# SAFETY DATA SHEET

## Section 1. Identification

Product name Code Product type

Other means of identification

- : Jotun Super Durable 2903 (E028)
- : 50190
  - : Powder coating.
- : Not available.

#### Relevant identified uses of the substance or mixture and uses advised against

| Use in coatings - Industria   | Identified uses<br>use   |
|-------------------------------|--|
| Supplier                      | : Jotun Australia Pty. Ltd.<br>59 Calarco Drive,<br>Derrimut, VIC 3026,<br>Australia<br>Phone: + 61 39314 0722<br>E-mail: SDSJotun@jotun.com |
| Emergency telephone<br>number | : Medical Emergencies 24 hours: Poisons Information Centre (Australia) 131 126   |

### Section 2. Hazard(s) identification

| Classification of the substance or mixture          | NG-TERM (CHRONIC) AQUATIC HAZARD - Category  | 3                       |
|---|--|-------------------------|
| GHS label elements                                  |  |                         |
| Signal word   | signal word.   |                         |
| Hazard statements                                   | 12 - Harmful to aquatic life with long lasting effects.  |                         |
| Precautionary statements                            |  |                         |
| Prevention  | 73 - Avoid release to the environment.   |                         |
| Response  | t applicable.  |                         |
| Storage   | t applicable.  |                         |
| Disposal  | 01 - Dispose of contents and container in accordance wi<br>tional and international regulations. | th all local, regional, |
| Supplemental label elements                         | t applicable.  |                         |
| Other hazards which do not result in classification | ne known.  |                         |

### Section 3. Composition and ingredient information

| Substance/mixture | : Mixture        |
|-------------------|------------------|
| Other means of    | : Not available. |
| identification    |                  |

| CAS number/other identifiers |   |                 |  |  |
|------------------------------|---|-----------------|--|--|
| CAS number                   | : | Not applicable. |  |  |
| EC number                    | : | Mixture.        |  |  |
| Product code                 | ÷ | 50190           |  |  |

| Ingredient name  | % (w/w)   | CAS number |
|--|-----------|------------|
| titanium dioxide   | ≥10 - ≤30 | 13463-67-7 |
| silica, amorphous, fumed   | ≤3        | 7631-86-9  |
| 2,4,8,10-tetraoxa-3,9-diphosphaspiro[5.5]undecane, 3,9-bis[2,4-bis | ≤1        | 26741-53-7 |
| (1,1-dimethylethyl)phenoxy]-                                       |           |            |

# There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

#### **Description of necessary first aid measures**

| Eye contact  | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs.   |
|--------------|--|
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If not breathing, if breathing is irregular or if respiratory arrest occurs, provide<br>artificial respiration or oxygen by trained personnel. It may be dangerous to the<br>person providing aid to give mouth-to-mouth resuscitation. Get medical attention if<br>adverse health effects persist or are severe. If unconscious, place in recovery<br>position and get medical attention immediately. Maintain an open airway. Loosen<br>tight clothing such as a collar, tie, belt or waistband. In case of inhalation of<br>decomposition products in a fire, symptoms may be delayed. The exposed person<br>may need to be kept under medical surveillance for 48 hours. |
| Skin contact | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.  |
| Ingestion    | : Wash out mouth with water. Remove dentures if any. If material has been<br>swallowed and the exposed person is conscious, give small quantities of water to<br>drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless directed to do so by medical personnel. If vomiting occurs,<br>the head should be kept low so that vomit does not enter the lungs. Get medical<br>attention if adverse health effects persist or are severe. Never give anything by<br>mouth to an unconscious person. If unconscious, place in recovery position and get<br>medical attention immediately. Maintain an open airway. Loosen tight clothing such<br>as a collar, tie, belt or waistband.                                   |

Most important symptoms/effects, acute and delayed

| Eye contact  | : No known significant effects or critical hazards. |
|--------------|---|
| Inhalation   | : No known significant effects or critical hazards. |
| Skin contact | : No known significant effects or critical hazards. |
| Ingestion    | : No known significant effects or critical hazards. |

### Section 4. First aid measures

| Eye contact  | : No specific data. |
|--------------|---------------------|
| Inhalation   | : No specific data. |
| Skin contact | : No specific data. |
| Ingestion    | : No specific data. |
|              |                     |

Indication of immediate medical attention and special treatment needed, if necessaryNotes to physician: In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br/>The exposed person may need to be kept under medical surveillance for 48 hours.Specific treatments: No specific treatment.Protection of first-aiders: No action shall be taken involving any personal risk or without suitable training. It<br/>may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

#### See toxicological information (Section 11)

### Section 5. Firefighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Recommended: alcohol-resistant foam, CO <sub>2</sub> blanket, water spray or mist.  |
| Unsuitable extinguishing media                 | : Do not use water jet.<br>Do not use inert gas under high pressure (e.g. CO2).   |
| Specific hazards arising from the chemical     | This material is harmful to aquatic life with long lasting effects. Fire water<br>contaminated with this material must be contained and prevented from being<br>discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides<br>metal oxide/oxides   |
|  | Fine dust clouds may form explosive mixtures with air.  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.               |
| Special protective equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul>             |

### Section 6. Accidental release measures

| Personal precautions, protective equipment and emergency procedures |   |   |  |
|---|---|---|--|
| For non-emergency<br>personnel                                      | : | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Provide adequate ventilation.<br>Wear appropriate respirator when ventilation is inadequate. Put on appropriate<br>personal protective equipment. |  |
| For emergency responders  | : | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |  |

3/10

### Section 6. Accidental release measures

| Environmental precautions   | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful<br>to the environment if released in large quantities. |
|-----------------------------|---|
| Methods and material for co | ntainment and cleaning up   |
| Small spill                 | : Move containers from spill area. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor.  |
| Large spill                 | : Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact   |

### Section 7. Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

information and Section 13 for waste disposal.

#### Precautions for safe handling

| Protective measures  |   | Put on appropriate personal protective equipment (see Section 8). Do not ingest.<br>Avoid contact with eyes, skin and clothing. Avoid release to the environment. Keep<br>in the original container or an approved alternative made from a compatible material,<br>kept tightly closed when not in use. Empty containers retain product residue and<br>can be hazardous. Do not reuse container.  |
|--|---|---|
| Advice on general occupational hygiene                             | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |

See Technical Data Sheet / packaging for further information.

### Section 8. Exposure controls and personal protection

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### **Control parameters**

#### **Occupational exposure limits**

Dust Limit : 10 mg/m<sup>3</sup> (TWA of total inhalable dust) and 4 mg/m<sup>3</sup> (TWA of respirable)

| Ingredient name                |              |                        | Exposure limits                           |                |          |      |
|--------------------------------|--------------|------------------------|---|----------------|----------|------|
| titanium dioxide               |              |                        | Safe Work Australia (Australia, 12/2019). |                |          |      |
|                                |              |                        | TWA: 10 mg/m <sup>3</sup> 8               | 8 hours.       |          | -    |
| silica, amorphous, fumed       |              |                        | Safe Work Australia (Australia, 12/2019). |                |          | 9).  |
|                                |              |                        | TWA: 2 mg/m <sup>3</sup> 8 dust and fumes | hours. Form: I | Respirat | ble  |
| Date of issue/Date of revision | : 16.11.2022 | Date of previous issue | : 16.11.2022                              | Version        | : 1.01   | 4/10 |

### Section 8. Exposure controls and personal protection

| Appropriate engineering controls | : Good general ventilation should be sufficient to control worker exposure to airborne contaminants.  |
|----------------------------------|---|
| Environmental exposure controls  | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |
| Individual protection meas       | <u>ures</u>   |
| Hygiene measures                 | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location.   |
| Eye/face protection              | : Safety eyewear complying to EN 166 should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.   |
| Skin protection                  |   |
| Hand protection                  | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
|                                  | <ul> <li>There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals.</li> <li>The breakthrough time must be greater than the end use time of the product.</li> <li>The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed.</li> <li>Gloves should be replaced regularly and if there is any sign of damage to the glove material.</li> <li>Always ensure that gloves are free from defects and that they are stored and used correctly.</li> </ul>           |
|                                  | The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance.<br>Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.  |
|                                  | Wear suitable gloves tested to EN374.<br>Recommended, gloves(breakthrough time) > 8 hours: nitrile rubber, neoprene, PVC  |
| Body protection                  | <ul> <li>Personal protective equipment for the body should be selected based on the task<br/>being performed and the risks involved and should be approved by a specialist<br/>before handling this product.</li> </ul>   |
| Other skin protection            | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection           | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use   |

5/10

aspects of use.

### Section 9. Physical and chemical properties

| <u>Appearance</u>   |  |
|---|--|
| Physical state  | : Solid. Powder.   |
| Colour  | : Various  |
| Odour   | : Odourless.   |
| Odour threshold   | : Not applicable.  |
| рН  | : Not applicable.  |
| Melting point   | : 85 - 115 °C  |
| Boiling point   | : Not applicable.  |
| Flash point   | : Not applicable.  |
| Evaporation rate  | : Not applicable.  |
| Flammability (solid, gas)   | : Fine dust clouds may form explosive mixtures with air.   |
|   |  |
|   |  |
| Lower explosion limit (dust)  | : 30 g/m³ (EN 14034-3)   |
| Lower explosion limit (dust)<br>Minimum ignition energy (mJ)  |  |
| Lower explosion limit (dust)<br>Minimum ignition energy (mJ)<br>Vapour pressure                     |  |
| Minimum ignition energy (mJ)  | : 10 - 30 (EN 13821)   |
| Minimum ignition energy (mJ) Vapour pressure  | : 10 - 30 (EN 13821)<br>: Not applicable.  |
| Minimum ignition energy (mJ)<br>Vapour pressure<br>Vapour density                                   | <ul> <li>10 - 30 (EN 13821)</li> <li>Not applicable.</li> <li>Not applicable.</li> </ul>   |
| Minimum ignition energy (mJ)<br>Vapour pressure<br>Vapour density<br>Relative density               | <ul> <li>10 - 30 (EN 13821)</li> <li>Not applicable.</li> <li>Not applicable.</li> <li>1.2 to 1.9 g/cm<sup>3</sup> (ISO 8130-2/-3)</li> </ul>  |

### Section 10. Stability and reactivity

: Not applicable.

**Decomposition temperature** : 230°C (446°F)

Viscosity

| Reactivity                         | : Fine dust clouds may form explosive mixtures with air.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame).   |
|                                    | Take precautionary measures against electrostatic discharges.   |
|                                    | To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material. |
|                                    | Prevent dust accumulation.  |
| Incompatible materials             | : Not applicable.   |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |

### Section 11. Toxicological information

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from shortterm and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact. Coating powders can cause localised skin irritation in folds of the skin or under tight clothing.

Contains zinc di(benzothiazol-2-yl) disulphide. May produce an allergic reaction.

#### Persistence and degradability

Not available.

#### **Bioaccumulative potential**

Not available.

**Mobility in soil** 

Soil/water partition coefficient (Koc)

: Not available.

### Section 12. Ecological information

Other adverse effects

: No known significant effects or critical hazards.

### Section 13. Disposal considerations

**Disposal methods** The generation of waste should be avoided or minimised wherever possible. 5 Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Do not allow to enter drains or watercourses. Material and/or container must be disposed of as hazardous waste.

| Section 14. Transport information |                |                |                |                |
