Conforms to regulation No. 30105, Turkey KKDIK, Annex 2

SAFETY DATA SHEET

Jotun Facade 2480 FTX

SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product identifier | |
|-------------------------------|-------------------------|
| Product name | : Jotun Facade 2480 FTX |
| Product code | : 50982 |
| Product type | : Powder coating. |
| Other means of identification | : Not available. |

1.2 Relevant identified uses of the substance or mixture and uses advised against

Use in coatings - Industrial use

1.3 Details of the supplier of the safety data sheet

JOTUN BOYA SAN. VE TİC. A.Ş. Çerkezköy Organize Sanayi Şubesi G.O.P MAHALLESI ULUSOY CAD. NO. 8 CERKEZKOY 59500 TEKIRDAG TURKEY

Phone: + 90 282 726 8070 Fax: + 90 282 726 8073 sdsjotun@jotun.com

Başvurulacak Kişi: Deren Ercan deren.metiner@jotun.com Original preparation date : 02.01.2024

1.4 Emergency telephone number

National Poison Information Center

+90 224 442 82 93 Uludağ Üniversitesi Zehir Danışma Merkezi (www.uludag.edu.tr/uludag/zehir.html) a. ACİL DURUM TELEFONU: Zehirlenme durumlarında gerektiğinde ulusal zehir merkezinin (UZEM) 114 nolu telefonunu arayınız. b. ACİL İLK YARDIM MERKEZİ:112 c. İTFAİYE:110

SECTION 2: Hazards identification

| 2.1 Classification of the subs | taı | nce or mixture |
|---|-----|--|
| Product definition | 1 | Mixture |
| Classification according to Not classified. | reç | <u>julation SEA: RG10/12/2020-31330</u> |
| • | | nazardous according to Regulation SEA: RG10/12/2020-31330. The H statements declared above. |
| See Section 11 for more detai | lec | l information on health effects and symptoms. |
| 2.2 Label elements | | |
| Signal word | 1 | No signal word. |
| Hazard statements | 1 | No known significant effects or critical hazards. |
| Precautionary statements | | |
| General | : | Not applicable. |
| Prevention | 1 | Not applicable. |
| Response | 1 | Not applicable. |
| Storage | 1 | Not applicable. |
| Disposal | 1 | Not applicable. |
| Supplemental label elements | : | Safety data sheet available on request. |
| Annex 17 - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles | : | Not applicable. |
| Special packaging requirem | en | <u>ts</u> |
| Containers to be fitted with child-resistant fastenings | : | Not applicable. |
| Tactile warning of danger | 1 | Not applicable. |
| 2.3 Other hazards | | |
| Product meets the criteria for PBT or vPvB | : | This mixture does not contain any substances that are assessed to be a PBT or a vPvB. |
| Other hazards which do not result in classification | : | None known. |

SECTION 3: Composition/information on ingredients

| 3.2 Mixtures | : Mixture | | | |
|-------------------------|----------------------------------|-----------|--|------|
| Product/ingredient name | Identifiers | % | SEA: RG10/12/2020-31330 | Туре |
| barium sulfate | EC: 231-784-4 CAS: 7727-43-7 | ≥10 - ≤25 | Not classified. | [1] |
| titanium dioxide | EC: 236-675-5 CAS: 13463-67-7 | ≥10 - ≤25 | Not classified. | [1] |
| | | | See Section 16 for the full text of the H statements declared above. | |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs or vPvBs or have been assigned a workplace exposure limit and hence require reporting in this section.

<u>Type</u>

[1] Substance with a workplace exposure limit

SECTION 3: Composition/information on ingredients

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures

4.1 Description of first aid measures

| Eye contact | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs. |
|----------------------------|--|
| Inhalation | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Skin contact | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. |
| Ingestion | : Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. |

4.2 Most important symptoms and effects, both acute and delayed

Potential acute health effects

| Eye contact | : No known significant effects or critical hazards. |
|---------------------|---|
| Inhalation | : No known significant effects or critical hazards. |
| Skin contact | : No known significant effects or critical hazards. |
| Ingestion | : No known significant effects or critical hazards. |
| Over-exposure signs | /symptoms |
| Eye contact | : No specific data. |
| Inhalation | : No specific data. |
| Skin contact | : No specific data. |

Ingestion : No specific data.

4.3 Indication of any immediate medical attention and special treatment needed

| Notes to physician | : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
|---------------------|--|
| Specific treatments | : No specific treatment. |

SECTION 5: Firefighting measures

| 5.1 Extinguishing media | |
|--|--|
| Suitable extinguishing media | : Use an extinguishing agent suitable for the surrounding fire. |
| Unsuitable extinguishing media | : None known. |
| 5.2 Special hazards arising f | rom the substance or mixture |
| Hazards from the substance or mixture | : No specific fire or explosion hazard. |
| | Fine dust clouds may form explosive mixtures with air. |
| Hazardous thermal decomposition products | : Decomposition products may include the following materials: carbon dioxide carbon monoxide nitrogen oxides sulfur oxides metal oxide/oxides |

SECTION 5: Firefighting measures

| 5.3 Advice for firefighters | |
|---|---|
| Special protective actions for fire-fighters | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |

SECTION 6: Accidental release measures

| 6.1 Personal precautions, pro | ote | ctive equipment and emergency procedures |
|---------------------------------|-----|--|
| For non-emergency personnel | | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment. |
| For emergency responders | - | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel". |
| 6.2 Environmental precautions | : | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). |
| 6.3 Methods and material for | co | entainment and cleaning up |
| Small spill | 1 | Move containers from spill area. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor. |
| Large spill | : | Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor. |
| 6.4 Reference to other sections | : | See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information. |

SECTION 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

7.1 Precautions for safe handling : Put on appropriate personal protective equipment (see Section 8). **Protective measures** : Eating, drinking and smoking should be prohibited in areas where this material is Advice on general occupational hygiene handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

See Technical Data Sheet / packaging for further information.

SECTION 7: Handling and storage

7.3 Specific end use(s)

Recommendations Industrial sector specific solutions : Not available.

cific : Not available.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Dust Limit : 10 mg/m³ (TWA of total inhalable dust) and 4 mg/m³ (TWA of respirable)

Occupational exposure limits

| Product/ingredient name | Exposure limit values |
|------------------------------|--|
| <mark>ቓ</mark> arium sulfate | ACGIH TLV (United States, 7/2023). |
| | TWA: 5 mg/m ³ 8 hours. Form: Inhalable fraction |
| titanium dioxide | EU OEL (Europe). |
| | TWA: 5 mg/m ³ 8 hours. |

Biological exposure indices

No exposure indices known.

Recommended monitoring procedures : Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

DNELs/DMELs

| Product/ingredient name | Туре | Exposure | Value | Population | Effects |
|-------------------------|------|-------------------------|------------------------|-----------------------|----------|
| barium sulfate | DNEL | Long term Inhalation | 10 mg/m ³ | Workers | Local |
| | DNEL | Long term Inhalation | 10 mg/m³ | General population | Systemic |
| | DNEL | Long term Inhalation | 10 mg/m³ | Workers | Systemic |
| | DNEL | Long term Oral | 13000 mg/ kg bw/day | General population | Systemic |
| titanium dioxide | DNEL | Long term Inhalation | 28 µg/m³́ | General population | Local |
| | DNEL | Long term Inhalation | 170 µg/m³ | Workers | Local |

PNECs

No PNECs available

8.2 Exposure controls
 Appropriate engineering controls
 Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
 Individual protection measures
 Hygiene measures
 Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

| assessment indicates this is necessary to avoid exposure to liquid splashes, mists gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses wit side-shields. Skin protection • There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals. The breaktbrough time must be greater than the end use time of the product. The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed. Gloves should be replaced regularly and if there is any sign of damage to the glow material. Always ensure that gloves are free from defects and that they are stored and used correctly. The performance or effectiveness of the glove may be reduced by physical/ chemical damage and poor maintenance. Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred. Wear suitable gloves tested to ISO 374-1:2016. Recommended, gloves(breakthrough time) > 8 hours: nitrile rubber (> 0.75 mm), neoprene (> 0.35 mm), PVC (> 0.5 mm) For right choice of glove materials, with focus on chemical resistant gloves. The user must check that the final choice of type of glove selected for handling this product. Body protection : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Other skin protection : Appropriate footwear and any additional skin protection measures should be aperoproved by a specialist before handling this product. The user must check that the final choice of type of glove | • | |

SECTION 9: Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

9.1 Information on basic physical and chemical properties

| <u>Appearance</u> | |
|--|--|
| Physical state | : Solid. Powder. |
| Colour | : Various |
| Odour | : Odourless. |
| Odour threshold | : Not applicable. |
| Melting point (dust) | : 85 - 115 °C |
| Initial boiling point and boiling range | : Not applicable. |
| Flammability (solid, gas) | : Fine dust clouds may form explosive mixtures with air. |
| Lower explosion limit (dust) | : 30 g/m ³ |
| | - |

Date of revision

| Minimum ignition energy (mJ) | 10 - 30 (EN 13821) | |
|--|------------------------------|--|
| Flash point | | |
| | Not applicable. | |
| Auto-ignition temperature | > 400°C | |
| Decomposition temperature | >230°C | |
| рН | Not applicable. | |
| Viscosity | Not applicable. | |
| Solubility(ies) | | |
| Media | Result | |
| cold water hot water | Not soluble Not soluble | |
| Partition coefficient: n-octanol/ water | Not applicable. | |
| Vapour pressure | Not applicable. | |
| | Not applicable. | |
| Density | 1.2 to 1.9 g/cm ³ | |
| Vapour density | Not applicable. | |
| Explosive properties | Not available. | |
| Oxidising properties | Not available. | |
| Particle characteristics | | |
| Median particle size | Not available. | |

9.2 Other information

No additional information.

| SECTION 10: Stability and reactivity | | | |
|--|---|-------------|--|
| 10.1 Reactivity | ne dust clouds may form explosive mixtures with air. | | |
| 10.2 Chemical stability | ne product is stable. | | |
| 10.3 Possibility of hazardous reactions | nder normal conditions of storage and use, hazardous reactions will no | t occur. | |
| 10.4 Conditions to avoid | roid the creation of dust when handling and avoid all possible sources opark or flame). | of ignition | |
| | ke precautionary measures against electrostatic discharges. | | |
| | avoid fire or explosion, dissipate static electricity during transfer by ea nding containers and equipment before transferring material. | arthing and | |
| | event dust accumulation. | | |
| 10.5 Incompatible materials | o specific data. | | |
| 10.6 Hazardous decomposition products | nder normal conditions of storage and use, hazardous decomposition p ould not be produced. | products | |

12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

12.6 Other adverse effects : No known significant effects or critical hazards.

SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

13.1 Waste treatment methods

| Product | |
|---------------------|--|
| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non- recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. |
| Hazardous waste | : Within the present knowledge of the supplier, this product is not regarded as a hazardous waste, as defined by regulation on waste management. |
| <u>Waste list</u> | |

| Waste code | Waste code definition |
|------------|-----------------------|
| 08 02 01 | waste coating powders |

Packaging

Methods of disposal

: The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

Date of revision

SECTION 13: Disposal considerations

Special precautions

This material and its container must be disposed of in a safe way. Empty containers ż or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

SECTION 14: Transport information

| • | | | | | | |

Notice to reader

The information in this document is given to the best of Jotun's knowledge, based on laboratory testing and practical experience. Jotun's products are considered as semi-finished goods and as such, products are often used under conditions beyond Jotun's control. Jotun cannot guarantee anything but the quality of the product itself. Minor product variations may be implemented in order to comply with local requirements. Jotun reserves the right to change the given data without further notice.

Users should always consult Jotun for specific guidance on the general suitability of this product for their needs and specific application practices.

If there is any inconsistency between different language issues of this document, the English (United Kingdom) version will prevail.
