

Jotun Thinner No. 25

SDS Number: AA00319-0000000243

In accordance with the Standard for Classification and Labeling of Chemical Substance and Safety Data Sheet, Article 10 Paragraph 1

Section 1. Chemical product and company identification

| Α. | Product name | : Jotun Thinner No. 25 |
|----|----------------------------|------------------------|
| | Product code | : 556 |
| | Product description | : Solvent. |

B. Relevant identified uses of the substance or mixture and uses advised against

| C. Manufacturer | : Chokwang Jotun Ltd. 96, Gwahaksandan 1-ro Gangseo-gu, Busan South Korea Tel: +82 51 797 6000 Fax: +82 51 711 7735 SDSJotun@jotun.com |
|----------------------------|--|
| Emergency telephone number | : H.G.LEE Chokwang Jotun Ltd. Tel: +82 51 797 6000 |

Section 2. Hazards identification

| A. Hazard classification | FLAMMABLE LIQUIDS - Category 3 SKIN IRRITATION - Category 2 EYE IRRITATION - Category 2A SPECIFIC TARGET ORGAN TOXICITY - SINGLE EXPOSURE (Narcotic effects) - Category 3 LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 3 |
|--------------------------|---|
| | This product is classified in accordance with the Industrial Safety and Health Act and the Chemical Control Act. |

B. GHS label elements, including precautionary statements ż

Symbol

| Signal word | ng. | |
|--------------------------|---|--|
| Hazard statements | Flammable liquid and vapour. Causes skin irritation. Causes serious eye irritation. May cause drowsiness or dizziness. Harmful to aquatic life with long lasting effects. | |
| Precautionary statements | | |
| Prevention | Wear protective gloves, protective clothing and eye or face prote Keep away from heat, hot surfaces, sparks, open flames and oth es. No smoking. Use only outdoors or in a well-ventilated area. Avoid release to the environment. Avoid breathing vapour. Wash hands thoroughly after handling. | |

Section 2. Hazards identification

| Response | P304 + P340, P312 - IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or doctor if you feel unwell. P303 + P361 + P353 - IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water. P302 + P352 - IF ON SKIN: Wash with plenty of water. P332 + P313 - If skin irritation occurs: Get medical advice or attention. P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. |
|----------|---|
| | Remove contact lenses, if present and easy to do. Continue rinsing. P337 + P313 - If eye irritation persists: Get medical advice or attention. |
| Storage | P405 - Store locked up. P403 + P233 - Store in a well-ventilated place. Keep container tightly closed. |
| Disposal | P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations. |

| \mathbf{r} | |
|--------------|--|
| J | |

| Other hazards which do | : None known. |
|------------------------|---------------|
| not result in | |
| classification | |

Section 3. Composition/information on ingredients

| Substance/mixture | : Mixture |
|-------------------|------------------|
| Other means of | : Not available. |
| identification | |

| Ingredient name | Common name | Identifiers | % |
|---------------------------------|---------------------------------|-----------------|-----------|
| 2-methoxy-1-methylethyl acetate | 2-methoxy-1-methylethyl acetate | CAS: 108-65-6 | ≥45 - ≤50 |
| n-butyl acetate | n-butyl acetate | CAS: 123-86-4 | ≥25 - ≤30 |
| xylene | xylene | CAS: 1330-20-7 | ≥15 - <20 |
| ethylbenzene | ethylbenzene | CAS: 100-41-4 | <10 |
| 2-methoxypropyl acetate | 2-methoxypropyl acetate | CAS: 70657-70-4 | <0.3 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

| Α. | Eye contact | : | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention. |
|----|--------------|---|---|
| В. | Skin contact | : | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse. |
| C. | Inhalation | : | Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or |

Section 4. First aid measures

waistband.

| D. | Ingestion | : | Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. If necessary, call a poison center or physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
|----|----------------------------|---|---|
| Ε. | Notes to physician | : | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. |
| | Specific treatments | : | No specific treatment. |
| | Protection of first-aiders | : | No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |

See toxicological information (Section 11)

Section 5. Firefighting measures

| Α. | Extinguishing media | | |
|----|---|---|--|
| | Suitable extinguishing media | 1 | Use dry chemical, CO ₂ , water spray (fog) or foam. |
| | Unsuitable extinguishing media | : | Do not use water jet. |
| в. | Specific hazards arising from the chemical | : | Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is harmful to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| | Hazardous thermal decomposition products | : | Decomposition products may include the following materials: carbon dioxide carbon monoxide |
| C. | Special protective equipment for fire- fighters | : | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |
| | Special precautions for fire-fighters | : | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |

Section 6. Accidental release measures

| Α. | Personal precautions, | 1 | No action shall be taken involving any personal risk or without suitable training. |
|----|-----------------------|---|---|
| | protective equipment | | Evacuate surrounding areas. Keep unnecessary and unprotected personnel from |
| | and emergency | | entering. Do not touch or walk through spilt material. Shut off all ignition sources. |
| | procedures | | No flares, smoking or flames in hazard area. Avoid breathing vapour or mist. |
| | | | Provide adequate ventilation. Wear appropriate respirator when ventilation is |
| | | | inadequate. Put on appropriate personal protective equipment. |

Section 6. Accidental release measures

| В. | Environmental : precautions | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. |
|----|--------------------------------|--|
| С. | Methods and material for c | ontainment and cleaning up |
| | Small spill : | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. |
| | Large spill : | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

Section 7. Handling and storage

| Α. | Precautions for safe hand | dlin | g |
|----|--|------|---|
| | Protective measures | | Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapour or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
| | Advice on general occupational hygiene | | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. |
| в. | Conditions for safe storage, including any incompatibilities | | Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |

Section 8. Exposure controls/personal protection

A. <u>Control parameters</u>

Occupational exposure limits

Section 8. Exposure controls/personal protection

| Ingredient name | Exposure limits |
|-----------------|---|
| n-butyl acetate | Ministry of Employment and Labor |
| | (Republic of Korea, 1/2020). |
| | STEL: 200 ppm 15 minutes. |
| | TWA: 150 ppm 8 hours. |
| xylene | Ministry of Employment and Labor |
| | (Republic of Korea, 1/2020). [Xylene (all |
| | isomers)] |
| | STEL: 150 ppm 15 minutes. |
| | TWA: 100 ppm 8 hours. |
| ethylbenzene | Ministry of Employment and Labor |
| | (Republic of Korea, 1/2020). |
| | STEL: 125 ppm 15 minutes. |
| | TWA: 100 ppm 8 hours. |

| В. | Appropriate engineering controls | : | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment. |
|----|------------------------------------|---|--|
| | Environmental exposure controls | - | Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. |

C. Personal protective equipment

| Eye protection: Use safety eyewar designed to protect against splash of liquids.Hand protection: There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals. The breakthrough time must be greater than the end use time of the product. The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed. Gloves should be replaced regularly and if there is any sign of damage to the glove material. Always ensure that gloves are free from defects and that they are stored and used correctly. The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance. Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred. Wear suitable gloves tested to ISO 374-1:2016. Not recommended, gloves(breakthrough time) 4 - 8 hours: Viton® (> 0.75 mm) May be used, gloves(breakthrough time) > 8 hours: 4H/Silver Shield® (> 0.07 mm), Teflon (> 0.35 mm), polyvinyl alcohol (PVA) (> 0.3 mm)For right choice of glove materials, with focus on chemical resistance and time of penetration, seek advice by the supplier of chemical resistant gloves. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment. | Respiratory protection | : If workers are exposed to concentrations above the exposure limit, they must use a respirator according to EN 140. Use respiratory mask with charcoal and dust filter when spraying this product, according to EN 14387(as filter combination A2-P2). In confined spaces, use compressed-air or fresh-air respiratory equipment. When use of roller or brush, consider use of charcoalfilter. |
|--|------------------------|---|
| resistance to any individual or combination of chemicals. The breakthrough time must be greater than the end use time of the product. The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed. Gloves should be replaced regularly and if there is any sign of damage to the glove material. Always ensure that gloves are free from defects and that they are stored and used correctly. The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance. Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred. Wear suitable gloves tested to ISO 374-1:2016. Not recommended, gloves(breakthrough time) < 1 hour: neoprene (> 0.35 mm) May be used, gloves(breakthrough time) < 4 - 8 hours: Viton® (> 0.7 mm), nitrile rubber (> 0.75 mm), butyl rubber (> 0.4 mm), PVC (> 0.5 mm) Recommended, gloves(breakthrough time) > 8 hours: 4H/Silver Shield® (> 0.07 mm), Teflon (> 0.35 mm), polyvinyl alcohol (PVA) (> 0.3 mm) For right choice of glove materials, with focus on chemical resistance and time of penetration, seek advice by the supplier of chemical resistant gloves. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of | Eye protection | : Use safety eyewear designed to protect against splash of liquids. |

Section 8. Exposure controls/personal protection

| Body protection | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. |
|------------------|---|
| Hygiene measures | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. |
| | |

Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

| Α. | <u>Appearance</u> | | |
|----|---|---|--|
| | Physical state | : | Liquid. |
| | Colour | : | Clear. |
| В. | Odour | : | Characteristic. |
| С. | Odour threshold | : | Not applicable. |
| D. | рН | 1 | Not applicable. |
| Ε. | Melting/freezing point | 1 | Not applicable. |
| F. | Boiling point, initial boiling point, and boiling range | : | Lowest known value: 126°C (258.8°F) (n-butyl acetate). Weighted average: 138.43°C (281.2°F) |
| G. | Flash point | 1 | Closed cup: 30°C |
| н. | Evaporation rate | : | Highest known value: 1 (n-butyl acetate) Weighted average: 0.6compared with butyl acetate |
| П. | Flammability (solid, gas) | 1 | Not applicable. |
| J. | Lower and upper explosive (flammable) limits | : | 0.8 - 7.6% |
| К. | Vapour pressure | : | Highest known value: 1.5 kPa (11.3 mm Hg) (at 20°C) (n-butyl acetate). Weighted average: 0.82 kPa (6.15 mm Hg) (at 20°C) |
| L. | Solubility | : | cold water Not soluble hot water Not soluble |
| Μ. | Vapour density | : | Highest known value: 4.6 (Air = 1) (2-methoxy-1-methylethyl acetate). Weighted average: 4.22 (Air = 1) |
| Ν. | Relative density | : | 0.92 g/cm ³ |
| 0. | Partition coefficient: n- octanol/water | : | Not available. |
| Ρ. | Auto-ignition temperature | : | Lowest known value: 333°C (631.4°F) (2-methoxy-1-methylethyl acetate). |
| Q. | Decomposition temperature | : | Not available. |
| R. | Viscosity | 1 | Kinematic (40°C (104°F)): >20.5 mm²/s (>20.5 cSt) |
| S. | Molecular weight | : | Not applicable. |
| Pa | rticle characteristics | | |
| Me | edian particle size | : | Not applicable. |

Section 10. Stability and reactivity

| | | - | - |
|----|-------------------------------------|---|---|
| Α. | Chemical stability | 1 | The product is stable. |
| | Possibility of hazardous reactions | : | Under normal conditions of storage and use, hazardous reactions will not occur. |
| В. | Conditions to avoid | : | Avoid all possible sources of ignition (spark or flame). Do not pressurise, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. |
| C. | Incompatible materials | : | Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids. |
| D. | Hazardous decomposition products | : | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

Section 11. Toxicological information

| | | | 9.00 |
|----|---|-----|---|
| Α. | Information on likely routes of exposure | : | Not available. |
| | Potential acute health eff | ect | <u>'S</u> |
| | Inhalation | : | May cause drowsiness or dizziness. |
| | Ingestion | : | No known significant effects or critical hazards. |
| | Skin contact | : | Causes skin irritation. |
| | Eye contact | : | Causes serious eye irritation. |
| | Over-exposure signs/syn | npt | oms |
| | Inhalation | : | Adverse symptoms may include the following: nausea or vomiting headache drowsiness/fatigue dizziness/vertigo unconsciousness |
| | Ingestion : | | No specific data. |
| | Skin contact | : | Adverse symptoms may include the following: irritation redness |
| | Eye contact | : | Adverse symptoms may include the following: |

pain or irritation watering redness

B. <u>Health hazards</u>

Acute toxicity

| Product/ingredient name | Result | Species | Dose | Exposure |
|---------------------------------|------------------------|------------|--------------|----------|
| 2-methoxy-1-methylethyl acetate | LD50 Dermal | Rabbit | >5 g/kg | - |
| | LD50 Oral | Rat | 8532 mg/kg | - |

| xylene | 3.12 | 8.1 to 25.9 | low |
| ethylbenzene | 3.6 | - | low |

D. Mobility in soil

Soil/water partition : Not available. coefficient (Koc)

E. Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

A. Disposal methods

: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

Section 13. Disposal considerations

B. Disposal precautions

: This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
