

## SeaQuantum X200

## **Product description**

This is a one component state of the art chemically hydrolysing silyl methacrylate antifouling coating. It is anticipated to provide superior fouling protection, ultra low friction and incomparable hull performance. This is achieved through highly predictable and stable self polishing characteristics reducing hull deterioration, friction and speed loss. The initial smooth surface provides an excellent out of dock performance. To be used as finish coat in immersed environments only. It can be applied at sub zero surface temperatures.

Application of SeaQuantum X200 shall follow the instructions in **Application Procedure Jotun – Hull Performance Solutions**.

For further advice please contact your local Jotun office.

#### **Typical use**

#### Marine

Recommended for underwater hull in newbuilding and drydocking. Designed as an ultra premium solution for vessels with main focus on long term hull performance and fuel saving. The product is designed for long service periods and can be used up to 90 months as a part of a complete coating system.

#### **Typical trade**

Designed for both global and coastal trade. Recommended for exposure to both sea and fresh water during newbuilding outfitting.

#### **Approvals and certificates**

Compliant with IMO Antifouling System Convention AFS/CONF/26 + IMO MEPC.331(76).

Additional certificates and approvals may be available on request.

#### Colors

dark red, light red

#### **Product data**

| Property Test/Standard |  | Description   |  |  |
|------------------------|--|---------------|--|--|
| Solids by volume       | ISO 3233   | 55 ± 2 %      |  |  |
| Flash point            | ISO 3679 Method 1  | 77 °F (25 °C) |  |  |
| Density                | calculated   | 1.9 kg/l      |  |  |
| VOC-US/Hong Kong       | US EPA method 24 (tested) (CARB(SCM)2007, SCAQMD rule 1113, Hong Kong) | 3.49 lbs/gal  |  |  |

Date of issue: 6 July 2023 Page: 1/5

The provided data is typical for factory produced products, subject to slight variation depending on color.

### Film thickness per coat

#### Typical recommended specification range

Dry film thickness 3 mils (75  $\mu$ m) 7 mils (175  $\mu$ m) Wet film thickness 5 mils (135  $\mu$ m) 13 mils (320  $\mu$ m) Theoretical spreading rate 300 ft²/gal (7.3 m²/l) 130 ft²/gal (3.1 m²/l)

Max total DFT for multiple coats in the antifouling system: 600  $\mu \text{m}$ 

### **Surface preparation**

#### Surface preparation summary table

|                 | Surface preparation   |  |  |  |
|-----------------|---|--|--|--|
| Substrate       | Minimum   | Recommended  |  |  |
| Coated surfaces | New tie coat or new antifouling: Remove any contamination that could interfere with the intercoat adhesion. Exceeding maximum recoat intervals will require cleaning/abrading and/or application of additional coats, depending on condition.  Aged antifouling with leached layer: | Remove any contamination that could interfere with the intercoat adhesion. Exceeding maximum recoat intervals will require cleaning/abrading and/or application of additional coats, depending on condition. |  |  |
|                 | Removal by thorough fresh water washing at minimum nozzle pressure 2900 psi (200 bar).  | Removal by thorough fresh water washing at minimum nozzle pressure 4930 psi (340 bar).   |  |  |

## **Application**

#### **Application methods**

The product can be applied by

Spray: Use airless spray.

Brush: May be used. Care must be taken to achieve the specified dry film thickness.

Roller: May be used. Care must be taken to achieve the specified dry film thickness.

Date of issue: 6 July 2023 Page: 2/5

#### **Product mixing**

Single pack

#### Thinner/Cleaning solvent

Thinner: Jotun Thinner No. 7 /Jotun Thinner No. 10

#### Guiding data for airless spray

Nozzle tip (inch/1000): 21-31

Pressure at nozzle (minimum): 150 bar/2100 psi

## **Drying and Curing time**

Temperatures:  $-10^{\circ}\text{C} = 14^{\circ}\text{F} / -5^{\circ}\text{C} = 23^{\circ}\text{F} / 0^{\circ}\text{C} = 32^{\circ}\text{F} / 5^{\circ}\text{C} = 41^{\circ}\text{F} / 10^{\circ}\text{C} = 50^{\circ}\text{F} / 15^{\circ}\text{C} = 59^{\circ}\text{F} / 23^{\circ}\text{C} = 73^{\circ}\text{F} / 35^{\circ}\text{C} = 95^{\circ}\text{F} / 40^{\circ}\text{C} = 104^{\circ}\text{F} / 100^{\circ}\text{C} = 212^{\circ}\text{F} / 100^{\circ}\text{C} = 104^{\circ}\text{F} / 100^{\circ}\text{C} = 104^{\circ}\text{C} = 104^{\circ}\text{F} / 100^{\circ}\text{C} = 104^$ 

| Substrate temperature       | -10 °C | 0 °C | 10 °C  | 23 °C  | 40 °C  |
|-----------------------------|--------|------|--------|--------|--------|
| Surface (touch) dry         | 8 h    | 2 h  | 45 min | 30 min | 30 min |
| Dried to over coat, minimum | 27 h   | 16 h | 9 h    | 7 h    | 6 h    |
| Dried/cured for immersion   | 39 h   | 24 h | 10 h   | 9 h    | 8 h    |

For maximum overcoating intervals, refer to the Application Guide (AG) for this product.

The dried/cured for immersion data in the above table is the time required until the product is ready for sailing. For mechanical resistance to fenders and similar equipment longer drying times may be required. Please consult the Application Procedure for further advice.

When high film thickness is applied the antifouling will stay soft longer. To enable hull roughness reading when two or more antifouling coats are applied in rapid succession it is recommended to double the minimum time for immersion.

Drying and curing times are determined under controlled temperatures and relative humidity below 85 %, and at average of the DFT range for the product.

Surface (touch) dry: The state of drying when slight pressure with a finger does not leave an imprint or reveal tackiness.

Dry to over coat, minimum: The recommended shortest time before the next coat can be applied.

Dried/cured for immersion: Minimum time before the coating can be permanently immersed in sea water.

Date of issue: 6 July 2023 Page: 3/5

## **Recommended type of primer**

Anticorrosive primer system suitable for purpose. Recommended tie coat for the subsequent antifouling coat is: Safequard Universal ES

or

Safeguard Plus

## Packaging (typical)

|                     | Volume   | Size of containers |  |  |
|---------------------|----------|--------------------|--|--|
|                     | (liters) | (liters)           |  |  |
| SeaQuantum X200 - 2 | 20       | 20                 |  |  |
| SeaQuantum X200 - 3 | 20       | 20                 |  |  |

The volume stated is for factory made colors. Note that local variants in pack size and filled volumes can vary due to local regulations.

### **Storage**

The product must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be kept tightly closed. Handle with care.

Storage temperature not to exceed 95 °F (35 °C).

#### Shelf life at 73°F (23 °C)

 SeaQuantum X200 - 2
 9 month(s)

 SeaQuantum X200 - 3
 9 month(s)

In some markets commercial shelf life can be dictated shorter by local legislation. The above is minimum shelf life, thereafter the paint quality is subject to re-inspection.

#### **Note**

This product is for professional use only. The applicators and operators shall be trained, experienced and have the capability and equipment to mix/stir and apply the coatings correctly and according to Jotun's technical documentation. Applicators and operators shall use appropriate personal protection equipment when using this product. This guideline is given based on the current knowledge of the product. Any suggested deviation to suit the site conditions shall be forwarded to the responsible Jotun representative for approval before commencing the work.

## **Health and safety**

Please observe the precautionary notices displayed on the container. Use under well ventilated conditions. Do not inhale spray mist. Avoid skin contact. Spillage on the skin should immediately be removed with suitable cleanser, soap and water. Eyes should be well flushed with water and medical attention sought immediately.

Date of issue: 6 July 2023 Page: 4/5

This technical data sheet supersedes those previously issued.

The Technical Data Sheet (TDS) is recommended to be read in conjunction with the Safety Data Sheet (SDS) and the Application Guide (AG) for this product. For your nearest local Jotun office, please visit our website at www.jotun.com

#### **Color variation**

When applicable, products primarily meant for use as primers or antifoulings may have slight color variations from batch to batch. Such products and epoxy based products used as a finish coat may chalk when exposed to sunlight and weathering.

Color and gloss retention on topcoats/finish coats may vary depending on type of color, exposure environment such as temperature, UV intensity etc., application quality and generic type of paint. Contact your local Jotun office for further information.
