Date of issue: 19.01.2024 Product code: 190 Product family 9JS Page: 1/3

This technical data sheet supersedes those previously issued.

# **Technical Data Sheet JOTUN Sparkel for treverk - Akryl**

#### **Drying times**

Thick layers, low temperature, high humidity and low air circulation will prolong the drying time.

The drying time is measured by stated values:

Relative Humidity (RH) 50 %

Air temperature23 °CSubstrate temperature23 °C

Dust dry30 min.Surface (touch) dry4 hRecoatable, minimum4 hDry to use4 h

# **Directions for use**

#### **Surface preparation**

Glossy surfaces must be cleaned with **JOTUN Spesialvask før maling**, sanded and dedusted prior to filler application.

#### **Primer**

New woodwork to be primed with JOTUN Kvist- og sperregrunning before applying filler.

#### Filler

For sanding the putty, sandpaper is used.

To obtain best possible result, 2 layers of filler is required. Large damages/scratches must be filled several times, until the surface is smooth when the filler is dry.

#### **Maintenance**

Not applicable. The product is not used alone.

#### **Management, Operation and Maintenance**

Please refer to the FDV datasheet for information regarding maintenance and repair of the painted surface.

#### **Storage**

Frost free freight and storage.

#### **Disposal of waste**

Filler must not be emptied into drains or watercourses. It must be delivered to an approved local environmental protection station.
