

# Tankguard DW Comp B

| Section 1. Identification     |   |
|-------------------------------|---|
| Product name                  | : Tankguard DW Comp B   |
| Product code                  | : 9441  |
| Product description           | : Hardener.   |
| Product type                  | : Liquid.   |
| Other means of identification | : Not available.  |
| Supplier's details            | : Jotun South Africa (PTY) Ltd<br>P.O.Box 187, Blackheath 7581,<br>Cape Town 8000 |
|                               | Tel: +27 21 941 8800<br>Fax: +27 21 941 8700                                      |
|                               | SDSJotun@jotun.com  |
| Emergency telephone<br>number | : 24 hour toll free number Environserve Hazmat: 0800 147 112                      |

# Section 2. Hazards identification

| Classification of the substance or mixture | : ACUTE TOXICITY (oral) - Category 4<br>SKIN CORROSION/IRRITATION - Category 1B<br>SERIOUS EYE DAMAGE/EYE IRRITATION - Category 1<br>SKIN SENSITISATION - Category 1<br>SHORT-TERM (ACUTE) AQUATIC HAZARD - Category 1<br>LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 2   |
|--|---|
| GHS label elements                         |   |
| Hazard pictograms                          |   |
| Signal word                                | : Danger.   |
| Hazard statements                          | <ul> <li>H302 - Harmful if swallowed.</li> <li>H314 - Causes severe skin burns and eye damage.</li> <li>H317 - May cause an allergic skin reaction.</li> <li>H400 - Very toxic to aquatic life.</li> <li>H411 - Toxic to aquatic life with long lasting effects.</li> </ul> |
| Precautionary statements                   |   |
| Prevention                                 | <ul> <li>P280 - Wear protective gloves, protective clothing and eye or face protection.</li> <li>P273 - Avoid release to the environment.</li> <li>P261 - Avoid breathing vapour.</li> <li>P270 - Do not eat, drink or smoke when using this product.</li> </ul>            |

### Section 2. Hazards identification

| Response | <ul> <li>P391 - Collect spillage.</li> <li>P304 + P310 - IF INHALED: Immediately call a POISON CENTER or doctor.</li> <li>P301 + P310, P330, P331 - IF SWALLOWED: Immediately call a POISON</li> <li>CENTER or doctor. Rinse mouth. Do NOT induce vomiting.</li> <li>P303 + P361 + P353, P310 - IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water. Immediately call a POISON CENTER or doctor.</li> <li>P363 - Wash contaminated clothing before reuse.</li> <li>P302 + P352 - IF ON SKIN: Wash with plenty of water.</li> <li>P333 + P313 - If skin irritation or rash occurs: Get medical advice or attention.</li> <li>P305 + P351 + P338, P310 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor.</li> </ul> |
|----------|--|
| Storage  | : Not applicable.  |
| Disposal | : P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.   |

| Other hazards which do not |  | None known. |
|----------------------------|--|-------------|
| result in classification   |  |             |

# Section 3. Composition/information on ingredients

| Substance/mixture             | : Mixture        |
|-------------------------------|------------------|
| Other means of identification | : Not available. |

| CAS number/other identifiers |   |                 |
|------------------------------|---|-----------------|
| CAS number                   | : | Not applicable. |
| EC number                    | : | Mixture.        |
| Product code                 | ÷ | 9441            |

| Ingredient name  | %         | CAS number   |
|--|-----------|--------------|
| Carbomonocyclic alkylated mixtures of poly-aza-alkanes, hydrogenated | ≥50 - ≤75 | 1173092-74-4 |
| Poly[oxy(methyl-1,2-ethanediyl)], α-                                 | ≤10       | 9046-10-0    |
| (2-aminomethylethyl)-ω-(2-aminomethylethoxy)-                        |           |              |
| Formaldehyde, oligomeric reaction products with phenol               | ≤10       | 9003-35-4    |
| 2,6-ditert-butyl-p-cresol  | ≤10       | 128-37-0     |
| 3-aminopropyldiethylamine  | ≤5        | 104-78-9     |
| 2,4,6-tris(dimethylaminomethyl)phenol                                | ≤2.9      | 90-72-2      |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

| Description of necessary first aid measures |  |  |
|---|--|--|
| Eye contact                                 | : Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.   |  |
| Inhalation                                  | : Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, |  |

Date of issue/Date of revision

### Section 4. First aid measures

|                | belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.   |
|----------------|--|
| Skin contact : | Get medical attention immediately. Call a poison center or physician. Wash with<br>plenty of soap and water. Remove contaminated clothing and shoes. Wash<br>contaminated clothing thoroughly with water before removing it, or wear gloves.<br>Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly<br>by a physician. In the event of any complaints or symptoms, avoid further exposure.<br>Wash clothing before reuse. Clean shoes thoroughly before reuse.  |
| Ingestion :    | Get medical attention immediately. Call a poison center or physician. Wash out<br>mouth with water. Remove dentures if any. If material has been swallowed and the<br>exposed person is conscious, give small quantities of water to drink. Stop if the<br>exposed person feels sick as vomiting may be dangerous. Do not induce vomiting<br>unless directed to do so by medical personnel. If vomiting occurs, the head should<br>be kept low so that vomit does not enter the lungs. Chemical burns must be treated<br>promptly by a physician. Never give anything by mouth to an unconscious person.<br>If unconscious, place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband. |

#### Most important symptoms/effects, acute and delayed

| Potential acute health effect       | <u>s</u>  |  |
|-------------------------------------|---|--|
| Eye contact                         | : Causes serious eye damage.  |  |
| Inhalation                          | : No known significant effects or critical hazards.   |  |
| Skin contact                        | : Causes severe burns. May cause an allergic skin reaction.   |  |
| Ingestion                           | : Harmful if swallowed.   |  |
| <u>Over-exposure signs/symptoms</u> |   |  |
| Eye contact                         | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness  |  |
| Inhalation                          | : No specific data.   |  |
| Skin contact                        | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur  |  |
| Ingestion                           | : Adverse symptoms may include the following: stomach pains   |  |
| Indication of immediate med         | cal attention and special treatment needed, if necessary  |  |
| Notes to physician                  | : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.   |  |
| Specific treatments                 | : No specific treatment.  |  |
| Protection of first-aiders          | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |  |

See toxicological information (Section 11)

### Section 5. Firefighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Use an extinguishing agent suitable for the surrounding fire.   |
| Unsuitable extinguishing media                 | : None known.   |
| Specific hazards arising from the chemical     | : In a fire or if heated, a pressure increase will occur and the container may burst.<br>This material is very toxic to aquatic life. This material is toxic to aquatic life with<br>long lasting effects. Fire water contaminated with this material must be contained<br>and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides   |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.   |
| Special protective equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul>   |

# Section 6. Accidental release measures

| Personal precautions, protective equipment and emergency procedures |     |  |  |
|---|-----|--|--|
| For non-emergency<br>personnel                                      | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Do not breathe vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |  |
| For emergency responders  | :   | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |  |
| Environmental precautions   | :   | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful<br>to the environment if released in large quantities. Collect spillage.  |  |
| Methods and material for con  | Ita | inment and cleaning up   |  |
| Small spill   | :   | Stop leak if without risk. Move containers from spill area. Dilute with water and mop<br>up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry<br>material and place in an appropriate waste disposal container. Dispose of via a<br>licensed waste disposal contractor.   |  |
| Large spill   | :   | Stop leak if without risk. Move containers from spill area. Approach the release   |  |

Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spill product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

# Section 7. Handling and storage

| Precautions for safe handling                                      | 1 |   |
|--|---|---|
| Protective measures  | : | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. |
| Advice on general occupational hygiene                             | • | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.  |

# Section 8. Exposure controls/personal protection

| Control parameters               |   |
|----------------------------------|---|
| Occupational exposure limits     |   |
| None.                            |   |
|                                  |   |
| Appropriate engineering controls | If user operations generate dust, fumes, gas, vapour or mist, use process<br>enclosures, local exhaust ventilation or other engineering controls to keep worker<br>exposure to airborne contaminants below any recommended or statutory limits.   |
| Environmental exposure controls  | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |
| Individual protection measures   | 2   |
| Hygiene measures                 | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location. |
| Eye/face protection              | Safety eyewear complying to EN 166 should be used when a risk assessment<br>indicates this is necessary to avoid exposure to liquid splashes, mists, gases or<br>dusts. If contact is possible, the following protection should be worn, unless the<br>assessment indicates a higher degree of protection: chemical splash goggles and/<br>or face shield. If inhalation hazards exist, a full-face respirator may be required<br>instead.                                |
| Skin protection                  |   |
| Hand protection                  | :   |

# Section 8. Exposure controls/personal protection

| •                      | • •   |
|------------------------|---|
|                        | <ul> <li>There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals.</li> <li>The breakthrough time must be greater than the end use time of the product.</li> <li>The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed.</li> <li>Gloves should be replaced regularly and if there is any sign of damage to the glove material.</li> <li>Always ensure that gloves are free from defects and that they are stored and used correctly.</li> <li>The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance.</li> <li>Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.</li> <li>Wear suitable gloves tested to EN374.</li> <li>Recommended, gloves(breakthrough time) &gt; 8 hours: nitrile rubber, neoprene, butyl rubber</li> </ul> |
| Body protection        | <ul> <li>Personal protective equipment for the body should be selected based on the task<br/>being performed and the risks involved and should be approved by a specialist<br/>before handling this product.</li> </ul>   |
| Other skin protection  | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection | : If workers are exposed to concentrations above the exposure limit, they must use a respirator according to EN 140. Use respiratory mask with charcoal and dust filter when spraying this product, according to EN 14387(as filter combination A2-P2). In confined spaces, use compressed-air or fresh-air respiratory equipment. When use of roller or brush, consider use of charcoalfilter.   |
|                        |   |

# Section 9. Physical and chemical properties

| <u>Appearance</u>                            |   |   |
|--|---|---|
| Physical state                               | : Liquid.   |   |
| Colour                                       | : Colourless.   |   |
| Odour  | : Characteristic.   |   |
| Odour threshold                              | : Not applicable.   |   |
| рН   | : Not applicable.   |   |
| Melting point                                | : Not applicable.   |   |
| Boiling point                                | : Lowest known value: 170°C (338°F) (3-aminopropyldiethylamine). Weighted average: 208.88°C (408°F)                               |   |
| Flash point                                  | : Closed cup: Not applicable.   |   |
| Evaporation rate                             | : Not available.  |   |
| Flammability (solid, gas)                    | : Not applicable.   |   |
| Lower and upper explosive (flammable) limits | : Not applicable.   |   |
| Vapour pressure                              | : Highest known value: 0.2 kPa (1.5 mm Hg) (at 20°C) (3-aminopropyldiethylamine) Weighted average: 0.12 kPa (0.9 mm Hg) (at 20°C) | • |
| Vapour density                               | : Highest known value: 4.48 (Air = 1) (3-aminopropyldiethylamine).  |   |
| Density                                      | : 1.05 g/cm <sup>3</sup>  |   |
| Solubility                                   | : Insoluble in the following materials: cold water and hot water.   |   |
| Partition coefficient: n-<br>octanol/water   | : Not available.  |   |
| Auto-ignition temperature                    | : Not applicable.   |   |
| Decomposition temperature                    | : Not available.  |   |
| Viscosity                                    | : Kinematic (40°C): >20.5 mm²/s (>20.5 cSt)   |   |
|  |   |   |

# Section 10. Stability and reactivity

| : No specific test data related to reactivity available for this product or its ingredients.           |
|--|
| : The product is stable.   |
| : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| : No specific data.  |
| : No specific data.  |
| : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |
|  |

# Section 11. Toxicological information

#### Information on toxicological effects

#### Acute toxicity

| Product/ingredient name   | Result      | Species | Dose       | Exposure |
|---|-------------|---------|------------|----------|
| Poly[oxy(methyl-1,2-ethanediyl)],   | LD50 Dermal | Rabbit  | 360 mg/kg  | -        |
| α-  |             |         |            |          |
| $(2\mbox{-}aminomethylethyl)\mbox{-}\omega\mbox{-}(2\mbox{-}aminomethylethoxy)\mbox{-}$ |             |         |            |          |
|   |             |         |            |          |
|   | LD50 Oral   | Rat     | 242 mg/kg  | -        |

# Section 11. Toxicological information

| Specific target organ toxicit            | <u>y (single exposure)</u>   |
|--|--|
| Not available.                           |  |
| Specific target organ toxicit            | <u>y (repeated exposure)</u>   |
| Not available.                           |  |
| Aspiration hazard                        |  |
| Not available.                           |  |
| Information on likely routes of exposure | : Not available.   |
| Potential acute health effects           |  |
| Eye contact                              | : Causes serious eye damage.   |
| Inhalation                               | : No known significant effects or critical hazards.  |
| Skin contact                             | : Causes severe burns. May cause an allergic skin reaction.  |
| Ingestion                                | : Harmful if swallowed.  |
| Symptoms related to the phy              | sical, chemical and toxicological characteristics  |
| Eye contact                              | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness                           |
| Inhalation                               | : No specific data.  |
| Skin contact                             | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur |
| Ingestion                                | : Adverse symptoms may include the following:<br>stomach pains   |
| Delayed and immediate effect             | ts as well as chronic effects from short and long-term exposure  |
| <u>Short term exposure</u>               |  |
| Potential immediate effects              | : Not available.   |
| Potential delayed effects                | : Not available.   |
| Long term exposure                       |  |
| Potential immediate effects              | : Not available.   |
|  |  |

Potential delayed effects : Not available.

Potential chronic health effects

Not available.

| General                      | : Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels. |
|------------------------------|---|
| Carcinogenicity              | : No known significant effects or critical hazards.   |
| Mutagenicity                 | : No known significant effects or critical hazards.   |
| Teratogenicity               | : No known significant effects or critical hazards.   |
| <b>Developmental effects</b> | : No known significant effects or critical hazards.   |
| Fertility effects            | : No known significant effects or critical hazards.   |

# Numerical measures of toxicity Acute toxicity estimates

### Section 11. Toxicological information

| Route  | ATE value      |
|--------|----------------|
| Oral   | 589.61 mg/kg   |
| Dermal | 24669.21 mg/kg |

### Section 12. Ecological information

#### **Toxicity**

Not available.

#### Persistence and degradability

Not available.

#### **Bioaccumulative potential**

| Product/ingredient name  | LogPow       | BCF              | Potential   |
|--|--------------|------------------|-------------|

#### Mobility in soil

| Soil/water partition | : Not available. |
|----------------------|------------------|
| coefficient (Koc)    |                  |

Other adverse effects : No known significant effects or critical hazards.

### Section 13. Disposal considerations

| Disposal methods | : The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation<br>and any regional local authority requirements. Dispose of surplus and non-<br>recyclable products via a licensed waste disposal contractor. Waste should not be<br>disposed of untreated to the sewer unless fully compliant with the requirements of<br>all authorities with jurisdiction. Waste packaging should be recycled. Incineration or<br>landfill should only be considered when recycling is not feasible. This material and<br>its container must be disposed of in a safe way. Care should be taken when<br>handling emptied containers that have not been cleaned or rinsed out. Empty<br>containers or liners may retain some product residues. Avoid dispersal of spilt<br>material and runoff and contact with soil, waterways, drains and sewers. |
|------------------|--|
|                  |  |
