

# **JOTUN Silikat Murfiller**

# **Product description**

#### Type

Silicate based, texture filling and crack bridging midcoat according to DIN 18363, 2.4.1.

# Silikat Murfiler - Issue management of the control of the control

#### **Features and benefits**

Mid Coat for calcareous plaster. Compensates cracks and irregularities. Highly permeable. Excellent adhesion.

#### Recommended use

Mineral surfaces outdoor and indoor such as facades and other surfaces of new or cleaned plaster, absorbent stone, gas concrete, limesandstone, etc. Untreated bricks must be plastered before painting. New plaster should be applied according to current standards.

Grov, alkalie

nsel JOTUN Penselr

#### **Product data**

Tinting Can be mixed maxiumum 1:1 with coloured JOTUN Silikat Murmaling.

Colours White Gloss level Matt

**Generic type** One-component, lightly structured silicate based paint according to DIN 18363,

2.4.1.

**Solids by volume**  $50.6 \pm 2 \text{ volume}\%$ 

Specific gravity 1.67 pH value 11

**VOC for Ready-for-Use** 

Mixture

EU limit value for the product (cat. A/c): 40 g/l. The product contains max 40 g/l

VOC.

# **Application data**

Stir well before use. Not to be used in direct sunshine. Paint should be regarded as a semi-manufacture. The result is dependent on construction, the condition of the substrate, temperature, application etc.

#### Application equipment / methods

Coarse, alkali resistant brush. Cross brush with a coarse brush.

#### Cleaning of painting tools

Water and JOTUN Penselrens or water and a suitable cleaning agent.

Date of issue: 03.01.2023 Product code: 41442 Product family 27D Page: 1/3

This Technical Data Sheet supersedes those previously issued.

The Technical Data Sheet (TDS) is recommended to be read in conjunction with the Safety Data Sheet (SDS) for this product. For your nearest local Jotun office, please visit our website at www.jotun.com.

#### **Spreading rate and film thickness**

	Spreading rate per coat	Film thickness per coat (µm)		
	(m²/liter)	Wet (calculated)	Dry (calculated)	
Recommended:	3 - 4	250 - 333	126 - 169	

#### **Conditions during application**

Temperature of air and substrate must be above +5 °C and below +25 °C during painting.

#### **Drying times**

The drying time depends on the surface temperature (min. +5 °C), absorption, humidity and air circulation.

The drying time is measured by stated values:				
Relative Humidity (RH)	50 %	50 %		
Air temperature	10 °C	23 °C		
Substrate temperature	10 °C	23 °C		
Dust dry		1 h		
Recoatable, minimum	24 h	12 h		

### **Directions for use**

Surface preparation:	The substrate must be clean, sound and dry: Fungus, soot and other contamination must be removed, using <b>JOTUN 3-i-1 Kraftvask ogTræ- og Murrens</b> . Rinse with clean water. The surface must be dry before further treatment.  Any constructional weaknesses must be repaired before painting. New plaster should be applied according to current standards. Substrates previously treated with an organic paint, must be restored to original condition (uncoated masonry) before recoating. Silicate will attack glass, metal and natural stone - should be covered.
Primer:	Bare walls must be primed with <b>JOTUN Silikat Murprimer</b> diluted $1:1$ with water.
Mid Coats:	Mix Murfiller:Murprimer 5:1. Stir well! Do not dilute with water. Cross brush with a coarse brush. <b>JOTUN Silikat Murfiller</b> should always be used after paint removal to ensure good adhesion to the substrate. <b>JOTUN Silikat Murfiller</b> should always be recoated with <b>JOTUN Silikat Murmaling</b> .
