

# **Jotun Acrylic Gloss**

## **Product description**

This is a one component water borne acrylic emulsion coating. It is a versatile, fast drying product for exterior and interior use. It has a glossy finish with good colour and gloss retention. Dries down to  $10\,^{\circ}$ C. Ideal for new construction or maintenance where fast dry to handle and over coating times are required. To be used as topcoat in atmospheric environments. It is part of a complete water borne system with a recommended Jotun water borne primer.

### **Typical use**

#### Protective:

Suitable as topcoat in systems for a wide range of industrial structures, structural steel, piping and concrete to be exposed to corrosivity categories up to C5 (ISO 12944-2). Recommended for refineries, power plants, bridges, buildings and mining equipment. Recommended for accommodation and working spaces.

#### Marine:

Suitable as topcoat in systems for a wide range of marine structures in corrosivity categories up to C5 (ISO 12944-2). Recommended for accommodation and engine rooms.

#### **Colours**

Wide range of colours.

## **Product data**

Property	Test/Standard	Description
Solids by volume	ISO 3233	41 ± 2 %
Gloss level (GU 60 °)	ISO 2813	gloss (70-85)
Flash point	ISO 3679 Method 1	100 °C
Density	calculated	1,3 kg/l
VOC-EU	IED (2010/75/EU) (calculated)	135 g/l

The provided data is typical for factory produced products, subject to slight variation depending on colour. Gloss description: According to Jotun Performance Coatings' definition.

## Film thickness per coat

#### Typical recommended specification range

Dry film thickness	40 -	75	μm
Wet film thickness	98 -	183	μm
Theoretical spreading rate	10,3 -	5,5	m²/l
Theoretical spreading rate	13,4 -	7,2	m²/kg

Date of issue: 6 October 2016 Page: 1/5

## **Surface preparation**

To secure lasting adhesion to the subsequent product all surfaces shall be clean, dry and free from any contamination.

#### Surface preparation summary table

Surface preparation		preparation
Substrate	Minimum	Recommended
Coated surfaces	Clean, dry and undamaged compatible coating (ISO 12944-4 6.1)	Clean, dry and undamaged compatible coating (ISO 12944-4 6.1)

# **Application**

#### **Application methods**

The product can be applied by

Spray: Use airless spray or conventional spray.

Brush: Recommended for stripe coating and small areas, care must be taken to achieve the

specified dry film thickness.

Roller: Use a suitable roller. However when using roller application care must be taken to apply

sufficient material in order to achieve the specified dry film thickness.

#### **Product mixing**

Single pack

#### Thinner/Cleaning solvent

Thinner: Water

#### **Guiding data for airless spray**

Nozzle tip (inch/1000): 13-19

Pressure at nozzle (minimum): 150 bar/2100 psi

## **Drying and Curing time**

Substrate temperature	10 °C 23 °C 40 °C
Surface (touch) dry	1 h 30 min 15 min
Walk-on-dry	5 h 2 h 1 h
Dry to over coat, minimum	5 h 2 h 1 h

Date of issue: 6 October 2016 Page: 2/5

# Technical Data Sheet Jotun Acrylic Gloss

Drying and curing times are determined under controlled temperatures and relative humidity below 85 %, and at average of the DFT range for the product.

The recommended Relative Humidity range is 30-75 %.

Surface (touch) dry: The state of drying when slight pressure with a finger does not leave an imprint or reveal tackiness.

Walk-on-dry: Minimum time before the coating can tolerate normal foot traffic without permanent marks, imprints or other physical damage.

Dry to over coat, minimum: The shortest time allowed before the next coat can be applied.

#### **Heat resistance**

# TemperatureContinuousPeakDry, atmospheric70 °C80 °C

The dry coating film will be gradually softer as temperature increases. Correct procedures for handling and stacking must be established, depending on environmental conditions. Protective properties will not be influenced.

Peak temperature duration max. 1 hour.

The temperatures listed relate to retention of protective properties. Aesthetic properties may suffer at these temperatures.

## **Product compatibility**

Depending on the actual exposure of the coating system, various primers and topcoats can be used in combination with this product. Some examples are shown below. Contact Jotun for specific system recommendation.

Previous coat: acrylic, epoxy

### **Additional information**

Procedure for preparation and cleaning of application equipment

To avoid solvent contamination of the water borne paint the spraying equipment has to be conditioned before use. All equipment containing solvents in the pump, hoses and gun have to be thoroughly cleaned according to the following instructions.

If the application equipment is made in stainless steel, designed for and only used for application of water borne coatings this preparation and cleaning procedure is not needed.

#### Before spraying:

Circulate Jotun Thinner No. 17 through the equipment and hoses. Then Jotun Thinner No. 4 before fresh clean water.

#### After spraying:

Clean the equipment and hoses with water and alkaline detergent, then circulate Jotun Thinner No. 4 and finally Jotun Thinner No. 17.

## Packaging (typical)

Volume Size of containers (litres) (litres)

Jotun Acrylic Gloss 4 / 15 4 / 15

The volume stated is for factory made colours. Note that local variants in pack size and filled volumes can vary due to local regulations.

## **Storage**

The product must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be kept tightly closed. Handle with care.

Protect from freezing at all times during storage and transport.

#### Shelf life at 23 °C

Jotun Acrylic Gloss

48 month(s)

In some markets commercial shelf life can be dictated shorter by local legislation. The above is minimum shelf life, thereafter the paint quality is subject to re-inspection.

## **Caution**

This product is for professional use only. The applicators and operators shall be trained, experienced and have the capability and equipment to mix/stir and apply the coatings correctly and according to Jotun's technical documentation. Applicators and operators shall use appropriate personal protection equipment when using this product. This guideline is given based on the current knowledge of the product. Any suggested deviation to suit the site conditions shall be forwarded to the responsible Jotun representative for approval before commencing the work.

# **Health and safety**

Please observe the precautionary notices displayed on the container. Use under well ventilated conditions. Do not inhale spray mist. Avoid skin contact. Spillage on the skin should immediately be removed with suitable cleanser, soap and water. Eyes should be well flushed with water and medical attention sought immediately.

### **Colour variation**

When applicable, products primarily meant for use as primers or antifoulings may have slight colour variations from batch to batch. Such products may fade and chalk when exposed to sunlight and weathering.
