Jotun Facade 2481, 2483, 2486, 2487, 2488

PRODUCT DESCRIPTION

This lead-free TGIC-free powder coating is specifically designed to meet stringent requirements of the construction industry. It provides longevity to the projects and building components by ensuring gloss retention, colour stability and corrosion protection. This powder enables efficient application and provides uniform flow and attractive finish even after recycling. This product is certified according to Qualicoat Class 1, GSB Florida 1 and has weathering performance in line with AAMA 2603. This product is available in the following collections: Cool Shades Collection

Product series 2481, 2487 and 2488 contribute to the Green Buildings Standard credits. Please see section Green Building Standards.

Application areas

Primary areas of application are architectural aluminium extrusions and claddings. The overall excellent properties and attractive appearance of this product make it suitable for application to other ferrous and non-ferrous substrates.

When screen printing or sealants are used, it is advised to run separate trials to ensure compatibility and to meet the required performance criteria.

POWDER PROPERTIES

Property	Standard	Result
Specific gravity	Calculated	Max. 1.6 g/cm^3

Storage

Keep in a dry cool area. Maximum temperature 25 °C. Maximum relative humidity 60 %. If stored longer than 24 months a quality test must be performed.

APPLICATION

Pretreatment

The overall performance of the coating system is largely dependent on the nature of the substrate and the type and quality of the pretreatment. For optimal results, it is recommended to follow the pretreatment supplier's instructions and recommendations.

The recommended types of pretreatment for the most frequently used substrates are:

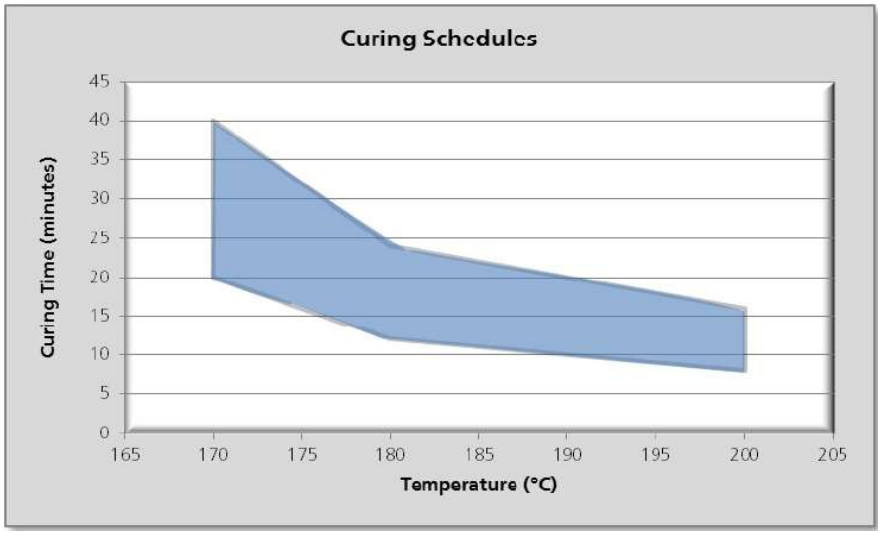
Substrate	Pretreatment
Aluminium	Chromate conversion
Steel	Zinc phosphate
Zinc coated steel	Zinc phosphate or chromate conversion
Final rinse (deionized)	The last running water from the object should be tested at 20 °C. The readings obtained should measure below 30 µS/cm.

Suitable chrome-free pretreatment for aluminium is also recommended. Due to the variety of chrome-free pretreatments available today, only the approved systems from Qualicoat and GSB should be used. Detailed advice should be sought from the pretreatment supplier.

Powder application

Recommended film thickness (µm): 60-80

Curing



Equipment

Suitable for Corona or Tribo charging equipment.

APPEARANCE

Colour

Available in RAL, NCS and in a wide assortment of custom-made colours, this coating provides a variety of effects, including metallic.

Gloss

EN ISO 2813 (60°)

2481	12 ± 5
2483	30 ± 5
2486	65 ± 5
2487	78 ± 5
2488	88 ± 5

Finish

2481	Fine texture
2483	Smooth
2486	Smooth
2487	Smooth
2488	Smooth

If the significant surface is too small or unsuitable for the gloss to be measured with the glossmeter, the gloss should be compared visually with the reference sample (from the same viewing angle).

Gloss measurements of metallic effect coatings can show deviation from original levels specified in this document and visual comparison with the reference sample is recommended.
Gloss range used in TDS and on the label of the metallic effect coatings represents gloss of the base and not of the final finish.

PERFORMANCE

The technical data provided below are typical for this product when applied as follows:

Substrate	Chromated aluminium panels
Substrate thickness (mm)	0.8
Film thickness (µm)	60-80

Typical values when tested.

Property	Standard	Result
Adhesion	EN ISO 2409 (2 mm)	Cross-cut rating Gt0 (100 % adhesion)
Impact resistance	EN ISO 6272 /ASTM D2794 (impactor diameter 15.9 mm)	More than 23 inch-pounds or 2.5 Nm without film cracking
Cupping test	EN ISO 1520	Indentation depth in excess of 5 mm without film cracking
Flexibility	EN ISO 1519	Cylindrical Mandrel bending test, passes 5 mm Mandrel diameter
Film hardness	EN ISO 2815	Indentation resistance according to Buchholz: >80
Mortar resistance	EN 12206-1	The mortar must be easy to remove without leaving any residues.
Drilling, milling and sawing test		No flaking of coating.
Acetic acid salt spray resistance	ISO 9227	After 1000 hours testing – maximum 16 mm² infiltration over a scratch length of 10 cm.
Humidity resistance containing SO_2.	EN ISO 3231 (0.2 I SO_2)	No infiltration exceeding 1 mm on both sides of the scratch after 30 cycles.
Humidity resistance	EN ISO 6270-2	No infiltration exceeding 1 mm on both sides of the scratch after 1000 hours
UVB Accelerated weathering	ISO 16474-3	Cycle: 4 hours at 50 ºC UV and 4 hours at 40 ºC condensation. No chalking, excellent gloss retention and colour stability after 300 hours testing.
Xenon Arc Accelerated Weathering	ISO 16474-2 Method A	Cycle: 102 minutes dry at 38 °C and 18 minutes water spray under UV. No chalking, excellent gloss retention and colour stability after 1000 hours testing.
Natural weathering test	ISO 2810 (South Florida, 27 ºN)	No chalking, excellent gloss retention and colour stability after 12 months exposure (angle of 5º to South).
Flame spread index	ASTM E84	Class 1 or A
Smoke Development Index	ASTM E84	Class 1 or A
Total Solar Reflectance*	ASTM G173 ASTM C 1549	Grades 2481R, 2483R, 2486R, 2487R, 2488R TSR ≥ 0.25

** Only applicable for the colours featured in 'The Cool Shades Collection'.*

Approvals

This product is certified according to Qualicoat Class 1 and GSB Standard requirements, and has weathering performance in line with AAMA 2603.
Qualicoat:
Jotun Facade 2481 P-0583 (CZ), P-1561 (TR), P-1619 (TH)
Jotun Facade 2483/2403 P-0795 (TR)
Jotun Facade 2487 - P-1029 (TH)
Jotun Facade 2487/2488 - P-0982 (TR), P-1008 (CZ)

GSB:
Jotun Facade 2481 168 b (CZ)
Jotun Facade 2487/2488 - 168 g (CZ)

When used as part of an approved scheme, this material complies with the Marine Equipment Directive 2014/90/EU.
SURFACE MATERIALS AND FLOOR COVERINGS WITH LOW FLAME CHARACTERISTICS
This product (s) has been tested to verify compliance with the following Regulations and testing standard:
Regulation (EU) 2018/773, item No. MED/3.18b. SOLAS 74, Reg. II-2/3, II-2/5, II-2/6 & X/3, IMO MSC/Circ. 1120, 2000 HSC Code 7 and IMO 2010 FTP Code.

Additional information

This product may be backed by a Product Performance Guarantee when applied on extruded architectural aluminium substrate. For further advice please contact your local Jotun office.

Green Building Standards

Jotun Facade 2481, 2487 and 2488 contributes to Green Building Standard credits by meeting the following specific requirements:

LEED®v4 (2013)
MR credit: Building product disclosure and optimization
- Material Ingredients, Option 2: Material Ingredient Optimization, International Alternative Compliance Path - REACH optimization: Fully inventoried chemical ingredients to 100 ppm and not containing substances on the REACH Authorization list – Annex XIV, the Restriction list – Annex XVII and the SVHC candidate list.
- Environmental Product Declarations. Product-specific Type III EPD (ISO 14025;21930, EN 15804).

BREEAM® International (2016)
Mat 01: Product-specific Type III EPD (ISO 14025;21930, EN 15804).
