

#### **Jotafloor EP 600**

Solvent Free, High Solid Epoxy Coating System

## System description

This is a two component amine cured solvent free epoxy coating system. It is high performance system. It is a self smoothing, easy to apply system leaving a seamless surface. It has excellent chemical, abrasion and impact resistance. Jotafloor Non Slip Aggregates medium can be used in system for anti slip properties. Can be applied directly in two coats or on approved primers depending on the conditions of the concrete substrate.

# **Product description**

This system consists of below products.

Jotafloor EPC 300 : This is a two component amine cured solvent free epoxy coating. For porous concrete one or two coats of Jotafloor Sealer HS is recommended.

#### **Features and benefits**

Designed for a wide range of floors with various levels of mechanical and chemical exposure. Recommended for internal carparks & ramps, warehouses where forklifts with rubber tyres are used, workshops, Dairies, Factories, Chemical manufacturing plants, back of house and hotel carridors.

#### **Approvals and certificates**

Flexural Strength ASTM C580 41.6 N/mm $^2$  Tensile strength: ASTM C307 : 22.3 N/mm $^2$ 

Abarasion Resistance ASTM D 4060(CS 17): 30 mg / 1000 Cycles

Pull Of Strength ASTM D 454 : 3 N/mm<sup>2</sup> Water Permeability BS EN 12390 : Nil

Additional certificates and approvals may be available on request.

# Jotafloor EPC 300 Substrate

# **Packaging**

Jotafloor EPC 300 18 litres

Volume mentioned is of Component A + Component B

# Coverage

This system data sheet supersedes those previously issued.

The System Data Sheet is recommended to be read in conjunction with the Safety Data Sheet (SDS) and Techinical Data Sheet (TDS) for the products in the system.

For your nearest local Jotun office, please visit our website at www.jotun.com.

# System data sheet Jotafloor EP 600

Spreading rate per coat Dry film thickness

Jotafloor EPC 300 3.3 - 1.96 m<sup>2</sup>/l 300 - 500 μm

Spreading rate depends on film thickness applied, type of texture, surface porosity, imperfections, temperature, wastage during painting etc.

Coverage on Non slip aggregate would reduce considerably.

## **Surface preparation**

Substrate should be atleast 28 days old and have moisture content not exceeding 5% and leave a clean, sound and stable base. The preffered method of abrading the substrate is dust free captive blasting or diamond grinding.

To fill any blow holesor undulations in the substrate Jotafloor Filler or Jotafloor Filler Plus may be used.

## **Application**

#### **Intermediate Coat**

Mix and apply Jotafloor EPC 300 at specifed film thickness by roller. For anti slip finish Jotafloor Non Slip Agggregates medium should be broadcoasted after first coat of Jotafloor EPC 300 at 0.7 Kg/m2.

## **Storage**

The products must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be kept tightly closed. Handle with care.

# **Health and safety**

Please observe the environmental and precautionary notices displayed on the container.

A Material Safety Data Sheet for the product has been issued.

Detailed information regarding health and safety risks and precautions for the use of this product is specified in the product's Safety Data Sheet.

First-aid measures, refer to section 4.

Handling and storage, refer to section 7.

Transport information, refer to section 14.

Regulatory information, refer to section 15.

## **Caution**

These products are for professional use only. The applicators shall be trained, experienced and have the capability and equipment to mix/stir and apply the coatings correctly and according to Jotun's technical documentation. Applicators shall

use appropriate personal protection equipment when using the products. This guideline is given based on the current knowledge of the product. Any suggested deviation to suit the site conditions shall be forwarded to the responsible Jotun

representative for approval before commencing the work.
