

# **Guard Shield**

# **PRODUCT DESCRIPTION**

Guard Shield is a range of powder coatings that combine good appearance with excellent protection performance in aggressive environments where mechanical and chemical resistance is required. The product offers a high level of surface hardness and resistance to wear and tear.

## **Application areas**

This product is recommended for interior use only.

Typical application areas: Heavy duty machinery and tools Laboratory equipment Pallet-racks

## **POWDER PROPERTIES**

Property	Standard	Result
Specific gravity	Calculated	Typically 1.6+/- 0.2 g/cm3

#### Storage

Keep in a dry cool area. Maximum temperature 25 °C. Maximum relative humidity 60 %. If stored longer than 12 months a quality test must be performed.

## **APPLICATION**

### Pretreatment

The overall performance of the coating system is largely dependent on the nature of the substrate and the type and quality of the pretreatment. For optimal results, it is recommended to follow the pretreatment supplier's instructions and recommendations.

### **Powder application**

Curing schedule	Object temperature	Time
Guard Shield 0 Gloss <70	200°C	10 minutes
Guard Shield 8 Gloss ≥70	180°C	10 minutes

Recommended film thickness (µm): 60-90

#### Equipment

Suitable for Corona or Tribo charging equipment.

## APPEARANCE

Date of issue: 14 March 2024

This Technical Data Sheet supersedes those previously issued.

The Technical Data Sheet (TDS) is recommended to be read in conjunction with the Safety Data Sheet (SDS) and the Application Guide (AG) for this product. For your nearest local Jotun office, please visit our website at www.jotun.com

Colour	The product is available in a wide assortment of custom-made colours, including RAL and NCS.		
Gloss	EN ISO 2813 (60°)	All gloss levels	
Finish	Smooth and fine textured finishes.		
If the significant surface is too small or unsuitable for the gloss to be measured with the glossmater, the gloss should			

If the significant surface is too small or unsuitable for the gloss to be measured with the glossmeter, the gloss should be compared visually with the reference sample (from the same viewing angle).

## PERFORMANCE

The technical data provided below are typical for this product when applied as follows:

Substrate	Zinc-phosphated cold rolled steel panels
Substrate thickness (mm)	0.8
Film thickness (µm)	60-90
Typical values when tested.	

Property	Standard	Result
Adhesion	EN ISO 2409 (2 mm)	Cross-cut rating Gt0 (100 % adhesion)
Impact resistance	ASTM D2794 (5/8 " ball) (inch-pounds, front and reverse) Gloss < 60 Gloss > 60	20/20 60/60
Resistance to neutral salt spray	ISO 9227 ISO 4628-2 ISO 4628-8	No blistering and maximum 2 mm corrosion creep from scribe after 504 hours
Resistance to humid atmospheres	ISO 6270-2 ISO 4628-2 ISO 4628-8	No blistering and maximum 2 mm corrosion creep from scribe after 504 hours
