

### SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product identifier        |   |
|-------------------------------|---|
| Product name                  | : Jotafloor Solvent Free Primer Comp B (20) |
| Product code                  | : 501                                       |
| Product description           | : Hardener.                                 |
| Product type                  | : Liquid.                                   |
| Other means of identification | : Not available.                            |

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

**Identified uses** 

Use in coatings - Industrial use Use in coatings - Professional use

See Annex to the Safety data sheet for additional information in the Exposure Scenario(s).

#### 1.3 Details of the supplier of the safety data sheet

MANUFACTURER/SUPPLIER: Jotun Paints (Europe) Ltd. Stather Road Flixborough, Scunthorpe North Lincolnshire DN15 8RR England

Tel: +44 17 24 40 00 00 Fax: +44 17 24 40 01 00 SDSJotun@jotun.com

#### 1.4 Emergency telephone number

Contact NHS Direct; phone 0845 4647 or 111. Open 24/7.

### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Product definition : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Acute Tox. 4, H302 Skin Corr. 1B, H314 Eye Dam. 1, H318 Skin Sens. 1, H317 Aquatic Chronic 3, H412 The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

1/16

## **SECTION 2: Hazards identification**

| Hazard pictograms   |   |
|---|---|
| Signal word   | : Danger.   |
| Hazard statements   | <ul> <li>H302 - Harmful if swallowed.</li> <li>H314 - Causes severe skin burns and eye damage.</li> <li>H317 - May cause an allergic skin reaction.</li> <li>H412 - Harmful to aquatic life with long lasting effects.</li> </ul>   |
| Precautionary statements  |   |
| General   | : Not applicable.   |
| Prevention  | <ul> <li>P280 - Wear protective gloves. Wear eye or face protection. Wear protective clothing.</li> <li>P273 - Avoid release to the environment.</li> </ul>   |
| Response  | <ul> <li>P304 + P340 + P310 - IF INHALED: Remove person to fresh air and keep comfortable for breathing. Immediately call a POISON CENTER or physician. P301 + P310 + P331 - IF SWALLOWED: Immediately call a POISON CENTER or physician. Do NOT induce vomiting.</li> <li>P303 + P361 + P353 + P310 - IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. Immediately call a POISON CENTER or P333 + P313 - If skin irritation or rash occurs: Get medical attention.</li> <li>P305 + P351 + P338 + P310 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or physician.</li> </ul> |
| Storage   | : P405 - Store locked up.   |
| Disposal  | : P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Hazardous ingredients   | <ul> <li>3-aminomethyl-3,5,5-trimethylcyclohexylamine<br/>benzyl alcohol</li> <li>2,4,6-tris(dimethylaminomethyl)phenol</li> </ul>  |
| Supplemental label elements   | : Not applicable.   |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : Not applicable.   |
| Special packaging requirem  | ents  |
| Containers to be fitted<br>with child-resistant<br>fastenings   | : Not applicable.   |
| Tactile warning of danger   | : Not applicable.   |
| 2.3 Other hazards   |   |
| Other hazards which do not result in classification   | : None known.   |

### **SECTION 3: Composition/information on ingredients**

| 3.2 Mixtures :                                   | Mixture  |           |  |      |
|--|--|-----------|--|------|
| Product/ingredient name                          | Identifiers  | %         | Regulation (EC) No.<br>1272/2008 [CLP]   | Туре |

|  |  |           | See Section 16 for the full text of the H statements declared above.   |      |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

| General      | : In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and seek medical advice. |
|--------------|---|
| Eye contact  | : Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.                                 |
| Inhalation   | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.      |
| Skin contact | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners.  |
| Ingestion    | : If swallowed, seek medical advice immediately and show the container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.   |

#### **SECTION 4: First aid measures**

| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing |
|----------------------------|---|
|                            | thoroughly with water before removing it, or wear gloves.   |

#### 4.2 Most important symptoms and effects, both acute and delayed

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

Exposure to component solvent vapour concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

Ingestion may cause nausea, diarrhea and vomiting.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Contains 3-aminomethyl-3,5,5-trimethylcyclohexylamine, 2,4,6-tris(dimethylaminomethyl)phenol. May produce an allergic reaction.

#### 4.3 Indication of any immediate medical attention and special treatment needed

| Notes to physician  | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours. |
|---------------------|--|
| Specific treatments | : No specific treatment.   |

See toxicological information (Section 11)

### **SECTION 5: Firefighting measures**

| 5.1 Extinguishing media                         |    |   |
|---|----|---|
| Suitable extinguishing media                    | :  | Recommended: alcohol-resistant foam, CO <sub>2</sub> , powders, water spray.  |
| Unsuitable extinguishing media                  | :  | Do not use water jet.   |
| 5.2 Special hazards arising fr                  | om | the substance or mixture  |
| Hazards from the substance or mixture           | :  | Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard.                      |
| Hazardous combustion<br>products                | :  | Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen. |
| 5.3 Advice for firefighters                     |    |   |
| Special protective actions<br>for fire-fighters | :  | Cool closed containers exposed to fire with water. Do not release runoff from fire to drains or watercourses.           |
| Special protective equipment for fire-fighters  | :  | Appropriate breathing apparatus may be required.  |

### **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, protective equipment and emergency procedures |   |                      |
|---|---|----------------------|
| For non-emergency<br>personnel  | Exclude sources of ignition and ventilate the area. Avoid breat Refer to protective measures listed in sections 7 and 8.  | hing vapour or mist. |
| For emergency responders  | f specialised clothing is required to deal with the spillage, take<br>nformation in Section 8 on suitable and unsuitable materials.<br>nformation in "For non-emergency personnel".                                 |                      |
| 6.2 Environmental precautions   | Do not allow to enter drains or watercourses. If the product convers, or sewers, inform the appropriate authorities in accordate egulations.  |                      |
| 6.3 Methods and material for containment and cleaning up                | Contain and collect spillage with non-combustible, absorbent rearth, vermiculite or diatomaceous earth and place in containe according to local regulations (see Section 13). Preferably clear void using solvents. | er for disposal      |
| 6.4 Reference to other sections   | See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protection<br>See Section 13 for additional waste treatment information.                                  | ve equipment.        |

### **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

Prevent the creation of flammable or explosive concentrations of vapours in air and avoid vapour concentrations higher than the occupational exposure limits.

In addition, the product should only be used in areas from which all naked lights and other sources of ignition have been excluded. Electrical equipment should be protected to the appropriate standard.

Mixture may charge electrostatically: always use earthing leads when transferring from one container to another. Operators should wear antistatic footwear and clothing and floors should be of the conducting type.

Keep away from heat, sparks and flame. No sparking tools should be used.

Avoid contact with skin and eyes. Avoid the inhalation of dust, particulates, spray or mist arising from the application of this mixture. Avoid inhalation of dust from sanding.

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Put on appropriate personal protective equipment (see Section 8).

Never use pressure to empty. Container is not a pressure vessel.

Always keep in containers made from the same material as the original one.

Comply with the health and safety at work laws.

Do not allow to enter drains or watercourses.

Information on fire and explosion protection

Vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air.

When operators, whether spraying or not, have to work inside the spray booth, ventilation is unlikely to be sufficient to control particulates and solvent vapour in all cases. In such circumstances they should wear a compressed air-fed respirator during the spraying process and until such time as the particulates and solvent vapour concentration has fallen below the exposure limits.

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations.

#### Notes on joint storage

Keep away from: oxidising agents, strong alkalis, strong acids.

#### Additional information on storage conditions

Observe label precautions. Store in a dry, cool and well-ventilated area. Keep away from heat and direct sunlight. Keep away from sources of ignition. No smoking. Prevent unauthorised access. Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

#### 7.3 Specific end use(s)

Date of issue/Date of revision

### SECTION 7: Handling and storage

Recommendations

: Not available. : Not available.

Industrial sector specific solutions

### **SECTION 8: Exposure controls/personal protection**

The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 8.1 Control parameters

**Occupational exposure limits** 

No exposure limit value known.

**Recommended monitoring procedures** If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### **DNELs/DMELs**

| Product/ingredient name               | Exposure                 | Value                  | Population | Effects  |

|      |

| 8.2 Exposure controls            |   |
|----------------------------------|---|
| Appropriate engineering controls | : Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and solvent vapours below the OEL, suitable respiratory protection must be worn.  |
| Individual protection meas       | <u>Sures</u>  |
| Hygiene measures                 | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
| Eye/face protection              | : Use safety eyewear designed to protect against splash of liquids.   |
| Skin protection                  |   |
| Gloves                           | <ul> <li>There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals. The breakthrough time must be greater than the end use time of the product. The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed. Gloves should be replaced regularly and if there is any sign of damage to the glove material.</li> <li>Always ensure that gloves are free from defects and that they are stored and used correctly.</li> <li>The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance.</li> <li>Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.</li> <li>Wear suitable gloves (breakthrough time) 4 - 8 hours: PVC, nitrile rubber Recommended, gloves(breakthrough time) &gt; 8 hours: fluor rubber, Viton®, 4H, neoprene, butyl rubber</li> <li>For right choice of glove materials, with focus on chemical resistance and time of penetration, seek advice by the supplier of chemical resistant gloves.</li> <li>The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment.</li> </ul> |
|                                  |   |

### **SECTION 8: Exposure controls/personal protection**

| Body protection                 | <ul> <li>Personnel should wear antistatic clothing made of natural fibres or of high-<br/>temperature-resistant synthetic fibres.</li> </ul>  |
|---------------------------------|---|
| Other skin protection           | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection          | : If workers are exposed to concentrations above the exposure limit, they must use a respirator according to EN 140. Use respiratory mask with charcoal and dust filter when spraying this product, according to EN 14387(as filter combination A2-P2). In confined spaces, use compressed-air or fresh-air respiratory equipment. When use of roller or brush, consider use of charcoalfilter. |
| Environmental exposure controls | : Do not allow to enter drains or watercourses.   |

#### SECTION 9: Physical and chemical properties 9.1 Information on basic physical and chemical properties **Appearance Physical state** : Liquid. Colour : Various colours. Odour : Characteristic. **Odour threshold** : Not applicable. pH : Not applicable. Melting point/freezing point : Not applicable. Initial boiling point and : Lowest known value: 205.3°C (401.5°F) (benzyl alcohol). Weighted average: 229.49°C (445.1°F) boiling range : Closed cup: Not applicable. Flash point : 0.007 (benzyl alcohol) compared with butyl acetate **Evaporation rate** Flammability (solid, gas) : Not applicable. Upper/lower flammability or : 1.2 - 13% explosive limits : Highest known value: 0.02 kPa (0.2 mm Hg) (at 20°C) (benzyl alcohol). Vapour pressure Weighted average: 0.01 kPa (0.08 mm Hg) (at 20°C) : Highest known value: 3.7 (Air = 1) (benzyl alcohol). Vapour density **Density** : 1 a/cm<sup>3</sup> : Insoluble in the following materials: cold water and hot water. Solubility(ies) Partition coefficient: n-octanol/ : Not available. water : Lowest known value: 380°C (716°F) (3-aminomethyl-3,5, **Auto-ignition temperature** 5-trimethylcyclohexylamine). **Decomposition temperature** : Not available. : Kinematic (40°C): >0.205 cm<sup>2</sup>/s (>20.5 mm<sup>2</sup>/s) Viscosity **Explosive properties** : Not available. : Not available. **Oxidising properties** 9.2 Other information

No additional information.

### **SECTION 10: Stability and reactivity**

|  | - | -  |
|--|---|--|
| 10.1 Reactivity                            | : | No specific test data related to reactivity available for this product or its ingredients.                                     |
| 10.2 Chemical stability                    | 1 | Stable under recommended storage and handling conditions (see Section 7).  |
| 10.3 Possibility of<br>hazardous reactions | : | Under normal conditions of storage and use, hazardous reactions will not occur.  |
| 10.4 Conditions to avoid                   | : | When exposed to high temperatures may produce hazardous decomposition products.  |
| 10.5 Incompatible materials                | : | Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids. |
| 10.6 Hazardous<br>decomposition products   | : | Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.        |

### **SECTION 11: Toxicological information**

#### 11.1 Information on toxicological effects

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

Exposure to component solvent vapour concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

Ingestion may cause nausea, diarrhea and vomiting.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Contains 3-aminomethyl-3,5,5-trimethylcyclohexylamine, 2,4,6-tris(dimethylaminomethyl)phenol. May produce an allergic reaction.

#### Acute toxicity

| Product/ingredient name   | Result                 | Species    | Dose                     | Exposure |
|---|------------------------|------------|--------------------------|----------|
| 3-aminomethyl-3,5,<br>5-trimethylcyclohexylamine                | LD50 Oral              | Rat        | 1030 mg/kg               | -        |

: Not available.

### **SECTION 12: Ecological information**

#### 12.1 Toxicity

There are no data available on the mixture itself. Do not allow to enter drains or watercourses.

The mixture has been assessed following the summation method of the CLP Regulation (EC) No 1272/2008 and is classified for eco-toxicological properties accordingly. See Sections 2 and 3 for details.

#### Notice to reader

The information in this document is given to the best of Jotun's knowledge, based on laboratory testing and practical experience. Jotun's products are considered as semi-finished goods and as such, products are often used under conditions beyond Jotun's control. Jotun cannot guarantee anything but the quality of the product itself. Minor product variations may be implemented in order to comply with local requirements. Jotun reserves the right to change the given data without further notice.

Users should always consult Jotun for specific guidance on the general suitability of this product for their needs and specific application practices.

If there is any inconsistency between different language issues of this document, the English (United Kingdom) version will prevail.

| Exposure Sc   | enario: Use in coatings - | Industrial use |
|---------------|---------------------------|----------------|
| Sector of Use | : Industrial use          |                |

 Process Category
 : PROC05 PROC08a PROC10

 Environmental release category(ies)
 : ERC4

Covers the use in coatings (paints, inks, adhesives, etc) including exposures during use (including product transfer and preparation, application by brush, spray by hand or similar methods) and equipment cleaning.

### **Operational conditions and risk management measures**

#### Control of worker exposure

| : Covers daily exposures up to 8 hours   |
|--|
| : Assumes use at not more than 20°C above ambient temperature, unless stated differently. Assumes<br>a good basic standard of occupational hygiene is implemented  |
| : Wear chemical-resistant gloves (tested to EN374) in combination with specific activity training. Wear suitable coveralls to prevent exposure to the skin. Use suitable eye protection. See Section 8 for information on appropriate personal protective equipment. |
| Risk management measures   |
| : Provide extract ventilation to points where emissions occur.   |
| : Provide extract ventilation to points where emissions occur. Wear a respirator conforming to EN140 with type A/P2 filter or better.  |
|  |

#### Control of environmental exposure

| Organisational measures to prevent/limit release from site                  | : Prevent environmental discharge consistent with regulatory requirements.  |
|---|---|
| Conditions and measures related to external treatment of waste for disposal | : External treatment and disposal of waste should comply with applicable local and/or national<br>regulations. See Section 13 for additional waste treatment information. |
| Conditions and measures related to external recovery of waste               | : External recovery and recycling of waste should comply with applicable local and/or national regulations.   |

### Additional information

The exposure scenario for the mixture is based on the following substances:

REACH #: 01-2119492630-38 REACH #: 01-2119514687-32 REACH #: 01-2119456619-26 (from Comp A)

# Exposure Scenario: Use in coatings - Professional use

| Sector of Use                       | : Professional use      |
|-------------------------------------|-------------------------|
| Process Category                    | : PROC05 PROC08a PROC10 |
| Environmental release category(ies) | : ERC8a ERC8d           |

Covers the use in coatings (paints, inks, adhesives, etc) including exposures during use (including product transfer and preparation, application by brush, spray by hand or similar methods) and equipment cleaning.

### **Operational conditions and risk management measures**

#### Control of worker exposure

| Frequency and duration of use                        | : Covers daily exposures up to 8 hours   |
|--|--|
| General - Operational conditions                     | : Assumes use at not more than 20°C above ambient temperature, unless stated differently. Assumes a good basic standard of occupational hygiene is implemented   |
| General - Risk management measures                   | : Wear chemical-resistant gloves (tested to EN374) in combination with specific activity training. Wear suitable coveralls to prevent exposure to the skin. Use suitable eye protection. See Section 8 for information on appropriate personal protective equipment. |
| Type of activity or process                          | Risk management measures   |
| Preparation of material for application -<br>Indoor  | : Provide extract ventilation to points where emissions occur. Avoid carrying out activities involving exposure for more than 1 hour.  |
| Preparation of material for application -<br>Outdoor | : Ensure operation is undertaken outdoors. Wear a respirator conforming to EN140 with type A/P2 filter or better. Avoid carrying out activities involving exposure for more than 1 hour.   |
| Equipment cleaning and maintenance                   | : Drain down system prior to equipment break-in or maintenance. Avoid carrying out activities involving exposure for more than 4 hours.  |
| Roller, spreader, flow application - Indoor          | : Provide extract ventilation to points where emissions occur. Wear a respirator conforming to EN140 with type A/P2 filter or better. Avoid carrying out activities involving exposure for more than 4 hours.  |
| Roller, spreader, flow application - Outdoor         | : Ensure operation is undertaken outdoors. Wear a full-face respirator conforming to EN136 with Type A/P2 filter or better. Avoid carrying out activities involving exposure for more than 4 hours.  |

#### Control of environmental exposure

| Organisational measures to prevent/limit release from site                  | : Prevent environmental discharge consistent with regulatory requirements.  |
|---|---|
| Conditions and measures related to external treatment of waste for disposal | : External treatment and disposal of waste should comply with applicable local and/or national<br>regulations. See Section 13 for additional waste treatment information. |
| Conditions and measures related to external recovery of waste               | : External recovery and recycling of waste should comply with applicable local and/or national regulations.   |

#### Additional information

The exposure scenario for the mixture is based on the following substances:
