

Majestic Varnish Semigloss

Product description

Type

This is a premium and environment-friendly paint for interior wood surfaces. It is a water-based acrylic emulsion that is specially designed to provide better indoor air quality and reduce environmental impact.

Features and benefits

No added harmful chemicals such as alkylphenol ethoxylates (APEO), formaldehyde and heavy metals. It is also very low in odour during and after application, making it a pleasant experience for both painters and occupants. Optimum performance is achieved when used with Majestic Varnish Primer.

Recommended use

For use on interior wood substrates. Not recommended for areas subject to heavy or frequent condensation.

Substrate

Wood

Product data

Packaging size 2 L
Colours Clear

Solids by volume 33 \pm 2 volume%

Specific gravity

Application data

Remarks

Handle with care. Stir well before use.

The product can be applied by

 ${\bf Spray: Use\ conventional\ spray.}$

Brush: Recommended.

Roller: Possible

Spreading rate per coat

Theoretical 8.3 m^2/l - 11 m^2/l

Recommended film thickness per coat

Film thickness will vary and is calculated as average.

Date of issue: 08.01.2018 Product code: 27500 Page: 1/3

Technical Data Sheet Majestic Varnish Semigloss

Thinner

Water

Dilution

The paint is ready to use after proper stirring. If thinning is required, water may be added up to a maximum of 20%.

Conditions during application

The temperature of the substrate should be minimum 10 °C and at least 3 °C above the dew point of the air, measured in the vicinity of the substrate. Good ventilation is usually required in confined areas to ensure proper drying.

Drying times

Drying times are generally related to air circulation, temperature, film thickness and number of coats, and will be affected correspondingly. The figures given in the table are typical with:

- 1. Recommended data given is, for recoating with the same generic type of paint.
- 2. In case of multi-coat application, drying times will be influenced by the number and sequence and by the total thickness of previous coats applied.
- 3 The surface should be dry and free from any contamination prior to application of the subsequent coat..

The drying time is measured by stated values: Relative Humidity (RH) 50 % Substrate temperature	10 °C	23 °C	40 °C
Hard dry	8 h	6 h	4 h
Dry to over coat, minimum	4 h	2 h	1 h

Directions for use

Surface preparation

The substrate must be sound, clean, dry and free from dust, oil, grease, laitance etc. All traces of form release agents/curing agents must be removed. A light sanding with suitable abrasive material is recommended before application. Any resulting dust/loose particles must be removed.

Recommended paint system

Primer
