# SAFETY DATA SHEET

# **Jotatop Pro Comp B**

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product identifier        |                      |
|-------------------------------|----------------------|
| Product name                  | : Jotatop Pro Comp B |
| Product code                  | : 52203              |
| Product description           | : Hardener.          |
| Product type                  | : Liquid.            |
| Other means of identification | : Not available.     |

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Use in coatings - Professional use

#### 1.3 Details of the supplier of the safety data sheet

| Jotun A/S                      | Jotun Paints (Europe) Ltd. |
|--------------------------------|----------------------------|
| P.O.Box 2021                   | Stather Road               |
| 3202 Sandefjord                | Flixborough, Scunthorpe    |
| Norway                         | North Lincolnshire         |
| Tel: + 47 33 45 70 00          | DN15 8RR                   |
| Fax: +47 33 45 72 42           | England                    |
| E-mail: SDSJotun@jotun.no      | -                          |
|                                | Tel: +44 17 24 40 00 00    |
|                                | Fax: +44 17 24 40 01 00    |
| 1 4 Emergency telephone number |                            |

#### 1.4 Emergency telephone number

| National advisory body/Poison Centre |  |  |  |  |
|--------------------------------------|--|--|--|--|
| Telephone number                     | : Contact NHS Direct; phone 0845 4647 or 111. Open 24/7. |  |  |  |

#### **Supplier**

**Telephone number** 

: +47 33 45 70 00 Jotun Norway (head office)

## **SECTION 2: Hazards identification**

2.1 Classification of the substance or mixture

**Product definition** : Mixture

#### **Classification according to UK CLP/GHS**

Flam. Liq. 3, H226 Eye Dam. 1, H318 Aquatic Chronic 3, H412

The product is classified as hazardous according to UK CLP Regulation SI 2019/720 as amended.

See Section 16 for the full text of the H statements declared above.

ŝ

See Section 11 for more detailed information on health effects and symptoms.

### 2.2 Label elements

Hazard pictograms

Signal word

: Danger.

| <b>SECTION 2: Hazards</b>   | ic  | Jentification   |
|---|-----|---|
| Hazard statements   | :   | H226 - Flammable liquid and vapour.<br>H318 - Causes serious eye damage.<br>H412 - Harmful to aquatic life with long lasting effects.   |
| Precautionary statements  |     |   |
| General   | :   | Not applicable.   |
| Prevention  | :   | P280 - Wear eye or face protection.<br>P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition<br>sources. No smoking.<br>P273 - Avoid release to the environment.             |
| Response  | :   | P305 + P351 + P338, P310 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor. |
| Storage   | 1   | Not applicable.   |
| Disposal  | 1   | P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Supplemental label<br>elements  | 1   | Not applicable.   |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | :   | Not applicable.   |
| Special packaging requirem  | ner | <u>its</u>  |
| Containers to be fitted<br>with child-resistant<br>fastenings   | :   | Not applicable.   |
| Tactile warning of danger   | 1   | Not applicable.   |
| 2.3 Other hazards   |     |   |
| Product meets the criteria<br>for PBT or vPvB according<br>to Regulation (EC) No.<br>1907/2006, Annex XIII  | :   | This mixture does not contain any substances that are assessed to be a PBT or a vPvB.   |
| Other hazards which do not result in classification   | :   | None known.   |

# **SECTION 3: Composition/information on ingredients**

| 3.2 Mixtures :                                       | Mixture   |           |   |         |
|--|---|-----------|---|---------|
| Product/ingredient name                              | Identifiers   | %         | Classification  | Туре    |
| silane, trimethyoxy[3-(oxiranyl-<br>methoxy)propyl]- | REACH #:<br>01-2119513212-58<br>EC: 219-784-2<br>CAS: 2530-83-8 | ≥25 - ≤50 | Eye Dam. 1, H318<br>Aquatic Chronic 3,<br>H412                                | [1]     |

|  |   |           | See Section 16 for<br>the full text of the H<br>statements declared<br>above. |         |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

# **SECTION 3: Composition/information on ingredients**

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

## **SECTION 4: First aid measures**

| 4.1 Description of first aid r | neasures   |
|--------------------------------|--|
| Eye contact                    | : Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.   |
| Inhalation                     | : Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.  |
| Skin contact                   | : Get medical attention immediately. Call a poison center or physician. Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
| Ingestion                      | : Get medical attention immediately. Call a poison center or physician. Wash out<br>mouth with water. Remove dentures if any. If material has been swallowed and the<br>exposed person is conscious, give small quantities of water to drink. Stop if the<br>exposed person feels sick as vomiting may be dangerous. Do not induce vomiting<br>unless directed to do so by medical personnel. If vomiting occurs, the head should<br>be kept low so that vomit does not enter the lungs. Chemical burns must be treated<br>promptly by a physician. Never give anything by mouth to an unconscious person.<br>If unconscious, place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband. |
| Protection of first-aiders     | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.  |

#### 4.2 Most important symptoms and effects, both acute and delayed

| Over-exposure signs/sym        | <u>ptoms</u>   |
|--------------------------------|--|
| Eye contact                    | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness   |
| Inhalation                     | : No specific data.  |
| Skin contact                   | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur                         |
| Ingestion                      | : Adverse symptoms may include the following:<br>stomach pains   |
| 4.3 Indication of any immed    | iate medical attention and special treatment needed  |
| Notes to physician             | : Treat symptomatically. Contact poison treatment specialist immediately if large<br>quantities have been ingested or inhaled. |
| Specific treatments            | : No specific treatment.   |
| Date of issue/Date of revision | : 05.04.2024 Date of previous issue : 08.11.2023 Version : 1.01  |

### **SECTION 4: First aid measures**

See toxicological information (Section 11)

## **SECTION 5: Firefighting measures**

| 5.1 Extinguishing media                           |      |  |
|---|------|--|
| Suitable extinguishing media                      | :    | Recommended: alcohol-resistant foam, CO <sub>2</sub> , powders, water spray.   |
| Unsuitable extinguishing media                    | :    | Do not use water jet.  |
| 5.2 Special hazards arising f                     | irom | the substance or mixture   |
| Hazards from the substance or mixture             | :    | Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is harmful to aquatic life with long<br>lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |
| Hazardous combustion products                     | :    | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>metal oxide/oxides   |
| 5.3 Advice for firefighters                       |      |  |
| Special protective actions for fire-fighters      | :    | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |
| Special protective<br>equipment for fire-fighters | :    | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

### **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro  | ote | ctive equipment and emergency procedures  |
|--------------------------------|-----|---|
| For non-emergency<br>personnel | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Do not breathe vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
| For emergency responders       | -   | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| 6.2 Environmental precautions  | :   | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful<br>to the environment if released in large quantities.   |
| 6.3 Methods and material for   | СС  | entainment and cleaning up  |
| Small spill                    | 1   | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble.   |

### SECTION 6: Accidental release measures

| Large spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |
|---------------------------------|--|
| 6.4 Reference to other sections | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

### SECTION 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures                    | : Put on appropriate personal protective equipment (see Section 8). Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

#### Seveso Directive - Reporting thresholds

#### **Danger criteria**

| Category | Notification and MAPP threshold | Safety report threshold |
|----------|---------------------------------|-------------------------|
| P5c      | 5000 tonne                      | 50000 tonne             |

See Technical Data Sheet / packaging for further information.

#### 7.3 Specific end use(s)

: Not available.

#### **Recommendations Industrial sector specific** solutions

: Not available.

Date of issue/Date of revision

# **SECTION 8: Exposure controls/personal protection**

#### 8.1 Control parameters

#### **Occupational exposure limits**

| Product/ingredient name | Exposure limit values   |
|-------------------------|---|
| n-butyl acetate         | EH40/2005 WELs (United Kingdom (UK), 1/2020).<br>STEL: 966 mg/m <sup>3</sup> 15 minutes.<br>STEL: 200 ppm 15 minutes.<br>TWA: 724 mg/m <sup>3</sup> 8 hours.<br>TWA: 150 ppm 8 hours. |

#### **Biological exposure indices**

No exposure indices known.

| Recommended monitoring | : Reference should be made to appropriate monitoring standards. Reference to |
|------------------------|--|
| procedures             | national guidance documents for methods for the determination of hazardous   |
|                        | substances will also be required.  |

#### **DNELs/DMELs**

| Product/ingredient name          | Туре  | Exposure                | Value                  | Population  | Effects                                 |
|----------------------------------|-------|-------------------------|------------------------|-------------|---|

#### **PNECs**

| Product/ingredient name | Compartment Detail    | Value            | Method Detail |
|-------------------------|-----------------------|------------------|---------------|
| n-butyl acetate         | Fresh water           | 0.18 mg/l        | -             |
| -                       | Marine                | 0.018 mg/l       | -             |
|                         | Sewage Treatment      | 35.6 mg/l        | -             |
|                         | Plant                 |                  |               |
|                         | Fresh water sediment  | 0.981 mg/kg dwt  | -             |
|                         | Marine water sediment | 0.0981 mg/kg dwt | -             |
|                         | Soil                  | 0.0903 mg/kg dwt | -             |

#### 8.2 Exposure controls

Appropriate engineering controls : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

#### Individual protection measures

| Hygiene measures :    | Wash hands, forearms and face thoroughly after handling chemical products,<br>before eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location.                                      |
|-----------------------|--|
| Eye/face protection : | Safety eyewear complying to ISO 16321-1:2022 should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield. If inhalation hazards exist, a full-face respirator may be required instead. |

#### Skin protection

#### Hand protection

There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals.

The breakthrough time must be greater than the end use time of the product.

The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed.

Gloves should be replaced regularly and if there is any sign of damage to the glove material.

Always ensure that gloves are free from defects and that they are stored and used correctly.

The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance.

Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.

#### Gloves

## **SECTION 8: Exposure controls/personal protection**

Wear suitable gloves tested to ISO 374-1:2016.

Recommended, gloves(breakthrough time) > 8 hours: Teflon (> 0.35 mm), polyvinyl alcohol (PVA) (> 0.3 mm) May be used, gloves(breakthrough time) 4 - 8 hours: 4H/Silver Shield® (> 0.07 mm), butyl rubber (> 0.4 mm), PVC (> 0.5 mm)

Not recommended, gloves(breakthrough time) < 1 hour: nitrile rubber (> 0.75 mm), neoprene (> 0.35 mm), Viton® (> 0.7 mm)

For right choice of glove materials, with focus on chemical resistance and time of penetration, seek advice by the supplier of chemical resistant gloves.

The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment.

| Body protection                 | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves. |
|---------------------------------|---|
|                                 | chemical-resistant protective suit / disposable overall   |
| Other skin protection           | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection          | : If workers are exposed to concentrations above the exposure limit, they must use a respirator according to EN 140. Use respiratory mask with charcoal and dust filter when spraying this product, according to EN 14387 (as filter combination A2-P2). In confined spaces, use compressed-air or fresh-air respiratory equipment. When use of roller or brush, consider use of charcoalfilter.                              |
| Environmental exposure controls | : Do not allow to enter drains or watercourses.   |

### **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### 9.1 Information on basic physical and chemical properties

| <u>Appearance</u>                            |  |

| Oxidising properties                           | : | Not available.  |
| Particle characteristics                       |   |   |
| Median particle size                           | ; | Not applicable.   |
|  |   |   |

#### 9.2 Other information

No additional information.

### **SECTION 10: Stability and reactivity**

| 10.1 Reactivity                            | Io specific test data related to reactivity available for this product or its i                                       | ngredients. |
|--|---|-------------|
| 10.2 Chemical stability                    | Stable under recommended storage and handling conditions (see Section   | on 7).      |
| 10.3 Possibility of<br>hazardous reactions | Inder normal conditions of storage and use, hazardous reactions will no   | ot occur.   |
| 10.4 Conditions to avoid                   | When exposed to high temperatures may produce hazardous decompo<br>products.  | sition      |
| 10.5 Incompatible materials                | Keep away from the following materials to prevent strong exothermic reaxidising agents, strong alkalis, strong acids. | actions:    |
| 10.6 Hazardous<br>decomposition products   | Decomposition products may include the following materials: carbon mo<br>arbon dioxide, smoke, oxides of nitrogen.    | onoxide,    |

In contact with water, the product hydrolyses; during curing, releases Methanol. If the product is contaminated with water during production, transportation or storage, this may effect both flashpoint and hazard potential.

## **SECTION 11: Toxicological information**

#### 11.1 Information on toxicological effects

#### Acute toxicity

| Product/ingredient name | Result   | Species | Dose                                      | Exposure          |

| silane, trimethyoxy[3-<br>(oxiranyl-methoxy)propyl]- | Eyes - Irritant | Mammal -<br>species<br>unspecified | -     | -        | -           |

#### **Sensitisation**

Based on available data, the classification criteria are not met.

#### **Mutagenicity**

No known significant effects or critical hazards.

# **SECTION 11: Toxicological information**

#### **Carcinogenicity**

No known significant effects or critical hazards.

#### Reproductive toxicity

- **Developmental effects**
- : No known significant effects or critical hazards.
- : No known significant effects or critical hazards.

#### Fertility effects Teratogenicity

No known significant effects or critical hazards.

#### Specific target organ toxicity (single exposure)

| Product/ingredient name | Category   | Route of exposure | Target organs    |
|-------------------------|------------|-------------------|------------------|
| n-butyl acetate         | Category 3 | -                 | Narcotic effects |

#### Specific target organ toxicity (repeated exposure)

Not available.

#### Aspiration hazard

Not available.

#### Potential acute health effects

| Eye contact                  | Causes serious eye damage.   |
|------------------------------|--|
| Inhalation                   | No known significant effects or critical hazards.  |
|                              |  |
| Skin contact                 | No known significant effects or critical hazards.  |
| Ingestion                    | No known significant effects or critical hazards.  |
| Symptoms related to the phys | cal, chemical and toxicological characteristics  |
| Eye contact                  | Adverse symptoms may include the following:<br>pain<br>watering<br>redness                           |
| Inhalation                   | No specific data.  |
| Skin contact                 | Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur |
| Ingestion                    | Adverse symptoms may include the following: stomach pains  |
| General                      | No known significant effects or critical hazards.  |
| Other information            | None identified.   |

### **SECTION 12: Ecological information**

#### 12.1 Toxicity

There are no data available on the mixture itself. Do not allow to enter drains or watercourses.

The mixture has been assessed following the summation method of the CLP Regulation (EC) No 1272/2008 and is classified for eco-toxicological properties accordingly. See Sections 2 and 3 for details.

#### **Conclusion/Summary** : This material is harmful to aquatic life with long lasting effects.

#### 12.2 Persistence and degradability

| Conclusion/Summary | : Not available. |

|--------------------|------------------|

| Product/ingredient name                              | Aquatic half-life | Photolysis | Biodegradability |
|--|-------------------|------------|------------------|
| silane, trimethyoxy[3-<br>(oxiranyl-methoxy)propyl]- | -                 | -          | Not readily      |

#### 12.3 Bioaccumulative potential

# **SECTION 12: Ecological information**

| Product/ingredient name | LogPow | BCF | Potential |
|-------------------------|--------|-----|-----------|
| n-butyl acetate         | 2.3    | -   | low       |

#### 12.4 Mobility in soil

| Soil/water partition | : Not available. |
|----------------------|------------------|
| coefficient (Koc)    |                  |
| Mobility             | : Not available. |

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

12.6 Other adverse effects : No known significant effects or critical hazards.

### **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### **13.1 Waste treatment methods**

| io. i waste treatment met |   |
|---------------------------|---|
| Product                   |   |
| Methods of disposal       | : The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation and<br>any regional local authority requirements. Dispose of surplus and non-recyclable<br>products via a licensed waste disposal contractor. Waste should not be disposed of<br>untreated to the sewer unless fully compliant with the requirements of all authorities<br>with jurisdiction. |
| Hazardous waste           | : Yes.  |
| Waste catalogue           |   |
| Waste code                | Waste designation   |
| 08 01 11*                 | Waste paint and varnish containing organic solvents or other dangerous substances   |
| Packaging                 |   |
| Methods of disposal       | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.  |
| Type of packaging         | Waste catalogue   |
| CEPE Guidelines           | 15 01 10*packaging containing residues of or contaminated by<br>hazardous substances  |
| Special precautions       | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.         |

### **SECTION 15: Regulatory information**

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture <u>UK (GB)/REACH</u>

Annex XIV - List of substances subject to authorisation

### Annex XIV

None of the components are listed.

#### Substances of very high concern

None of the components are listed.

#### **Ozone depleting substances**

Not listed.

#### Prior Informed Consent (PIC)

Not listed.

#### Persistent Organic Pollutants Not listed.

Annex XVII - Restrictions : Not applicable. on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

# **SECTION 15: Regulatory information**

#### Seveso Directive

This product is controlled under the Seveso Directive.

| This product is controlled<br>Danger criteria   | under the Seveso Directive.  |
