First aid measures

Notes to physician	: Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatments	: No specific treatment.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

## Section 5. Firefighting measures

Extinguishing media	
Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	: None known.
Specific hazards arising from the chemical	: No specific fire or explosion hazard.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: metal oxide/oxides
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

# Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures			
For non-emergency personnel	nction shall be taken involving any personal risk or withou cuate surrounding areas. Keep unnecessary and unprote ring. Do not touch or walk through spilt material. Put on active equipment.	ected personnel from	
For emergency responders	ecialised clothing is required to deal with the spillage, tak mation in Section 8 on suitable and unsuitable materials mation in "For non-emergency personnel".		
Environmental precautions	d dispersal of spilt material and runoff and contact with s sewers. Inform the relevant authorities if the product has tion (sewers, waterways, soil or air).		
Methods and material for cor	<u>nt and cleaning up</u>		
Small spill	e containers from spill area. Vacuum or sweep up mate gnated, labelled waste container. Dispose of via a licens ractor.		
Large spill	e containers from spill area. Prevent entry into sewers, vements or confined areas. Vacuum or sweep up materia gnated, labelled waste container. Dispose of via a licens ractor. Note: see Section 1 for emergency contact inforr vaste disposal.	l and place in a ed waste disposal	

## Section 7. Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

Precautions for safe handling	1	
Protective measures	1	Put on appropriate personal protective equipment (see Section 8).
Advice on general occupational hygiene	:	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	:	Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

See Technical Data Sheet / packaging for further information.

## Section 8. Exposure controls and personal protection

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### **Control parameters**

#### **Occupational exposure limits**

	Exposure limits	
	Safe Work Australia (Australia, 12/2019). TWA: 10 mg/m <sup>3</sup> 8 hours.	
: Good general ventila contaminants.	: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.	
Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.		
<u>es</u>		
eating, smoking and Appropriate techniqu Wash contaminated	<ul><li>Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period.</li><li>Appropriate techniques should be used to remove potentially contaminated clothing.</li><li>Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.</li></ul>	
Safety eyewear complying to EN 166 should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.		
	impervious gloves complying with an approved standard should when handling chemical products if a risk assessment indicates	
Ir	<ul> <li>contaminants.</li> <li>Emissions from ven they comply with the cases, fume scrubb equipment will be needed.</li> <li>Wash hands, forear eating, smoking and Appropriate techniq Wash contaminated safety showers are ended.</li> <li>Safety eyewear comindicates this is needed.</li> <li>Safety eyewear comindicates this is needed.</li> <li>Safety eyewear comindicates this is needed.</li> <li>Chemical-resistant, be worn at all times</li> </ul>	

## Section 8. Exposure controls and personal protection

There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals.
The breakthrough time must be greater than the end use time of the product.
The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed.
Gloves should be replaced regularly and if there is any sign of damage to the glove material.
Always ensure that gloves are free from defects and that they are stored and used correctly.
The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance.
Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.
<ul> <li>Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.</li> </ul>
<ul> <li>Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.</li> </ul>
: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

## Section 9. Physical and chemical properties

<u>Appearance</u>		
Physical state	: Solid. [Powder.]	
Colour	: White. [Dark]	
Odour	: Characteristic.	
Odour threshold	: Not applicable.	
рН	: Not applicable.	
Melting point	: Not applicable.	
Boiling point	: Not available.	
Flash point	: Not applicable.	
Evaporation rate	: Not available.	
Flammability (solid, gas)	: Not available.	
Lower and upper explosive (flammable) limits	: Not applicable.	
Vapour pressure	: Not available.	
Vapour density	: Not available.	
Relative density	: 3.95 g/cm <sup>3</sup>	
Solubility	: Insoluble in the following materials: cold water and hot water.	
Partition coefficient: n- octanol/water	: Not available.	
Auto-ignition temperature	: Not applicable.	
Decomposition temperature	: Not available.	
Viscosity	: Kinematic (40°C (104°F)): >20.5 mm²/s (>20.5 cSt)	

## Section 10. Stability and reactivity

Reactivity	1	No specific test data related to reactivity available for this product or its ingredients.	
Chemical stability	1	The product is stable.	
Possibility of hazardous reactions	:	Under normal conditions of storage and use, hazardous reactions will not occur.	
Conditions to avoid	:	No specific data.	
Incompatible materials	1	Not applicable.	
Hazardous decomposition products	:	Under normal conditions of storage and use, hazardous decomposition products should not be produced.	

## Section 11. Toxicological information

#### Information on toxicological effects

#### Acute toxicity

Not available.

#### Irritation/Corrosion

Not available.

#### **Sensitisation**

Not available.

#### **Mutagenicity**

Not available.

#### **Carcinogenicity**

Not available.

#### **Reproductive toxicity**

Not available.

#### **Teratogenicity**

Not available.

#### Specific target organ toxicity (single exposure)

Not available.

#### Specific target organ toxicity (repeated exposure) Not available.

#### **Aspiration hazard**

Not available.

# Information on likely routes : Not available. of exposure

Potential acute health effects
--------------------------------

Eye contact	: No known significant effects or critical hazards.
Inhalation	: No known significant effects or critical hazards.
Skin contact	: No known significant effects or critical hazards.
Ingestion	: No known significant effects or critical hazards.

# Symptoms related to the physical, chemical and toxicological characteristics Eye contact : No specific data. Inhalation : No specific data. Date of issue/Date of revision : 16.11.2022 Date of previous issue : 26.11.2021

## Section 11. Toxicological information

Skin contact	: No specific data.
Ingestion	: No specific data.
Delayed and immediate effect	cts as well as chronic effects from short and long-term exposure
Short term exposure	
Potential immediate effects	: Not available.
Potential delayed effects	: Not available.
Long term exposure	
Potential immediate effects	: Not available.
Potential delayed effects	: Not available.
Potential chronic health eff	<u>ects</u>
Not available.	
General	: No known significant effects or critical hazards.
Carcinogenicity	: No known significant effects or critical hazards.
Mutagenicity	: No known significant effects or critical hazards.
Teratogenicity	: No known significant effects or critical hazards.
<b>Developmental effects</b>	: No known significant effects or critical hazards.
Fertility effects	: No known significant effects or critical hazards.

#### Numerical measures of toxicity

Acute toxicity estimates

Not available.

## Section 12. Ecological information

#### **Toxicity**

Not available.

#### Persistence and degradability

Not available.

#### **Bioaccumulative potential**

Not available.

### <u>Mobility in soil</u>

Soil/water partition: Not available.coefficient (Koc)

- Other adverse effects
- : No known significant effects or critical hazards.

## Section 13. Disposal considerations

#### **Disposal methods**

The generation of waste should be avoided or minimised wherever possible. ι. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

## Section 14. Transport information
