# **Technical Data Sheet**

# Jotashield (C)

# **Product description**

#### Туре

A premium exterior paint based on 100% pure acrylic binder.

#### **Features and benefits**

Possesses excellent flow and gives smooth, tough satin finish.

2xUV Protected Colours: Colours last two times longer than other exterior paints for its unique pigment technology.

Dirt Resistance - Paint film resist dirt pick up from the environment and is easily washed off by the rain.

Water Resistant - Resist water ensuring less stain marks.

Formulated without Harmful Chemicals - Free from harmful chemicals such as APEO, formaldehyde, heavy metals and has low volatile organic compound (VOC).

#### **Recommended use**

For exterior application

#### Substrate

On concrete, masonry, plaster and brickwork.

## **Product data**

Packaging size	Packing may vary from country to country according to local requirements.
Colours	As per the colour card and available in Jotun Multicolor tinting system (Exterior range).
Solids by volume	39 ± 2 volume%
Specific gravity	1,33 Theoretical only for white colour.

# **Application data**

#### Remarks

Handle with care. Stir well before use.

#### **Application equipment / methods**

By brush, roller, airless spray or conventional spray.

#### Guiding data for airless spray

Nozzle tip	0.021" - 0.027"
Spray angle degrees	65°-80°
Pressure at nozzle	140 - 190 kg/cm <sup>2</sup> (2100 psi)

Date of issue: 18.12.2016

Product code: 15820

Page: 1/3

This Technical Data Sheet supersedes those previously issued.

The Technical Data Sheet (TDS) is recommended to be read in conjunction with the Safety Data Sheet (SDS) for this product. For your nearest local Jotun office, please visit our website at www.jotun.com.

#### Spreading rate per coat

#### Theoretical

9,75 m<sup>2</sup>/l - 13 m<sup>2</sup>/l

Spreading rate depends on film thickness applied, type of texture, surface porosity, imperfections, temperature, wastage during painting etc.

#### **Recommended film thickness per coat**

Wet	77	μm -	102	μm
Dry	30	μm -	40	μm

Film thickness will vary and are calculated as an average.

#### Thinner

Water

#### Dilution

The paint is ready to use after proper stirring. If thinning is required, water may be added up to a maximum of 5%.

#### **Conditions during application**

The temperature of the substrate should be minimum 10  $^{\circ}$ C and at least 3  $^{\circ}$ C above the dew point of the air, measured in the vicinity of the substrate. Good ventilation is usually required in confined areas to ensure proper drying.

#### **Drying times**

Drying times are generally related to air circulation, temperature, film thickness and number of coats, and will be affected correspondingly. The figures given in the table are typical with:

Good ventilation (Outdoor exposure or free circulation of air)

Typical film thickness

One coat on top of inert substrate

The given data must be considered as guidelines only. The actual drying time and time before recoating may be shorter or longer, depending on the ambient temperature, film thickness, ventilation, humidity, underlying paint system, requirement for early handling and mechanical strength etc.

1. Recommended data given is, for recoating with the same generic type of paint.

2. In case of multi-coat application, drying times will be influenced by the number and sequence and by the total thickness of previous coats applied.

3. The surface should be dry and free from any contamination prior to application of the subsequent coat.

The drying time is measured by stated values Relative Humidity (RH) 50 %			
Substrate temperature	10 °C	23 °C	40 °C
Surface (touch) dry	2 h	1 h	0.5 h
Hard dry	8 h	6 h	4 h
Dry to over coat, minimum	4 h	2 h	1 h

## **Directions for use**

#### Surface preparation

The substrate must be sound, clean, dry and free from dust, oil, grease, laitance etc. All traces of form release agents/curing agents must be removed. A light sanding with suitable abrasive material is recommended before application. Any resulting dust/loose particles must be removed.

#### **Recommended paint system**

Date of issue: 18.12.2016

Product code: 15820

# Technical Data Sheet Jotashield (C)

#### Primer

Cito Primer 09 or Jotasealer 07 : 1 coat

#### Topcoat

Jotashield (C) : 2 coats

#### Remarks

Other systems may be specified, depending on area of use.

#### Storage

The product must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be kept tightly closed. Handle with care.

## Certificates

GB/T9755-2014 Synthetic resin emulsion coatings for exterior wall. GB24408-2009 limit of harmful substances of exterior wall coatings.

### Tests

GB/T9755-2001 Synthetic resin emulsion coatings for exterior wall. GB24408-2009 limit of harmful substances of exterior wall coatings.

## Health and safety

Please observe the environmental and precautionary notices displayed on the container.

A Material Safety Data Sheet for the product has been issued. Detailed information regarding health and safety risks and precautions for the use of this product is specified in the product's Safety Data Sheet. First-aid measures, refer to section 4. Handling and storage, refer to section 7. Transport information, refer to section 14. Regulatory information, refer to section 15.
