Emergency telephone number	: +47 33 45 70 00 Jotun Norway (head office)				

# Section 2. Hazards identification

: Not classified.
: No signal word.
: No known significant effects or critical hazards.
: Not applicable.

# Section 3. Composition/information on ingredients

Substance/mixture	:	Mixture
Other means of	;	Not available.
identification		
<b>CAS number/other identifiers</b>		
CAS number	÷	Not applicable.
EC number	:	Mixture.
Product code	:	51163

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

#### Description of necessary first aid measures

Becomption of neocodary in		
Eye contact		ately flush eyes with plenty of water, occasionally lifting the upper and lower Check for and remove any contact lenses. Get medical attention if irritation
Inhalation	Get med products	e victim to fresh air and keep at rest in a position comfortable for breathing. dical attention if symptoms occur. In case of inhalation of decomposition is in a fire, symptoms may be delayed. The exposed person may need to be der medical surveillance for 48 hours.
Skin contact		ntaminated skin with plenty of water. Remove contaminated clothing and Get medical attention if symptoms occur.
Ingestion	person i	ut mouth with water. If material has been swallowed and the exposed s conscious, give small quantities of water to drink. Do not induce vomiting lirected to do so by medical personnel. Get medical attention if symptoms
Most important symptoms/e	ects, acute	e and delayed
Potential acute health effect		
Eye contact	No knov	vn significant effects or critical hazards.
Inhalation	No knov	vn significant effects or critical hazards.
Skin contact	No knov	vn significant effects or critical hazards.
Ingestion	No knov	vn significant effects or critical hazards.
<u>Over-exposure signs/symp</u>	<u>ms</u>	
Eye contact	No spec	ific data.
Inhalation	No spec	ific data.
Skin contact	No spec	ific data.
Ingestion	No spec	ific data.
Indication of immediate med	al attentio	n and special treatment needed, if necessary
Notes to physician		of inhalation of decomposition products in a fire, symptoms may be delayed. osed person may need to be kept under medical surveillance for 48 hours.
Specific treatments	No spec	ific treatment.
Protection of first-aiders	No actio	n shall be taken involving any personal risk or without suitable training.
See toxicological information	Section 1	1)

# Section 5. Firefighting measures

Extinguishing media	
Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	: None known.

Date of issue	: 31.03.2022	
---------------	--------------	--

# Section 5. Firefighting measures

Specific hazards arising from the chemical	: No specific fire or explosion hazard.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide sulfur oxides halogenated compounds carbonyl halides metal oxide/oxides
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	<ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.</li> </ul>
Fire/explosion hazards	: Fine dust clouds may form explosive mixtures with air.

# Section 6. Accidental release measures

Personal precautions, protec	tiv	e equipment and emergency procedures
For non-emergency personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment.
For emergency responders	:	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Environmental precautions	:	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods and material for cor	<u>ita</u>	inment and cleaning up
Small spill	:	Move containers from spill area. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor.
Large spill	:	Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

# Section 7. Handling and storage

Precautions for safe handling				
Protective measures	:	Put on appropriate personal protective equipment (see Section 8).		
Advice on general occupational hygiene	:	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.		
Conditions for safe storage, including any incompatibilities	:	Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.		

See Technical Data Sheet / packaging for further information.

Date of issue	: 31.03.2022		
---------------	--------------	--	--

# Section 8. Exposure controls/personal protection

#### **Control parameters Occupational exposure limits** Dust Limit : 10 mg/m<sup>3</sup> (TWA of total inhalable dust) and 4 mg/m<sup>3</sup> (TWA of respirable) : If this product contains ingredients with exposure limits, personal, workplace **Recommended monitoring** atmosphere or biological monitoring may be required to determine the effectiveness procedures of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required. : Good general ventilation should be sufficient to control worker exposure to airborne Appropriate engineering contaminants. controls **Environmental exposure** : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some controls cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. Individual protection measures **Hygiene measures** : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. Eye protection : Safety eyewear complying to EN 166 should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with sideshields. Skin protection Hand protection : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals. The breakthrough time must be greater than the end use time of the product. The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed. Gloves should be replaced regularly and if there is any sign of damage to the glove material. Always ensure that gloves are free from defects and that they are stored and used correctly. The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance. Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred. Wear suitable gloves tested to EN374. Recommended, gloves(breakthrough time) > 8 hours: PVC, nitrile rubber, neoprene May be used, gloves(breakthrough time) 4 - 8 hours: polyvinyl alcohol (PVA) **Body protection** : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Other skin protection : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**Respiratory protection** : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

# Section 9. Physical and chemical properties

Appearance		
Physical state	1	Solid. Powder.
Colour	1	Various colours.
Odour	1	Odourless.
Odour threshold	1	Not available.
рН	:	Not applicable.
Melting point	1	Not applicable.
Boiling point	:	Not available.
Flash point	:	Not applicable.
Burning time	1	Not available.
Burning rate	1	Not available.
Evaporation rate	:	Not available.
Flammability (solid, gas)	1	Not applicable.
Minimum ignition energy (mJ)	:	10 - 30
Lower explosion limit	:	30 g/m³
Vapour pressure	:	Not available.
Vapour density	:	Not available.
Relative density	:	1.2 to 1.9 g/cm <sup>3</sup>
Solubility	:	Insoluble in the following materials: cold water and hot water.
Partition coefficient: n- octanol/water	:	Not available.
Auto-ignition temperature	1	> 400°C
Decomposition temperature	1	>250°C (>482°F)
SADT	:	Not available.
Viscosity	:	Not applicable.

# Section 10. Stability and reactivity

Reactivity	lo specific test data related to reactivity available for this product or its in	gredients.
Chemical stability	he product is stable.	
Possibility of hazardous reactions	Inder normal conditions of storage and use, hazardous reactions will not	t occur.
Conditions to avoid	lo specific data.	
Incompatible materials	lot applicable.	
Hazardous decomposition products	Inder normal conditions of storage and use, hazardous decomposition p hould not be produced.	roducts
Eine duch deute an auferna au		

Fine dust clouds may form explosive mixtures with air.

### Section 11. Toxicological information

#### Information on toxicological effects

#### **Acute toxicity**

Not available.

rr	ita	ti	on	<u>/C</u>	or	ro	si	or	1

Not available.

#### **Sensitisation**

Not available.

#### **Mutagenicity**

Not available.

#### **Carcinogenicity**

Date of issue	: 31.03.2022
---------------	--------------

# Section 11. Toxicological information

Not available.

#### **Reproductive toxicity**

Not available.

#### **Teratogenicity**

Not available.

#### Specific target organ toxicity (single exposure)

Not available.

#### Specific target organ toxicity (repeated exposure)

Not available.

#### Aspiration hazard

Not available.

#### Information on likely routes : Not available. of exposure

Potential acute health effects

Eye contact	: No known significant effects or critical hazards.
Inhalation	: No known significant effects or critical hazards.
Skin contact	: No known significant effects or critical hazards.
Ingestion	: No known significant effects or critical hazards.

#### Symptoms related to the physical, chemical and toxicological characteristics

Eye contact	: No specific data.
Inhalation	: No specific data.
Skin contact	: No specific data.
Ingestion	: No specific data.

#### Delayed and immediate effects as well as chronic effects from short and long-term exposure

Short term exposure					
Potential immediate effects	: Not available.				
Potential delayed effects	: Not available.				
<u>Long term exposure</u>					
Potential immediate effects	: Not available.				
Potential delayed effects	: Not available.				
Potential chronic health effe	<u>cts</u>				
Not available.					
General	: No known significant effects or critical hazards.				
Carcinogenicity	: No known significant effects or critical hazards.				
Mutagenicity	: No known significant effects or critical hazards.				
Teratogenicity	: No known significant effects or critical hazards.				
<b>Developmental effects</b>	: No known significant effects or critical hazards.				
Fertility effects	: No known significant effects or critical hazards.				

### Numerical measures of toxicity

Acute toxicity estimates

Not available.

# Section 11. Toxicological information

# Section 12. Ecological information

**Toxicity** 

Not available.

#### Persistence/degradability

Not available.

#### **Bioaccumulative potential**

Not available.

Mobility in soil Soil/water partition coefficient (K <sub>oc</sub> )	:	Not available.
Other adverse effects	:	No known significant effects or critical hazards.

### Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

# Section 14. Transport information

**Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

	UN	IMDG	ΙΑΤΑ		
UN number	Not regulated.	Not regulated.	Not regulated.		
UN proper shipping name	-	-	-		
Transport hazard class(es)	-	-	-		
Packing group	-	-	-		
Environmental hazards	No.	No.	No.		
Date of issue : 31.03.2022					

# Section 14. Transport information

Special precautions for user	Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.	Transport within user's premises: always transport in closed containers that are upright and secure. ### Section 15. Regulatory information

#### Safety, health and environmental regulations specific for the product:

#### Law of the People's Republic of China on the Prevention and Control of Occupational Diseases

Regulations on the Control over Safety of Dangerous Chemicals

Measures for Environmental Management of New Chemical Substances

Law of the People's Republic of China on the Prevention and Control of Environment Pollution Caused by Solid Wastes Safety regulations for the use of chemicals in the workplace

General Rule for Classification and Hazard Communication of Chemicals

Classification and code of dangerous goods

#### List of Goods banned for Importing

None of the components are listed.

#### List of Goods banned for Exporting

None of the components are listed.

#### List of Toxic Chemicals Severely Restricted for Importing & Exporting by China

None of the components are listed.
